to accomplish it. WHAT TO DO IN APRIL. lier it is put in the better. Whether the ground is to be appropriated to grazing, or meadow, sow several kinds of seed, as the sed will be famous and the sed will be famous as yellow as saffron. sod will be firmer and the grass more abun- A farmer should not let his buildings clover, unless seed is the chief object, it while he can easily afford the means to seed is sowed. Orchard and Kentucky by the glass. blue grass seed weigh, with us, 14 lbs. per

pare meadows for the mower. See that all the heaps and lumps of manure are broken opportunities and materials to make or the heaps and lumps of manure are broken to atoms and scattered over the ground, b fore the grass starts. Rally all, the forces, when you are in doubt what to do first, and clear the ground of stones, and everything else that will hinder the progress of

the mowing machine. Sow ashes, gypsum, lime, or any other fertilizing matter, as early as practicable. Ashes will be found excellent for meadows and pastures, on most soils. If the ground is covered with moss, and the grass appears to be bound out, sharpen the harrow teeth and give the ground a thorough scarifying. Apply a liberal dressing of ground bone, or some other fertilizer, previous to har-

When grass seed is sowed on winter wheat, or winter rye, if the surface appears crusted over so that it is difficult for the seed to find depressions where they will be covered with soil, give the ground a light harrowing. A few stools of wheat may be torn up; but the harrowing will benefit the growing crop far more than the little injury teams.

To make an excellent bed of fertilizing matter for the garden, to be used in May, turn up the privy on one side, and dip out the fecal matter with a strong pail attached to the end of a pole, and pour it on a bed of muck, or fine soil, and mingle the whole thoroughly together.

If any flax seed is to be sowed, defer putting it in until after the ground has been worked long enough for all the seeds of from those strong, in the fall, and give them weeds near the surface to germinate. Then special care. a heavy harrowing will destroy a large crop of noxious weeds in the seed-leaf, and flax will get the start of the weeds, and maintain the ascendancy during the entire

season Prepare stubble ground for a crop of sorghum, where the ground is heavy and was not plowed last autumn, by plowing, manuring and harrowing. By this process, it will be thoroughly pulverized, the weeds will be destroyed, and the great proportion of the labor of dressing out the young plants will be done previous to planting the seed. This kind of management will save a vast amount of hard labor. The ground for turnips and Indian corn may be

treated in the same manner. Teams require not only care in feeding, boiled in a little water. management. And the same great relief to engage in something else, sheep that dies. be better to make fence, or engage in some et. light labor, for a part of the day.

the period of gestation.

of April.

Let early lambs and their dams be separated from the flock and receive extra feed fered to drop their lambs where they will be chilled.

Things a Farmer should not do-

A farmer should not break up more land eral term applied to several diseases of horthan he can cultivate thoroughly; half-tilled ses. Mad or sleepy staggers is inflamation land is always growing poorer, while well- of the brain, a rare but fatal complaint tilled land is constantly improving. A marked by high fever, a staggering gait, thrifty and prudent farmer will not devote violent convulsive struggling, usually terhis sole attention to the improvement of minating in stupor, and treated by bleeding certain fields on his farm, because the land full dose of physic, and cold water to the is "easy to work at," and let other portions head. Grass or stomach staggers is acute of his premises go uncultivated, and grow indigestion, usually occsioned by overloadnothing but weeds, brush, bogs, briars and ing the stomach and bowels with tough A farmer should never have more cattle, of wheat, or other indigestible food. It is

order at the beginning of winter is already abdomen, dull aspect, unsteady gait, and is half wintered. Nor should he let his cattle endure the chilling storms of winter in an pended in the way of making comfortable and given in a quart of thin boiled gruel.

Frequently clysters, with hard rubbing and of fodder, and afford a greater amount of hot water to the belly, are likewise useful. milk

on his neighbors for what he can by care- turist. ful management produce on his own land. He should not make it a common practice ground-nor annoy his neighbors by borrowing tools to work with, while he can make or buy them. "The borrower is servant to the lender."

A farmer should never be so immersed in political matters as to neglect doing his various kinds of work in due season, and to snug up matters and things for winter ; nor should he be so inattentive to polotics as to remain ignorant of those great questions of national and state policy which will always agitate more or less a free peo-

A farmer should not be continually borrowing his neighbor's newspaper, while he can easily save money enough, by cur-

A farmer should never refuse a fair price for anything he wishes to sell. I have known men to refuse a dollar and a half for a bushel of corn, and after keeping it five or six months they were glad to get a tions for field operations on the farm and dollar for it. I have known farmers to re work in the garden; and April invites the fuse to take a fair marketable price for polished plow and glittering spade to break their dairies of butter, and after keeping it up the fertile soil and scatter the seed for three or four months they concluded to sell the promised crops. In many localities, the butter for only two-thirds of the price however, where the Reporter is circulated, which they were first offered. "A bird in

garden, during this month, demands more drawing a little by piecemeal, and green at than a passing notice. There are many that. He must expect to encounter the things done in the garden as well as in the sour looks of his wife and family, and percultivable field, in April, which had better haps be compelled (in a series of lectures) been deferred till May, even were the job to learn that the man who provides green to require double the expenditure of force wood to burn in the winter, has not measured the first rules of domestic economy.-Nor should he employ some "botch" mason Grass seed may be sowed; and the ear- to build his chimnies "upside down" so that

dant. When land is stocked down with red look as old as the hills, and go to decay, will be far better to sow one bushel of or- keep them in good repair; nor should he chard grass and one of Kentucky blue allow tattered clothes and old hats to be grass, per acre, with four quarts of red clo stuffed in the windows, in place of glass. ver seed, than nothing but clover, as the If he does, he need not be alarmed if he grass will be far better for either hay or acquires the reputation of a mean man, or pasture, than when only one kind of grass one who tarries long where liquor is sold

A farmer should not be contented with dilapidated looking fences on his farm, so There is no better time than April to pre- as to tempt his cattle to become unruly and keep them in repair. - Working Farmer.

Cautions for those having Sheep-

The following suggestions to those having sheep, are taken from a circular issued by the American Emigration Company, who own over 10,000 sheep, which are scattered among the farmers who purchased land from them.

1. Keep sheep dry under foot with litter. This is even more necessary than roofing them. Never let them stand or lie in mud or snow.

2. Take up lamb bucks early in summer, and keep them up until Dec. 1st, following, whe they may be turned out.

3. Drop or take out the lowest bars, as the sheep enter or leave the yard, thus saving broken limbs.

4. Count every day 5. Begin grain with the greatest care, and use the smallest quantity first. 6. If a ewe loses her lamb, milk daily for

done by the teeth of the harrow and feet of a few days, and mix a little alum with her milk 7. Let no hogs eat with the sheep-by no means in the spring.

8. Give the lambs a little "mill-feed" in time of weaning. 9. Never frighten sheep if possible to avoid it.

10. Sow rye for weak ones in cold weather, if you can. 11. Separate all weak, or thin, or sick,

12. If any sheep is hurt, catch it at once, wash the wound, and if it is in fly time, apply spirits of turpentine daily, and always wash with something healing. If a limb is broken, bind it with splinters, tightly, loosening as the limb swells.

13. Keep a number of good bells on the 14. Don't let sheep spoil wool with chaff

15. Cut tag-locks in early spring. 16. For scours, give pulverized alum in wheat bran-prevent by taking great care

in changing dry for green food. 17. If one is lame, examine the foot, clean out between the hoofs, pare the hoof if unsound, and apply tobacco, with blue vitrol

18. Shear at once any sheep commencing is true of laborers. After working a few to shed its wool, unless the weather is too hours at some heavy labor, it will be a severe, and save carefully the pelt of any

ess fatiguing, for a few hours. When a 19. Have some good work by to refer to workman first begins to cut ditches, it will at least; this will be money in your pock-

How to Make Manure.—Every farmer when they come in. Every cow should should have a good yard connected with have a few quarts of roots daily; and af his stable, and it should be covered to the ter they have come in, feed each one three depth of six inches or more in the fall, with or four quarts of Indian corn and peas swamp muck, leaves, or turf, which by laying in the yard during the winter, and be-Give every brood mare the benefit of a ing mixed with the droppings of the cattle, box stall sufficiently large for her to turn will in the spring be as good as common around in, as mares often drop their colts barnyard manure. The farmer's hogs should before the udder and teats are developed be kept at work making manure, for they sufficiently to indicate the termination of will work diligently, if occasionally they are encouraged with a little corn and other Seperate brood sows from other swine grain. Every animal that the farmer has before the enlargement of the udder; and should be made to assist in adding to the make a warm sty, where the young pigs will manure heap. Farmers who continually not be exposed to the cold winds and storms | secure all the manure | they can, use it dis-Keep a sow on a few boiled po- creetly, and exercise becoming economy, tatoes, skimmed milk and oat meal, prop- with the ordinary blessings of Him who reerly salted, and she will never devour her wards the diligent, will soon be able to live in affluence and enjoy the apellation PLANING, of being called the "nobility of America," gained by their skill with the plow, and till grass appears. Ewes should not be suf-their success in producing bread for the A. King.

hungry. Americus, Georgia.

STAGGERS IN HORSES.—Staggers is a genhard grass, vetches, or clover, or a full meal horses or other animal stock than he can most common in summer and autumn; is keep in good order. An animal in good indicated by impaired appetite, distended icine, such as six drachms of aloes and a open yard or field, whilst a few dollars ex- drachm of calomel rubbed down together When the dullness increases, stimulants A farmer should never depend too much | should really be given.-British Agricul-

to either buy or beg fruit while he can Put the animal over night in a horse stable, and the next morning will usually find her restored; if not one more night will complete the cure. I have never known it to fail "cake" or inflamation of the udder.

> Sorghum Sugar.—The culture of Sorghum is making advances now-a-days, and there is really some prospect, that a marketable article of brown sugar will be produced .-It seems from statements brought out by the comparison of views and practice at the recent Sorghum Conventions, that the early cut, even unripe canes, yield the most cane sugar with great uniformity.

TWENTY-FIVE YEARS EXPERIENCE IN DENTISTRY.—J. S. SMITH, M. D., would respectfully inform the inhabitants of Bradford Connty that he is permanantly located in Waverly, N.Y., where he has been in the practite of his profession for the past four years. He would say that from his long and successful practice of 25 years duration, he is familiar with all the different styles of work done in any and all bental establishments in city or country, and is better prepared than any other Dental operator in the vicinity to do work the best adapted to the many and different cases that present themselves oftentimes to the Dentist, as he understands the art of making his own artificial teeth, and has facilities for doing the same. To those requiring under sets of teeth he would call attention to his new kind of work which consists of porcelain for both plate and teeth, and forming a continuous gum. It is more dearable, more natural in appearance, and much better adapted to the gum than any other kind of work. Those in need of the same are invited to call and examine specimens. Teeth filled to last for years and often t mes for life. Chlorofo. m. ether, and "Network oxide" administered with perfect safety, as over four hundred patients within the last four years can testify.
