OF WESTMORELAND COUNTY.

The Philadelphia Daily News, whose editor is an applicant for the Collectorship of the Port of Philadelphia, has become a most violent Johnson advocate, lauding his e-construction measures beyond all reasonable bounds, and abusing Congress to the full extent of its ability, for daring to act independent of the President. Its mercenary motives, however, are so well known, that it fails to have any effect; and the vulgar ribaldry it indulges in, when speaking of Messrs. Stevens and Sumner, and the republican press of the country, shows its

ness, and the weakness of its cause. This journal, in its issue of June 1st, makes a great ado over an editorial article it extracts from a religious paper of the South, and declares, in substance, that the republican press will not publish such articles as this, and others like it, which give a true version of the sentiments and actions of the Southern people, yet it adabout two millions. > FOUR MISTAKES.—The great obstacle to reco struction in Church and State, in fact and in feel ing, lies in mutual misunderstanding of the facts regard to each other by the northern and south ern people. If the truth were known at the North as to what is said, and done, and thought, and felt in these southern States, we believe that a controlling number of the people there would be inclined to extend to us such treatment as we desire and as to extend to us such treatment as we desire and as we think we deserve. There are four leading par-ticulars in which we think their judgments of us are entirely wrong, and if they could be correctly informed on these points, we believe that a vast stride would be made toward real peace. With a sincere desire to do good to our fellow-men, and to glorify our Father in Heaven, we proceed to men-tion these four things, and to put on record our tion these four things, and to put on record our solemn testimony in regard to them. First. It is believed at the North that the peo-

ple here consider the late dispute still unsettled, that they are anxious for another opportunity to resort to arms, and that they are ready and ripe to avail themselves of the first occasion to make another effort for independence.

In all this our nothern friends are entirely mis-

taken. There is not a word of truth in it. There may be individuals of whom it is true—of course we cannot say that there are none—but we can and do say that we know of none and have heard of none. The people here are not thinking about arms nor about independence; the ideas for which the war was fought are considered obsolete and are seldom spoken of. The great idea with almost every one is to take care of himself and improve his wn condition. Revolution is of all things the arthest from their wishes or thoughts.

Second. It is believed at the North that there is

here a general disposition to oppress and persecute the negro race, and, if possible, to re-enslave Nothing could be further from the truth. During

the war the slaves for the most part stood by their masters. labored for them without overseers in thousands of instances, and sympathized with —A young lady, of Lafayette, Ind., who ad been in the habit of eating arsenic to improve er complexion, took too much the other day, and things have increased the kindness of feelings which were kind before, and the negro race is held in higher estimation at the South this day than it ever has been. ever has been. The rights of suffrage, of holding office, and of sitting on juries are denied them by our laws, but in all other respects they are (in Georgia) precisely on a footing with the white peo-

but the facts are as we state.

Third. It is believed at the North that the moation of the national debt.

We have never heard this scheme proposed by a we have never heard this scheme proposed by a southern man, and it probably would never have been thought of here if we had not received the idea from northern newspapers. We have never heard it spoken of except with condemnation.—

Most of us are wise enough to know that it is to our interest to sustain the government under which we expect to live.

Royal Geographical Society of London that the southern people, if invested with political power, population of Pekin, China, is not more than one would endeavor to force upon the government the sumption of the debt of the late confederacy. We do not believe that this idea ever entered in-to the wildest dream of the most visionary man in these southern States. We have never heard the subject mentioned, except with ridicule, and, as in

the preceding case, we believe it never would have been mentioned at all if it had not been thrust upon our attention by the northern press.

If the people at the North could only know the ried last week at the freedmen's village on Arlingtruth in regard to the four points above spoken of, we believe that there would be an immense change in public opinion, and in the state of public feeling there, and that the result would be a restoration of friendly relations and of material prosperity. Few of them, perhaps, will see these lines; of those who see them, some, we have no doubt, will believe all we said, for some of them know that our testimony can be relied on; some, we fear, will say that we willfully falsify, and others will probably say that we are mistaken as to the facts. We earnestly entreat those who doubt our evidence to tell us what evidence would be satisfactory, and if they demand evidence, which the nature of the case admits of, we think we can pledge ourselves

there is some hope that the proposal will result successfully.

—The New Bedford Mercury says that some of the old whaling captains in that city are the old whaling captains in the old Georgia, and they shall be promptly responded to

I. To the first paragraph of this article, we reply, "mutual misunderstanding of the facts in regard to each other," has little or nothing to do with the question of re-construction. It is not so much what the southern people are now doing, or thinking, as what they did do and think during the four grants are expected to arrive in Chicago within a years they made war upon the United few days. A large proportion of them will locate States. They did great injury to the government, and to the loyal people who defended it in that war, and it is the opinion dova, one of the Argentine provinces, for the comof the sufferers that some atonement should deaths from cholera in New York City last as a member of any State Legislrture, or as an exself-respect, to subside. CARDEN SEEDS .- AS THE QUALITY ARDEN SEEDS.—AS THE QUE and age of seeds cannot be told by their ance, it is of course desirable to purchase only are known to be reliable. It will require but flection I think to convince any person that that sends seeds all over the country to be sold mission, taking back all unsold, is less likely to good seeds, than one which sells their seeds of thus having no old seeds on hand. Last season a quantity of Buist's Celebrated Seeds and the tried them I think will not be satisfied to return tried them I think will not be satisfied to re old stock of commissions seeds.

I have t his season a large stock of the same kind of seeds, and I hope to be able to supply all who will try them with first class fresh and reliable seeds.
