From the Country Gentleman. Winter Feed of Animals.

year. One truitful source of loss is yards or fields where one third more food in consumed solely for the purpose of keeping them warm, than in ight, comfortable, well littered sheds and stables. Another large portion is wasted by being trodden under foot for want of suitable racks and feeding boxes. A third source of waste is in giving the food to the animals in a form or condition in which they cannot eat it readily-and this brings us to the suggestion which we wish

to make. Immense quantities of corn fodder have been raised all through the country. Where it has been well preserved it is worth much more than when injured by mouldiness, exposure to rains, &c. The additional labor required in setting up the stalks in straight, even, stiff shocks is always its preservation to this process. many times repaid by the improved condition and value of the fodder .-But the question at present is—taking in underdraining land were made in the fodder as we find it—how can we Scotland last year for the purpose of

ting up, with his six horse power, in hours, on stormy days, enough food to last four or five days. It was apt to ferment if left in large heaps The importance of winter mulching, much longer, except in very cold weasheltering from winds and other ther. As all cattle are greatly bene-

We published last summer a valuaapplicable character on the part of een of Macedon, N. Y., of his mode of feeding horses, by which he kept them The observations were made on soil early in winter, after exposure to cold only two thirds of the common exaveraging some ten or twelve degrees pense of feeding them on hay and below freezing, for about a week, accompanied with a good deal of wind. Grain. His experiments were the more reliable because they were the The depth to which the ground was found frozen will indicate the various uring. He employed oat straw, corn degrees of advantage resulting from meal and bran as their entire food .-Bare soil beaten moderately hard in raw-hide machine, about an inch long; a farm road was found frozen very the work being done on rainy days, es with a variation of an inch or so, This, when fed, was mixed with about as the surface was more or less ex- three quarts of corn meal and bran, in

posed to the sweep of the winds. It equal proportions by weight, to each examined were a strong heavy loam. from three acres of oats fed a pair of Soil which had been plowed last horses from the last of August to the summer, but had become settled and first of April, without using a pound hard, and a beaten path slightly cov- of hay-about 100 bushels of the mixered with grass, were both frozen ture spoken of being required during down about five inches. Soil mellowed late in autumn, hard lbs. per day. We can testify, from soil sheltered ten feet off with an ev- personal observation, to the fine ap-

down about four inches.

Under soft pasture grass covering the surface two or three inches in subject.

Of hay is so high, every feeder of stock should give special attention to the subject.

The mixture of bran with thickness, the soil was frozen to a the more concentrated food of ground depth of one and a half inches, vary-ing with the degree of exposure on in itself, but assists digestion by renknolls of flat surface; and in depres- dering the whole more easily acted

A Word for Mules.

We are glad to see that the use of ground was frozen only two inches mules for all kinds of hard, rough deep. About the same depth of frost work, is steadily gaining ground. was found where the soil was covered These animals are not beautiful or with an inch or two of leaves, or with musical, but they are useful and an inch of those, in an exposed situa-tion.

They are fit for work younger than the horse, since they Soil entirely under the prostrate are put to service at three years old, branches of evergreen trees or cover- though they do not reach their maed with short grass, close beside such turity until seven years of age. trees, was frozen down about an inch. Their temper, health, and usefulness foil covered with an inch of fine moss, depend very much on the manner of near dense evergreen screens, was not breaking them. The so-called stubbornness and obstinacy of this ani-These observations will suggest to mal arises chiefly from the abuse he seldom if ever bites or kicks those or tender plants and shrubs. The advantage of mellow surface, acting as is that the club and whip and whipa non-conductor of frost, is shown by handle and boot-toe are applied to the lessened depth in freezing, good him without mercy; and yet he is

THE INSURANCE COMPANY THE OLD ESTABLISHMENT STILL IN OPER. OF NORTH AMERICA.
Office No. 242 Walnut Street, Philadelphia This Company are now prosecuting the hni-ess of Insurance from loss or damage by First in Buildings, Merchandise, Furniture, &c., broughout the State of Pennsylvania, on liber-I terms, for long or short periods; or permanenty of Buildings, by a deposit of Premium.

The prompt payment of claims for losses dur-ng the period of nearly 70 years that the Com-any has been in esistence, entitles them to the outdone of the malls. Successors to Reynolds, Fellows & Co., are now offering and are prepared to furnish on short notice, Wagous Carriages and Seighs, of all descriptions and of the latest and most approved style, and of the best material at the old stand opposite the Union House, in the central part of Alba Borough, Bradford Connty, Pa onidence of the public.

Diercross.—Authur G. Coffin, Samuel W. ones, John A Brown, Charles Taylor, Ambrose Unite, Juo. R. Neff, Richard D. Wood, Wm. Velsh, Wm. E. Bowen, James N. Dickson, S. torris Wain, John Mason, Geo. L. Harrison, rancis R. Cope. Edward H. Trotter, Edward S. clarke, Wm. Cummings. trai part of Alba Borough, Bradford County, Pa.

The public are assured that the reputation the shop has acquired during the last six years under the superintendence of J. H. Fellows, will be more than maintained, as he will superintend the work as heretofore he having long been and laving had much experience as a Carriage and Sleigh Buildet, would assure the public that no pains will be spared by the above firm to make the establishment worthy of their patronage. Thanktul as one of the old firm for the patronage thus far extended, we hope to merit a continuance of the same.

N. B.—We, the undersigned, being practical mechanics, can manufacture and offer to the public at prices that will defy competition.

JAMES H. FELLOWS, D. W. C. CRANDALL, J. G. MERITT.
