Hints About Work.

Plans for the Month .- We shall all accomplish double the work, if it be an abundance of small roots, is great well laid out, and it will be better done .- "What do we want done ?"-"How and when shall we do it?" chopped off in the digging. Some of the best western orchadists prefer Let us make a list of the things we want to do most, and then see how trees one year from the bud or graft, fast we can cancel them off as done.

Hired Labor.-If a farmer does not hire any labor now, let it be his aim fore you are ready to plant; bury tably can, and make arrangements to do so as soon as he can. Hired men injury.

Plant whenever the soil is ready Plant whenever the soil is ready ates, and the worst companions for taking care to first trim mutilated one's children, but this need not be ; roots, and shorten back the top ; plan lookout at once for good, steady, moral men, and sacrifice the profits of the month. farm rather than have a vicious, bad fellow about though his work be never so needed. If we do our part to make the more confectally and the mould, are seen, they are the far make the men comfortable and do too common Wooly Aphis, and for

them good, few will ill reward it.

Buildings.—The winds will find out any insecure weather boards and plied with advantage, even if no inany insecure weather boards and shingles, and play mischief with the exposed hay stacks and with thatched roofs. Have nails and hammer at sects and their eggs, but parasitic hand; stop leaks; see that door and plants and loose bark as well. shutter fastenings are secure, and that board fences, posts of which are loosened by the frost, are not prostrated by the wind.

The plants and loose bark as well.

Girdled Trees must be attended to as soon as the injury is discovered.—
Where the girdling is complete, the tree may often be saved by connect-

to be rat-proof.

Draining.—While the frost is coming out of the ground, and the soil of cover the wounded portion. plowed side hills is liable to slide, look to it that no water finds its way upon

Grafting should not be done too soon. It is time enough when the such spots, or great damage may en- swelling of the buds shows that vegsue. Open surface drains with the etation is active. Continue to secure hoe, pick, or mattock, so that surface | cions. Cut back water may flow off upon sward ground or where it will not wash off the soil. is sound. Such water from cart paths, roads, or plowed fields brings with it, upon the meadows and pastures, a wealth of the meadows and pastures, a wealth of the care indicated under the care i enrichment, not to be lost. The advander Orchard. tage of

Irrigation can hardly be over-estimated. If a brook can be turned to weather is over. In planting new BOOTS AND SHOES, to flow at will (your will) over a vines, cut them back to two or three piece of meadow, even in the crudest buds, provided the nurseryman has and simplest way, by all means try it, not done it before sending them. In and then profit by experience to extend the system, or rather, profit by the is all that should be grown the first expertence of others and use the best year. system.

to injury from washing, and surface draining on them should be kept free.

Tep-dressings of plaster benefits. Tep-dressings of plaster, bonedust, superphosphate, guano, fine low-house pressing the soil firmly around the compost, home-made poudrette and lower end of the cuttings. such things are applied with great advantage at this season.

on winter grain; best on a still day, after a light snow, which may have fallen on frost-cracked and thawing ground.
