GROVER & BAKER'S Family Sewing Machines. HARNESS TRIMMINGS. &C. These Machines are superior to all others for family use, for the following reasons:

They see with two threads dieect from the spools, and require no rewinding.

They are more easily understood and used, and less liable to derangement, than other machines. Towards, April 16, 1868. and less liable to derangement, than other machines.

They are capable of executing perfect, without change of adjustment, a much greater variety of work than other machines.

The stitch made by these machines is much more firm, elastic, and durable, especially upon articles which require to be washed and fromed, than any other stitch.

This stitch, owing to the manner in which the under thread is unwrought, is much the most plump and beautiful in use, and retains this plumpness and beauty, seen upon articles frequently washed and ironed, until they are worn out.

The structure of the seam is such, that, tho' it be cut or broken at intervals of only a few stitches, it will neither open, run, nor ravel, but remains firm and durable.

Unlike other machines, these fasten both ends of the seam by their own operation. GOODS IN THEIR LINE! Consisting in part of BROWN & BLEACHED MUSLINS. AND PRINTS.

Pancy Skirts, Shawls, Hoop Skirts, GLOVES, HOSIERY, YANKEE NOTIONS. All of which can be bought as cheap as the same quality of goods can be bought in Towarda. Their can be done on no other machine, and is a great saving upon all articles stitched or made up with allk. with silk.

These machines, in addition to their superior
merits as instruments for sewing, execute the
most beautiful and permanent embroidery and
ornamental work.

You can got Sewing Machine Needles, and al
articles pertaining to the machine business.
