They are capable of executing perfecty, without change of adjustment, a much greater variety of work than other machines. The stitch made by these machines is much more firm, elistic, and durable, especially upon articles which require to be washed and ironed, than any other stitch. This stitch, owing to the manner in which the under thread is unwrought, is much the most plamp and beautiful in use, and retains this plampness and heauty, even upon articles frequently washed and ironed, until they are worn out. The structure of the seam is such, that, tho' it be cut or broken at intervals of only a iew stitches, it will neither open, run, nor ravel, but remains firm and durable. Unlike other machines, while sik is used upon the right or face side of the seam, cotion may be used upon the other machine, and is great swing upon all articles stitched or made up with silk. ----THE USUAL GREAT IliLL, Secretary. cars for Barclay, on a pic-nic excursion, with Agents wanted in every State and town .-IEA WAREHOUSE high spirits-not alcoholic but natural-Liberal terms will be made with those who MR.
