A WORK FOR ALL TIME.—The English Cyclopedia, brought down to date, conducted by Charles Knight, royal quarto cloth gilt, issued in 27 bound volvmes,-

The scholars of this country pronounce the most co mplete work in Cyclopedia literature. We consider it indispensable for every student, manufacturer, mechanic, man of business generally, and those who regard the education of their children and Banking House, Furniture and the work. It comprises nine volumes on Science and Art, and Mechanics, finely ilustrated, 5 volumes Natural History, elegantly illustrated. 7 volumes on Biography. 5 volumes on History and Geography, 1 volume index. The volumes on Natural His-

tory are complete, the illustrations numerous, finely executed and especially attracive for children.

Most of our young men can afford to pay for one volume a month, and thus secure a valuable library, and that kind of literature which must interest and elevate. The same amount of information in sepa rate works would involve an outly of thous-

ands of dollars. It brings up to the most recent period every accession of knowledge connected with the rapid progress in Geographical and Scientific Discovery, and embracing all the most desirable and important facts in regard to History and Biotempe rance of this State, believing the tem- grap hy, and tracing in due order the changpe rance reform a legitimate branch of Chris- es of public affairs, either commercial, legal or social.
