THE BASE BURNING AMERICAN COOKng Stove -- More Improvements and Two WORK PATENTS -After a long series of experiments, we have added the Base Burning principle to this already world-renowned Stove, by means of hot air chambers in front and rear of the of the fire-box, and a regulator at the pipe collar. With this improvement we accomplish the following re-

1st. A coal fire can be kept all winter by replenishing the fire twice every twenty-four 2d. A continuous fire can be kept through the winter with the consumption of less than 20 lbs. of coal in 24 hours, and the

oven kept in baking order a large portion of the time 3d. The coal will be thoroughly consumed without the usual amount of cinders and clinkers, and the annoyance of dump-

ing the grate every morning to make a fresh fire, avoided. 4th. For a wood fire, with two moderate sized sticks of dry wood, a fire can be kent from 15 to 18 hours without any trouble. This will be found the greatest improvement yet made in Cooking Stoves. It has

all the advantages of a self-feeder with much greater economy of fuel, and without its inconveniences. It is fully secured by letters · SHEAR, PACKARD & Co. 17 and 19 Green St.,
