Ward House Shop THE FOLSOM SEWING MA-CHINE! AP Price, \$40,00.—28
The time has come when almost every family can afford a Sewing Machine. Inselecting one, the most important points to be considered are: first, to get a substantial, well-made machine, one composed of as few parts as possible, that it may not need constant adjusting. One that is noiseless and easy to operate, is also desirable. Finally, to get one as described at a

The FOLSOM FAMILY SEWING MACHINE, embraces these important points.

It is constructed on the principle of combining the greatest strength with the least friction, and the smallest amount of machinery consistant with the proper execution of the work; producing a machine perfectly simple, easily managed, durable, and not liable to get out of repair.

It makes a strong and perfectly elastic seam which will not rip or rarel by sear, and cannot be broken by stretching, washing or ironing; neither can it by builted or worked spart, even when the stitches arrepeatedly cut or broken, and yet it can be ripped when necessary without tedious waste of time, or injury to the finest goods.

At will seew with case and rapidity every rariety of collon, rooten, timen and silk goods, from the finest to the coarsest, and of any required thickness using any kind of good thread.

The Machine is fitted with a Patent Non-Reversible Attachment, which renders it impossible to run in the wrong direction. This will commend itself all, especially to beginners.

For Stitching, Hemming, Felling, Binding, Cording, Braiding, Seaming, Embroidering, Tucking, Outliting and Gathering these Weitnes have no su-
