seeking has one hundred and sixty receacres of fair wheat. The ording youstom of sowing wheat is to ough the ground (a very shallow ough the ground (a very shallow ough at that,) sow the seed and wrow it beneath the surface. Stock go pursued a different plan. He st deep or subsoil ploughed his ound; in the fall he reploughed is rowed in the seed; in the spring e whole area was heavily rolled are result is a fair crop while ground ended in the ordinary manner produces nothing. Cooking Toaktors.—This delicion getable is now in its prime—and table should be willout it. It is get the should be willout it. It is easily and palatable if properly produced or cooked. One way of stewing tomatoes is to sook very ripe ones; skin and slice jecting any hard parts. Put in an with sair, butter, and pepper an oak very slightly, not more than te intices. Another way is to stew the matoes until thoroughly soft, rue on through a sieve, and then cooked on down to a desired thickness aften salt and pepper are the usual asoning. Those fond of the flavor onjons will find the addition of oupped onions while cooking, to a stem end; fail this with a mixture providered crackers or bread units, butter, salt or other season g, set on a pun and bake until done in their shape. Tomatoes may be out a pun and bake until done in the shape in them and puniter, so the cut side down, upon griding over the fire. When the rates is some the fire.
