

Spiritual.
Breeding Dairy Cows.
In view of the rapidly extending importance of the dairy interests in New York State, through the establishment of cheese factories and creameries, it would be well for farmers to study the matter of improving the milk-yielding qualities of their cows.
A good foundation already exists in the native breed of cattle, a hardy race, well adapted to stand tolerably rough usage in winter, and generally fair milkers. We believe that, by a careful selection, and the use of good bulls from a milking family of Short-horns, a race of cattle might be established that would combine milking with feeding properties. After one or two crosses of Short-horn, Ayrshire blood might be infused through a single cross, in order to give a larger milk secretion. A very mistaken notion prevails that small cows and small consumers of grass are most profitable for the dairy. Such is not the case. A good dairy cow must have large digestive powers, as the more food she can consume during the grass season, the greater the amount of milk she can manufacture from that food, other things being equal. Hence, large-framed cows, with capacious stomachs, will usually be found large yielders of milk.
We believe a great mistake will be made if dairymen should be led away by the prevailing fashion to favor the introduction of Jersey blood into their herds. It would result in introducing the size and feeding qualities, and enfeebling the constitution, without any corresponding gain in the way of additional milking value. True we might have richer milk for butter-making but not for cheese. The milk of the Ayrshire cows through somewhat lacking in richness for butter-making, is full of casein, and therefore valuable to the cheese-maker. The finest and best dairy cows we ever saw were obtained by a cross of Ayrshire on first-class native cows followed by a cross of Short-horn, the result being cows having half Short-horn to a quarter each of Ayrshire and native. They were splendid milkers, and always full of flesh on moderate feeding in winter.
Rural Home.

Cheese Making.
The first address delivered before the New York Dairyman's Convention was by T. D. Curtis, Esq., of the Utica Herald on the standard of cheese making. The address was short and pithy, and went to show that as yet there was no standard of standing. Mr. Curtis reminded his hearers that cheese for home consumption should be made with a liberal use of rennet, while cheese for the foreign markets should be made with less rennet and more heat, so as to develop an also, more quantity needed for the foreign markets. Mr. Polson, Esq., cheese dealer of New York, read a paper which went to show that cheese and butter dealers were an amazingly honest and upright class of merchants and he begged his agricultural hearers not to entertain even for one moment the idea of selling their produce direct through their own agents, but to patronize middle-men, and especially cheese dealers. Gen. Pratt spoke briefly on the various breeds of home cattle as milkers, and recommended the crossing of the Ayrshire and Canal Island cattle to secure good dairy cows. Dr. Cordova, speaking of arnold, warned the audience against the use of the manufactured article, as it frequently contained arsenic and red lead, both highly poisonous in their effect. Hon. Harris Lewis on "Corn as Winter Keep," showed clearly that corn was better than straw, but that was all; whereas the various breeds of home cattle, being the natural food of the animal. It seems to be the generally received opinion that well-cured grasses cut in flower were the best possible dry winter fodder for cows.
THE CHEAPEST GRAIN FOR CHICKENS.
Now that chickens raised the past season have attained the "hungry age," and the frost has somewhat diminished the quantity of grain that will be disposed of by a large flock of young fowls, what is the cheapest food (and the best, all things considered), that can be bought? The reply is, Indian corn. Give cooked and white corn, ground fine, and ground coarse, for the sake of change. It is the cheapest thing that can be bought, generally speaking, the amount of nutriment obtained in it considered. But to give nothing but corn would be a mistake. It should predominate in economy's sake, but oats, buckwheat, vetch screenings, boiled potatoes, scraps from the table, and as many other things as possible, should be added to the bill of fare.—*Dutchess Farmer.*

SHEPHERDING STOCK.
An experiment made in England shows that one hundred sheep fed under shelter on twenty pounds of Swedish turnips each per day, at the end of four weeks had gained three pounds each more than another hundred which were fed twenty pounds of the same kind of turnips each, but in the open air or field. Five sheep were fed in the open air on Swedish turnips at a temperature being forty-nine degrees; they consumed ninety pounds of food per day. At the end of ten days they weighed two pounds less than when at first exposed. Five other sheep were then placed in a shed, the temperature being forty-nine degrees; at first they consumed eighty-two pounds per day, then seventy-two pounds, and at the end of the time they had gained twenty-three pounds. This is sufficient proof of the advantage of sheltering of stock in winter.

FARMERS' TROUBLE.
Farmer's wife in the *Lansing Republican* says: "Farmers, as a class, are more easily discouraged than men in mercantile pursuits. For instance, when wool is in brisk demand, people will rush into the business of wool-growing; this being a branch that is quickly available. There will soon be a decline in prices from the abundance of the supply. Then, though the farmer may have realized great profits for two or three years, he is not contented with the corresponding profit without the assurance that which begins to be accumulated, and with a recklessness like that which possessed him in the beginning, he sacrifices his flock to the knifs for the mere return of the price of pellets."

WHAT IS bigger than the biggest nutmeg? A nutmeg grater.
WHAT IS a woman like a parrot? When she is nervous (to her cost).

Manufacturers.
FOUNDRY & MACHINE SHOP.
The undersigned has purchased the Foundry and Machine Shop late of Geo. W. Smith, and has taken possession of the same, and is prepared to do all kinds of work, pertaining to that business, with promptness and dispatch.
MILL GEARINGS,
CIRCULAR SAW MILLS,
MAN DRILLS,
And all kinds of
MILL IRONS
MADE TO ORDER.
ENGINES REPAIRED,
And all work warranted to give satisfaction.
SHINGLE MACHINES
Of the latest and most improved kind manufactured and kept on hand ready for use.
PLOUGHS,
SIDE-HILL IRON AND WOODEN REAPS
Of all kinds.
CULTIVATORS, CORN PLOUGHS,
AND
PLOUGH POINTS
Of all kinds, and the latest improvements kept constantly on hand.
CHURN POWERS,
LARGE AND SMALL SIZE.
STOVE CASTINGS
CELLAR GRATES.
SLED AND SLEIGH SHOES,
LARGE IRON KETTLES
Of all kinds of castings furnished to March 30, 1875. **MEANS & ROCKWELL.**
On Pine, between Main and Second, Streets, back of G. F. Mason & Co.'s Bank.
TOWANDA, PENNA.
HENRY STULEN & CO.,
Respectfully announce to their friends and patrons, that they have built
NEW BRICK CARRIAGE FACTORY,
where they will constantly keep on hand a full assortment of
FAMILY CARRIAGES,
TOP AND OPEN BUGGIES,
PLATFORM WAGONS,
TROTTERS, SULKERS, AND SKELETONS.
Made of the best material and finished in the best style. His long experience in city Carriage Factories gives them a decided advantage over others in the
Finish, Style and Durability
of his Wagons. All they make is an
INSPECTION OF HIS WORK
previous to purchasing elsewhere.
ALL WORK WARRANTED TO GIVE PERFECT SATISFACTION.
Thankful for the liberal patronage formerly extended to him, and respectfully asks a continuance of the same.
REPAIRING PROMPTLY ATTENDED TO
at reduced prices.
HENRY STULEN,
of G. F. CLARK.
TOWANDA, May 24, 1875.—17
THE OLD MAIN STREET
Carriage Factory.
JAMES BRYANT
Still continues the manufacture of
CARRIAGES AND WAGONS,
of every description, at the old stand of G. F. CLARK,
MAIN STREET, TOWANDA, PA.
His work is all of the
LATEST STYLE AND FINISH.
In Light Work.
COMPOSITION BOXES
and
PLATFORM SPRING WAGONS
AND
LUMBER WAGONS
Kept constantly on hand.
The best Eastern stock to be used in the manufacture of these. Spokes are all riveted—not staved.
ALL WORK SOLD
WARRANTED EQUAL TO ANY
As to finish, and as to durability,
SUPERIOR TO ANY IN THIS SECTION.
All Work Warranted.
4th 1875. **JAMES BRYANT.**
BLOOD & CO.
Still continues to manufacture their celebrated
HORSE POWERS & CLEANERS,
and will sell a better machine, for less money, than can be elsewhere in the world. We claim for our machines that they will do as much, or more, than any other, and are more durable. Come personally superintend our work and see that it is well done. We will send
