

Agricultural Department.

Additional Garden Hints.

This is the time, if not already done, to sow a plant the general garden crops of the season. No time should be lost doing so, as it is supposed that by this period the warm growing weather has fairly set in and that we are not likely to be visited by severe frosts. Beans and bush beans can be planted early. York cabbages set out; horn cactus, salicy, cucumber, parsnips, melons, sugar corn, cabbage lettuce, to be followed at the end of the month with India or curled, which stands the summer heats; tomatoes may be transplanted but should be protected against cold nights, as well as by day from the midday sun until they become established. Celery should be sowed not later than this week.

Keeping down the weeds and stirring the soil are indispensable to any crop in the garden or field. Especially should the weeds be constantly removed from the strawberry beds. Young asparagus beds should never be sowed, as it is better to keep them in the garden in the raspberry beds, if you wish an additional supply of plants, as the young shoots are now beginning to show themselves. If the beds are sowed, they should be done with care that the young plant may not be injured.

The third crop of tubs could be planted at the end of this week or the beginning of next. The seed should be put in dry if the weather is moist, and sowed a few hours if the soil is dry.

Onions should be planted before the middle of the month. The seed is very liable to rot in moist weather before it has sown.

The new sown seeds should now be sown. The soil should be made as fine and mellow as possible. The seed should be raked under and the bed finely pressed with the back of the spade. Mark each variety with a small stake, which can be moved by splitting at the top and sticking in the paper which had contained the seed.

Laws have had of course their first mowing by this time, and the mowing has been repeated every ten days, if possible, is aimed at. Of course the lawn mowers in use. It is far preferable to the scythe, it does its work better and quicker and the price of this is getting down to a reasonable price.

Given Sown for Fodder.

We have given frequent directions for raising corn fodder, always sowing it in drills, furrows, the latter being the best, allowing more breadth for the rows. An inferior sowing, however, should be sown in the middle of May, and the middle of July. Those who used it for early sowing may see it as well as the weather and soil will allow, early in May, and if small early crops are sown, it will give a heavy crop of fine fodder on good ground by the time of common wheat harvest. It is intended only for animal feeding or winter fodder, it is not so good as the corn raised in the middle of June, and a larger variety of corn will do better. But never sow less than two and a half bushels of seed to the acre.

If the ground is poor, the crop will be increased by manuring. Corn manure may be used to good advantage on corn fodder. Plow two horse furrows about three feet apart, fill them half full of manure by throwing with a fork from the top of the furrows, then strew the corn along from a half-bushel basket, on the left arm, at the rate of about three bushels per acre, and then harrow the whole lengthwise with the furrows. The harrow will break up the manure and mix it with the soil, and the soil will be mixed with both, it may be scattered some, but more is better grown on a wide than on a narrow furrow, and if a few grains are left on the surface, it will be sown by a good crop.

If the water happens to have a smothering heavy, he may harrow the whole surface before the corn is up, and two or three times afterwards, and this operation, if done with the shading of the row, will leave the surface clean and smooth as a floor, after the crop is harvested.

It should not be overlooked by those not familiar with this method of raising fodder, that the corn may be sown in such a way that it may be obtained from land as good as meadow; that cattle will eat the whole stalk, and that the stalks will be used to feed and spread with the manure the first year. Therefore begin mechanically.

OUT WITH IT.—How many kind thoughts the unborn how many kind words are uttered and how many hearts hunger for a word of sympathy and praise, and would leap for gladness, if they knew the kindness that others feel toward them; but while they plod on in doubt and darkness, we stifle kindly aspirations, and the cheering thought and sympathizing word dies within our hearts and makes no sign. Why need we be so reticent concerning things that are good? Most people are out spoken enough when angry or discontented they find fault boldly, with a relish; but words of praise are, with them, exceedingly few.

It is true that that flatterer his neighbor, spreads a net for his feet. We are to avoid flattery, and fulsome praise. But yet, when a glow of honest admiration or approval rises within our hearts, why should we not give it, and let it gladden others, as it cheers us? How happy families might be, if every thought of thankfulness and sympathy and love, found voice, and manifested itself in speech and action from day to day. How many a lesser, more dreary and unenjoyable life might be made joyful with light and sunshine, if it would not only relax with fidelity, and reprove with love, but would also show in words and deeds, our sense of gratitude and approval, whenever we can honestly do so.

A RECAL POT.—Indicated a sonnet to a poet, entitled "I have a dream." The compiler has written this and set it up in printer's Latin. It is a very good one.

SUSQUEHANNA COLLEGIATE INSTITUTE.

TOWANDA, BEDFORD COUNTY, PA.

This institution will commence its Seventeenth Session on Monday, August 27, 1912.

The courses of study are English, Normal, Commercial, Agricultural, Scientific and Classical, in all of which the instruction is modern and thorough.

The Principal will be assisted in all the various departments by highly educated, experienced teachers, having been recently employed by the State of Pennsylvania, and by the University of Pennsylvania, and other institutions of learning.

The Medical Department will be under the charge of Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Normal Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Commercial Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Agricultural Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Scientific Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Classical Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the English Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Normal Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Commercial Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Agricultural Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Scientific Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Classical Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the English Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Normal Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Commercial Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Agricultural Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Scientific Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the Classical Department will be Professor H. H. JOHNSON, M.D., who has graduated from the University of Pennsylvania, and who has held appointments in the University of Pennsylvania, and other institutions of learning.

The Principal of the English Department will be Professor H. H. JOHNSON, M.D
