INTERESTING LETTER. [The following letter was written by a busi-

ess man, on his way to South America, to his pother in this county]. 👙 PA (AMA, Dec. 14, 1871. DEAR MOTHER: If you could look in upon me now as I sit writing to you in my room in the "Grand Ho-

tel," I know you would smile." The room is large and airy, the walls high, the furniture of French manufacture, and the floor bare. They don't use carpets in the South or Central America. Should I lay aside my shirt and pants I would not have enough clothes on to wad a gun with, and my friend Baker, who s swinging in the hammock at the other end of the room, smoking his Havana, is clad with equal simplicity and in like costume, only he isn't buttoned up : I am. Not that it is so very hot—not over 80 degs., I think—but then the air is so soft that the query is certain to arise in one's mind, "What's the use of clothing?" In plain sight, just across the narrow street, which is not over twenty feet wide, directly opposite my balcony, a pretty Spanish girl is lounging in her hammock, gently swinging as she puffs the blue smoke

Acting with men in the capacity of grand, jurors, they secured the pre-sentation of indictments that could not otherwise have been obtained; serving as petit jurors, they paid strict attention to testimony and argument, profoundly impressed with the new and important responsibilities that had been thrust upon them. The circumstances of the first case

tried by a jury impanelled regardless of sex were as follows: A young blade, who had imbibed the then prevalent notion that he could not hope to attain to the full stature of manhood without killing somebody, participated unnecessarily in a barroom brawl, and accomplished the object of his ambition. Having been indicted for murder, he sought to show a justifiable homicide, claiming that the act was done in self-defence. A jury, composed of equal parts male and female, was impanelled to try the case, and, after three days and nights of deliberation, at last agreed upon a verdict of manslaughter, and the culprit is now in the penitentiary meditating upon the swiftness and certainty of female justice. The male urors were in favor of acquital, but the ladies, believing that human life ought not to be held by any such unsafe and flimsy tenure, voted during three days and nights for conviction, until at last a verdict of manslaugher was agreed upon.

The Court unlike some of its Eastern compeers would not permit jurors to separate until after their final agreement and discharge. At nightall, after the days deliberation, adjacent rooms, communicating by a door, of which the sheriff held the key, were provided, and the women. attended by female constables, occupied one apartment, while the men composed themselves in the other. When morning dawned, the two sexes met for deliberation, and so on from day to day until a final verdict was reached. It is alleged that the women passed a considerable portion of the night season in prayerful contemplation of the grave responsibilities resting upon them, while the men indulged in a cheerful game of draw

During a period of more than two years women have served as jurors in civil and criminal cases at nearly every term of the various courts of record; and their influence, thus practically manfested on behalf of law and order, has been noticeably with reference to criminal trials.
