FRIEND ALVORD: In accord moe with my promise, I will write you a brief letter from this place, commencing where I left off in my last

To one passing through Illinois, over the Chicago, Burlington & Quincy Bailroad, the tate presents a very rich and beautiful appearnoe. It is "whitewashed up," in an agricultu ral point of view, to the highest possible extent. Farms are skillfully cultivated, and many growing large and thrifty shade trees; houses and out-buildings newly built and neatly painted; fruit trees of all kinds large and bearing; and ences and gates more like Lancaster, York and Cumberland counties, Penna., than a new State barely 20 years old. I should judge from appearance, that there was timber enough, insluding what has been planted and what grows naturally along the streams and upon waste lands, to supply the wants of the State. Tou can see from the cars, on either side, large quantities of young timber growing. Water is sot so plentiful in that State as in Kanssa Farms that do not border on streams, are supplied with wells and wind-wheels, or mills, a they are called here, to pump water into tanks

for stock in fields which are destitute of water I saw but very little waste land until we approached the Mississippi river, near Burlingon, which was under water — a swampy, wet place, covered with tall, wild grass and woods a good harbor for water snakes and lizards and a fair prospect or "show" for fever and ague and other diseases incident to this Western country. This waste land along the Missssippi, I am told, is quite extensive.

We reached Burlington, Iowa, about 7 o'clock . M., and crossed the bridge, which is a fine structure, into the city. Burlington is a large city, lying on the west side of the river, and extending back on a high bluff. It looks beautifully as you are approaching it on the opposite give a short discription of the town and the fa- side of the river. We remained here but a short time, and then were off for a long ride scross the State of Iowa. We passed over the State mostly in the night, and consequently can give no description of the country or the condition of the crops, as it rained all night and was very

> Our time to reach St. Joseph was 10 o'clock . M., but in consequence of the heavy rains, the railroad track was out of order and detained us on the road until about 1 o'clock P. M. which brought us to the muddy waters of the issouri. The river was bank-full, and many fields of corn and wheat were under water Here our dining-car was put on, and our breakfast ready at 1 o'clock P. M. Our appetites were good and our breakfast excellent. There is no onger a doubt as to sleeping; dining and palace cars being run successfully on our railroads. I can but speak in the highest terms of praise of the beautiful sleeping and dining cars, and also

of the gentlemanly conduct of the employes | First National Bank. of the Chicago & Burlington Railroad. We soon left this place for Kansas City, following down the east bank of the river through a very heavily timbered country. There was not much improvement along the road-only a few little log huts and patches of corn. The first city we can see in Kansas is Leavenworth. looming up on a very high bluff on the opposit side of the river. We stopped at East Leaven worth at the ferry to let off some passengers and then went on to Kansas City. Across from making in all \$293.90. Of the above sum a lady this city is Wyandotte, in the State of Kansas. These names are familiar to us all, as being the

scenes of some of the most shameful outrages ever recorded in history—those committed by the border-ruffians of Missouri. Kansas City is much larger than I had posed, some claiming for it a population of 40, 000, but I think 30,0000 or 35,000 would be posrer the number. These Kansas people all like to make their cities the largest and farming lands the best of any section in the West.

This is a great railroad centre—eight or nine railroads centreing here, and I am told 36 passenger trains arrive and depart daily. We remained here until 7 o'clock P. M., and then were off for Ottawa. The distance I have forgotten, as well as the hour when we arrived. but it was quite late. In the morning we took

breakfast had a very fine meal-hired a livery andswent back about eight miles to visit a Mr PIERCE, formerly of Dutchess Co., N. Y. Soon after leaving the city we reached the broad unfenced prairie. Here was the first prairie of any account I ever saw. It was a beautiful sight and I can not describe it better than to use the words of BRYANT:

Over which a Magician's wand has atretch'd,
Transforming it instantly and holding it
In boudage evermore." The prairies were quite rolling in the direc tion we traveled, and interspersed with timber to and Albert Long, Mr. Long stumbled along the streams. The prairies were covered and Mr. Gonz fell upon him, and a wheel of with a tall grass, over which were scattered he steamer passed over them. a small town, containing 2,000 or 3,000 population, but is nevertheless called a city. It is a good country surrounding it, and the town is building up rapidly. We reached Lawrence about noon on Saturday. It is truly a splendid Assertion met'in the Presbyterian church at country between Ottawa and Lawrence. It is well cultivated, and is planted with fruit trees, vineyards and nurseries in many places along the railroad. Lawrence is the finest looking city I have seen in Kansas. Massachusetts street looks more like a street in New York city than one in a Western city less than twelve years old. Eight years ago I, think, QUANTRELL sacked and burned the city, and murdered about 200 men, women and children. This was the home of Jim Lane and Gov. SHARSON Shannon still lives here, as do Mrs. Lanz and family. We visited the well where JIM LANK shot JENEERS, and also the State University which is a fine building on a high point o ground south-east of the city, near the ruins of an old fort. I believe they call this Mount Oread. We spont two days here looking about the country and city, and came away well pleased. They claim 12,000 population. They have half a million dollars invested in Universities Colleges and school-houses. Between this city

and Topoka I saw some of the hoaviest crops of wheat and the largest fields of corn I ever saw. HALL'S VEGETABLE SICILIAN HAIR RENEWER. Every year increases the popularity of this valua We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfected preparation for restoring Gray or Faded Hair to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all cruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the tronger. In baldness it restores the capillary gland their normal vigor, and will create a new growth al Hair Dressing over used, as it requires fower as plications, and gives the hair a splendid glossy apearance.
