First among its advantages is the great scope of its expression, being constructed to play the softest music, and, when desired, to increase its power. Can either gradually or suddenly produce more volume of tone than any other organ of its class. This is accomplished by our new Patent Double Forte Speell, so arranged that the sound is thrown out by a direct passage through the case.

We desire that every family throughout this country, as well as Egrope, may test its wonderful musical producing qualities. Orders have been received at such rapid rates that we have been compelled to enlarge the manufactory, and put on a still stiend if you think proper.
