THE RESULT.

A DEMOCRATIC MAJORITY IN THE NEXT HOUSE.

The elections held on Tuesday last resulted largely in favor of the Democrats.

In the general democratization which seems to have come over the people, the old Keystone has maintained its integrity and elected a Republican State ticket and a Republican Legislature, which ensures us another U. S. Senator for six years.

We do not propose at this time to discuss the causes which have led to the defeat of the party in so many States and the loss of the lower House of Congress. We only hope that those calling themselves Republicans who have aided in the work of defeating the best party ever organized in this country, will live-to-see and repent their folly.

New York has gone Democratic by 10,000 or 50,000. Massachusetts elects a Democratic State ticket, and defeats Brooks, Burleigh, and others.

New Jersey also goes Democratic. Missouri elects Democratic, as usual. Pennsylvania, Alabama, Illinois, Kansas, Michigan, Minnesota and Nevada stand by their principles and elect the Republican ticket.

THE COUNTY.

In another column we give the official result by townships of the election on Tuesday last. By referring to it the reader will see that while our State ticket receives nearly thirteen hundred majority, Mr. Lutz and one of our candidates for the Legislature are defeated; and Mr. Scott, candidate for the Senate, has a majority so small that the majority in Wyoming for his opponent is so large as to defeat him by less than one hundred.

The opposition to Lutz was bitter on account of his antagonism to corporations, and the Republican voters in the rural districts to the number of nearly two thousand remained at home.

It is idle now to speculate as to the causes of the defeat. The die is cast, and we, in common with the Republican party, must submit to the apparent voice of the people. "If the people can stand it we can."

If Mr. POWELL and Mr. ROCKWELL realize the expectations of the Republicans who have elected them, we shall not be slow to give them credit.

On the other hand, if they in their official acts shall be found with the most radical Democrats we shall keep our readers posted.

THE SENATORIAL VOTE.

The following are the majorities in this Senatorial District:

Rockwell, 102; Powell, 102; Lutz, 102; Scott, 102.

CONGRESSIONAL VOTE.

The following is the vote by counties for Congressmen:

Rockwell, 102; Powell, 102; Lutz, 102; Scott, 102.

PROFITS OF SHEEP FARMING IN NEBRASKA.

The farmer who settles on the fertile prairie of Nebraska, should make "live stock" a watch-word.

A correspondent in the State sends us the following encouraging showing made by Mr. Myers, of Gray, a sheep farmer, who has been at it for four years in Nebraska.

Gray County is in the southern portion of the State; and a branch of the Burlington & Missouri River Railroad runs through it. The land is good and the natural grasses sweet and nutritious, but it is no more than a fair average of Nebraska, South of the Platte.

Mr. Myers thus "figures" the problem of sheep farming in Nebraska, with a flock of 1,000 heads—100 tons of hay, costing \$300 per ton for putting up, \$800; 500 bushels of wheat, \$100; shepherding for eight months, \$150; wages of one man for four months, \$100; do one month, \$30; washing, shearing, and packing wool, \$200; salt, \$35; shepherding for winter, \$50; losses at a good rate, \$70; total, \$1,035. By 4,000 lbs. of wool, @ 40c. per lb., \$1,600; 400 lambs, @ \$2.50, \$1,000; total, \$2,800.

Mr. Myers considers his allowance for expenses very liberal. He charges hay at too high a figure and the percentage of loss is not generally so large as stated, as sheep are subject to no disease whatever, on the prairie of Nebraska. One man also could take charge of a flock of a thousand during the summer months, and in the winter, one boy could tend them, as it is best to let the sheep run to the hay all the time, and the oats are to be fed in the shed. Mr. Myers further claims that if a farmer will do most of his work himself, hiring only what is necessary—sheep, hay, shearing, &c.—the sheep will pay him \$3.00 per head, as against \$2.00 when help is hired liberally. Mr. Myers estimates his sheep to be worth \$2.50 each. On 1,000 sheep, the investment would be \$1,500; and, as the net profit above amounts to \$1,765, the return on the investment is over 50 per cent.

THE LINCOLN MOVEMENT.

In the excitement of the late political campaign we were compelled to omit the account of the dedication of the LINCOLN Monument, and as anything pertaining to the great and good man is always read with interest, we append the following:

Thursday, Oct. 15, was a great day at Springfield, Illinois, it being the occasion of the dedication of the monument erected over the remains of President Lincoln. The Society of the Army of the Tennessee held a grand meeting there, and invited to participate in these ceremonies, and adjourned after appointing Des Moines, Iowa, as its place for the next annual meeting.

The procession began to form at 11 A. M. Gov. Beveridge, acting as Grand Marshal, President Grant, with Secretary Belknap, occupied a carriage at the head of the procession, preceded by a military band from Newport Barracks, and escorted by the Governor's Guard. The procession, headed by the band, moved on to the monument, where the remains of President Lincoln were deposited. THE QUESTION OF WAGES.

Last week we visited one of the principal manufacturing towns in the interior of Pennsylvania, and were struck by the fact that the ironworkers of the place are employed more constantly than during the spring and summer months, but at wages very greatly reduced below those which were paid them a year ago.

Most of these ironworkers are working on a sliding scale, based upon the price of iron—the most equitable method of adjusting wages ever devised, and one which, if generally adopted, would almost entirely remove the cause of strikes.

When the price of iron is high, the ironworkers of this Pennsylvania town are paid high wages; when the price of iron declines, their wages are correspondingly reduced. Just now the price of iron is low, and they are receiving all that their employers can afford to pay them. We made enquiry concerning the wages now paid to the various departments of the mine, including the coal and iron mines, and found that the average compensation of several thousand men is considerably less than two dollars a day, or an annual making therefrom less than six hundred dollars a year. A few receive much higher wages, but many receive far lower. The average number of hours employed is ten. During the past year the reduction in wages has averaged about one-third.

We had the curiosity to inquire into some of the effects of the reduction of wages. We found that the men were satisfied that their employment was doing their best for them as far as possible, and were therefore in a measure contented with all expressed a desire to see "better times." Low wages could be endured if better could not be had, but they were not desirable. One said to us: "It is a hard work, sir, to make both ends meet, but I must do so as they once did; a carpenter told me that he had never been so poor as he is now; a grocer complained that many of his customers were running in debt to him, and that he was not getting any business;
