I have the honor to submit the fol owing brief report of affairs as they occurred here in the organization of the State Legislature of Jan. 4 1875. I was not in command of this mil itary department until nine o'clock a night on the 4th inst., but I fully in dorse and am willing to be held responsible for the acts of the military as conservators of the public peace npon that day.

During the few days in which was in the city prior to the 4th of January, the General topic of conversation was the scenes of bloodshed but were liable to occur that day, and I repeatedly heard threats of assassinating the Governor and regress expressed that be was not kill d on the 14th of September last; ilso threats of assassination of Re-

publican members of the House in der to secure the election of a lemocratic Speaker. I also know of kidnapping by the banditti of Mr. Cousin, one of the members elect of scenes of bloodshed would have enhe legislature.

In order to preserve peace and to make the State House safe for the peacaable assembling of the Legisature, Gen. Emory, upon requisition of the Governor stationed troops in the vicinity of the building. Ow ing to these precautions the Legisla ture assembled in the State House without any disturbance of the peace. At 12 o'clock William Vegers, Clerk f the last House of Representatives, proceeded to call the roll, as accord ing to law he was empowered to do One hundred and two legally resum d members answered to their names Of this number fifty two were Re-

Notwithstanding the suddeness of ceive quite as much credit from the this movement, the leading Republican members had not failed to pro test again and again against this rev olutionary action of the minority, but all to no purpose; and many of the Republicans rose and left the House in a body, together with the clerk who carried with him the original

The excitement was very great, and the acting Speak er directed the Sergant-at-Arms to prevent the egress or the ingress of members or others, and several ex sion. The papers do not report him citing scuffles, in which knives and as making a speech, but we have no pistols were drawn, took place, and for a few moments it seemed as if bloodshed would ensue. We think there is not a man in the county, who has any idea of the amount of labor to be performed by the Supt., who will say that the salary is as much as it should be. We compare their opinion of what is a State of New York has now gone nails, sewing machines, and machine proper compensation with our neighbors. We believe the people of this county want to pay their public ser vants just as much as they think their services are worth to them, and ion at the same time burden its texpayers as little as possible. And we

think the reason for fixing the salary so low as it is, is owing to the facthat many of the Directors do not understand how the Supt. is paid. For the benefit of those who do not inderstand, I will try and explain. The State Legislature makes yeary appropriations for common school purposes, and this amount is disributed among the different school districts in proportion to the number of taxables, and the salary of the County Supt. is to be deducted from this amount; but State Supt. Wick

ersham tells us in the explanation in the school law that this is not done. but that County Superintendents' salaries are first deducted from the whole amount of the appropriation, and the remainder is then distributed to the different counties. So you Superintendents are borne by all the able to the dignity of our commoncounties of the State, proportionally Now let us see how much difference it would make in our taxes if the law were strictly carried out (but Prof. Wickersham says it is not), and then also the way it is done, if we would Line has declared \$4 per share, double the County Superintendent's and the Citizens \$11 per share.
