THE OUTLOOK.
We are unable to discern in present political indications, any thing of a discouraging character to the advocates of Republican principles. On the contrary, the temporary success of the Democratic party is already turning to "Dead Sea fruits." The course of the majority in the last Congress was characterized by more than usual unanimity, and a better feeling prevails all through our ranks. The termination of these bitter personal feuds, which always grow up among leaders when a party is long in power, has given the rank and file new courage, and the election in the coming autumn will disclose the fact that the party which saved the country still claims the sympathy and support of the great masses of the loyal people. In our own State many honest Republicans last fall voted with the Democrats, hoping thereby to secure certain reforms, which they believed could be accomplished in no other way; but the course of the Democratic House of Representatives last winter has satisfied them that their confidence was sadly misplaced, and they now see clearly what has always been apparent to close observers: that no reform was ever contemplated by the Democratic leaders; and whatever may be the future political action of dissatisfied Republicans, they will not again aid in placing in power the party which always proves false to its professions—the party which attempted the overthrow of the Government and the establishment of a confederacy founded on oppression and wrong.
The sign of all points to a very sharp defining of party lines in the coming campaign. While Gov. HARRISST will be the Republican standard-bearer, the opposition will select an "old liner." Thus the contest will be narrowed down to the same issues upon which the campaign of 1860 was fought.
THE RIOTOUS MEN.
The riotous conduct of the idle miners in the anthracite region having become unendurable, and the Sheriffs having declared their inability to preserve peace, Gov. HARRISST has issued a proclamation authorizing these officers to call the militia into requisition. With his usual wisdom and prudence, His Excellency wisely delayed action until every opportunity was given the men to desist from their unlawful designs, or the local authorities to enforce the law. The men may as well understand now that there will be no trifling, and unless they disperse at once they will reap the direful consequences which must result from continuance in their evil course. In a conflict between the mob and military there can be but one issue. We trust the deluded fellows may be wise in season.
IN CALLING attention to our new dress last week, we inadvertently omitted to mention the fact that our outfit was purchased from the celebrated foundry of COLLINS & McLESTER, Philadelphia. Their type speak for themselves, but we desire to say, for the benefit of the craft, that the firm is one of the most accommodating, obliging and satisfactory houses to deal with, it has ever been our good fortune to come in contact with. Publishers desiring anything in the line of fixtures will certainly find it to their interest to visit COLLINS & McLESTER's establishment.
THERE is a grave doubt about that California philanthropist, JAMES LICK. The question is if JAMES LICK, sick, is the same man well. He says his natural affections to poor relatives and his returning health has led him to take back the disposition of his vast possessions into his own hands. Although he professes he will carry out his original intentions, as first devised, he cannot remove a doubt—a suspicion. The philanthropist LICK has tumbled from his elevated height, and people have ceased to admire him as they did.
MR. CHILDERS, of England, who recently made a tour through this country, in the course of an address at Peabody, last week, spoke in high eulogy of America. The United States, he thought, was probably the most prosperous country in the world. He estimated that in fifty years it would contain 15,000,000 inhabitants, while the progress of England was necessarily limited. He forcibly presented the reasons why England should seek the friendship and alliance of the United States.
CONGRESSMAN FRYE, in his speech at Hartford, confirmed the statement that General SHERIDAN's "banditry" dispatch was for immediate effect in New Orleans, where it was published as soon as written, with just such beneficial results as had been anticipated. He also said that but for the Republican success in New Hampshire the attempt to secure a compromise and settlement of the difficulties in Louisiana would have failed.
IT is a disgrace to journalism when men of the known and acknowledged ability of McCLEURE, resort to the lowest vulgarities and personal abuse in discussing public men. We had hoped the *Times* was to follow in the wake of the *New York Sun*, but we are disappointed.

HAVE WE DEGENERATED?
A total stranger to our country and its political history, would think himself among the veriest set of rogues and rascals unhung, were he to listen to the wailings and bemoanings of a certain class who have worked themselves into the belief that political men and measures are hopelessly demoralized, and who disparagingly long for the "good old times" when everybody was honest and everything went "merry as a marriage bell." A little retrospection will perhaps throw some light on the subject and satisfy this class of sentimentalists that the public men of the present day are looked upon in about the same light their predecessors were, and that intrigue and corruption are less successful now than in the earlier history of the Republic. We venture the assertion that the two Presidents last elected by the people—LINCOLN and GRANT—never combined nor intrigued for nomination. It is a well understood fact that at the convention which first nominated LINCOLN, the friends of SEWARD were the active intriguers. An undercurrent of strong popularity, and the presence in that convention of a sturdy class of men who could not be brought into "combinations," defeated the well-laid plans of SEWARD's friends, and eventually nominated LINCOLN. There were combinations against SEWARD, growing out of his own public career,—notably that of GREELEY,—but LINCOLN was not personally a party, in any scheming or intriguing sense, to the effort to nominate himself. His rugged, quaint utterances had given him a hold on the popular heart, and it was this that gave him the nomination. We believe there was a Providence, rather than political intrigue, in his nomination.
General GRANT's case was different in detail, but the same in principle. He had made a reputation during the war that assured him a Presidential nomination. It was only a question which party should confer it. He was in sympathy with the Republicans, and these were far more glad to confer than he was to accept the nomination. So of his second term,—there were really no competitors.
We believe that the successful candidate in the coming Presidential contest will be the choice of the people as clearly as LINCOLN and GRANT were, and that if any man is now seeking to compass his own or any other's nomination by cunning or intrigue, he will, in the end, find in his sorrow that "vaunting ambition overleaps itself," and that it is only by the will of the people that political success can be accomplished.
THE BUSINESS PROSPECT.
The general stagnation which has so long held business enterprise, seems to be giving way to a feeling of more confidence, and the prospects for a renewal of trade, and business activity are cheering. The "hard times" have not been caused by a lack of money, but only a want of confidence. Our city contemporaries speak in the most hopeful terms of the situation, and it is the general belief that the present season will prove one of the most prosperous the country has witnessed for years. The *Herald* concludes a well-written article upon the subject with the following sensible remarks:
"It is also the belief of our most cautious financiers that for men who do a legitimate business, with sufficient capital, the present year is likely to be fairly prosperous."
"Finally, in any consideration of the future, the immense recuperative powers of the country must be taken into account. Our condition is that of a young and vigorous man with a sound constitution struck down by fever; but when once the fever is mastered his recovery is rapid and sure. The country is rich and strong; it has now peace at home and abroad; it has passed the point of danger and is on the march to recovery, and its upward course will be more rapid than cautious or fearful men anticipate. Many of the causes of business prostration and loss of confidence have disappeared. A check has been put to the misgovernment and spoliation of the Southern States, and industry once more thrives and has its reward there. In the North a more general feeling of enterprise has been kindled, and the country is again on the march to recovery, and its upward course will be more rapid than cautious or fearful men anticipate.
