Fertilizing Power of Salt

". Occasionally we have noted that salt is an excellent fertilizer for dry or sandy seils. We have supposed What its chief use was an absorbant each district one teacher for six months of moisture, enabling a crop to go on | in the year, and to pay him or her not I in even very dry times. We find a much less than thirty dollars a month statement in the Farmer's Union and board. If that were done, some of Twhich seems to indicate that salt has the best of our young teachers could afideem the ideas somewhat novel, and copy them for the benefit of our

a acaders. A distinct proof is given that comly impossible for any teacher who has not mon salt has power of liberating ampassed a good examination, and, if he has monia from soils that have been had experience, does not bear a fair repuhighly inchured from rotten dung. tation as a teacher, to find a situation as Peruvian gnano and other ammoni teacher in the public schools. And, what real manures, which, in sandy sub-Soils respecially, exist in in feeble combinations that readily undergo decomposition when brought in conthe occupation of teaching much longer than they do as matters are at present .-thet with solution of salt. . In the ease before us, a portion of chloride of sodium (salt) acted -upon these Techle ammoniacal combinations.producing on the one hand soda, which became fixed in the soil, and on the other, chloride of ammonia, which passed into solution. This analytical result throws light on the function of salt in agriculture. It is well known that salt is most uportant, occupation, than teaching. *beneficially applied to light land af-tor a good dressing with barnyard manure alone, or in conjunction with Peruvian guano, and that lits, action under these circumstances is particuentirely practicable - fairly within our -larly useful to wheat crows in generreach. And for my part, I do not expect ral. Practical experiments on a large to see any marked progress of the schools Ascale, have shown, indeed, that by in the rural districts, until something in salt alone a large increase of grain this direction has been done. was produced of land in good heart But at the same time, I am aware that there is one serious difficulty in the way. > There are many advantages in teaching composition to young scholars in this way, which we will mention hereafter. ₩.

is more, after qualifying themselves for their work, rhey would be likely to follow UNIVERSITY SCHOOL EXAMINATION.

At a recent meeting of the McGill College authorities, the question was enteranother thing that is very much to be detained, "Should the College undertake sired. There is now a great waste of the school examinations similar to those educational forces of the community, ber adopted by Oxford and Cambridge in cause many of the best teachers, as soon England ?" The decision was in the as they have acquired a little experience, affirmative. To the University of Oxford and have shown that they have a natural must be accorded the honor of first enaptitude for the work of teaching, are gaging in the system originated about fifforthwith promoted into some more lucrateen years ago with some Oxford gentletive, and at the same time less useful and men, who, deploring the wretched state of education in the private schools of The great improvement in the condi-England, conceived the plan of instituttion of the country schools, which would ing examinations of pupils from these ertainly result from such an increase in schools by the Oxford professors, and of IOWA, NEBRASKA & KANSAS. the salaries of the teachers, is, I believe, granting to elder boys the title of A. A.

> and to the juniors a certificate if they satisfy the examiners. A wide scope is granted in the selection each pupil may make of the subjects in which to be examined. This only is insisted on, that every candidate should be well grounded in

reading, writing, arithmetic, grammar history, and geography. There is now about forty centres to which pupils come to be examined. The number of candidates has increased with marvellous rapidity, and the advantages resulting to parents, teachers, and scholars, seem to be very generally acknowledged. Parents have by these examinations a ready means ver our lists of testing the teaching power of each school; they need not now be duped by apr22-75tf+ the pretensions of ignorant teachersclass of men very numerous before these examinations were started, but now fast disappearing. Good teachers are pleased to have a definite programme upon which to work, to have impartial and thoroughly competent men to judge their work, to

be able to point to success at such exam inations as proof of their competency. Pupils have a definite plan of study chalked out by high authority, something to work for that is worth working for. Emulation is powerfully excited, and The fin to all but the indolent there is an enviable reward in the shape of a certificate or

title. The plan of proceeding is this Some large town is selected as a centre, to There is a great deal of strength in old which pupils come once a year from the
