upon all the general cyclopædias, especially the
new bues, I find on my return from abroad that the
new edition of Appletons' American Cyclopædia
has made rapid progress, having now reached the
ninth volume, bringing down the alphabet to Rt.
I am highly pleased with its character. The first
edition was a very convenient work, and more complete for American readers than any other; but this
greatly surpasses it. The articles have all been rewritten, and then subjected to the most rigorous
criticism, the effect of which is shown in their
clearness, comprehension, and condensation of
statement. "The vocabulary is particularly rich in American The vocabulary is particularly rich in American blography, popular science, and all these subjects that are most interesting to the mass of readers. The style is simple, transparent, and chaste, and the information is all of the most practical character. The discussion of disputed points is wisely avoided, and the space thus saved is devoted to sterling matters of fact. The maps are, admirable, and the woodcuts are exceedingly appropriate, as well as elegant. It will form for years to come a complete family library on all standard topics, and deserves, as it, will doubtless have, an extensive eleculation.

These articles are written, so far as I have examined them, by Roman Catholice, from a Roman Catholice standpoint; though at the same time they strive to be impartial.

"It seems to me that this is a feature to be commended. We want to know what that Church thinks of its doctrines and history."

I regard it as a peculiar excellence of the American Cyclopadig that, not only with reference to the Roman Catholic Church, but also with reference to all other subjects, the articles are written by persons who are specially familiar with these subjects.
