to the bottom palings, next to the inil though caussic paragraph from the especially in our country schools, and that New England Journal of Education, may descrives, as it will doubtless have, an extensive circulation, JAMES STRONG." si le of the coop with hinges; the teachers oftener acpend upon motives of doors to be fastened at the top by not be out of place. In discussing what is not inaptly styled the "New Economy," the editor says: "But the general princileattons, which closes up the nests so cess, than upon those appeals to conscience, to which the young will ever rethat the hens can occupy them withple which we have mainly in view, is the out being seen or disturbed, as they spond. intrinsic hypocrisy and baseness of seizing (2). A teacher should also possess a upon education and religion, as the first like hidden or dark places to lay or large measure of self-control. Without hatch in; and their eggs can be taken this all attempts to control others will be victims of our new economy. These have not been the sinners at all, in our extrav-

out of the nests through the little futile. The government of others is conagance. Our superfluity of indulgence in those directions are like "the small dust doors. Artificial China nest eggs are self. To this should be added tirmness preferable, because they are not lia- and perseverence, but these qualities are in the balance." Nor have either religion or education tempted us to luxury and exhe to be frozen, stolen, or eaten by usually found united with genuine selftravagance. So far as we have allowed the rats or hens, as real eggs are. government, indeed necessary to it. For

them to exert their true influence, it has it must be remembered, there is a broad been in the opposite direction. Had we HOW TO MAKE A SELF-FEEDING BOX. distinction between stolid indifference, listened to them, we should have had less Take two boards, each a foot wide, and real self-control. There may be those need to retrench. Hence, to cause these two fect long, and two more from two who manifest an even temper, who are

to suffer; to lessen our religious contriba-tions or offerings; to cut down the salaries and ong-half to five feet long and never rutiled nor disturbed for the simple same width, according to the number of volumentation of the same width, according to the number of volum lowls; noil the long boards on of teachers or ministers, to dismiss from of your fowls; hail the long boards on sibilities. They are always unrufiled, bethe edges and flush with the tops of cause they are so heavy that no storm can the two-foot boards; nail elects slop- disturb their tranquility. But when a ing downwards and inwards from the lower edge of the long boards, at an angle of about 60 degrees, till they next at lower ends. Then take two act prudently when tried and chaffed by bourds and let them rest on, and fas- disorder or rudeness, or by things which ten them to, the cleets, leaving a are even worse than these, he has reached throat about half on inch wide, at a high degree of self-government and at

their lower edges, like a hopper, and and firmness could confer. (3). A third qualification for teaching cover it partly with a board six inches wide, nail and attach to it another is a thorough knowledge of the subject to heard of same width, by hinges, and be taught. This means something more and calls it ECONOMY."

than a-mere acquaintance with the tex put your-grain into it, which will pass books in use. The teacher who asks the through the throat as fast as the fowls questions at the foot of the page, and obn wil it to cat, and can have access to serves that the proper answers are selectif at all times without dirtying it, ed from the text, and confines himself to The covering boards may be put on this will make sorry work at teaching: sloping downwards to prevent the fowls from standing on it and dirty-

ing it. HOW TO MAKE A WATERING TROUGH.

Alake a water-tight box, open at (5), fourteen inches, wide, three to live feet long, (according to the num-by of your fowls) nail a strin one five feet long, (according to the numbe of your fowls.) nail a strip one orthography, and whatever is required to and one-half to two inchess wide on be trught. And then this knowledge the middle of the top, attach to each should be so complete and thorough, so side of it, with hinges, a board six perfectly arranged and systematized, that inches wide, raise the outer edges of

the boards thus attached to an angle of about 45 degrees, to rest on trian-

in it.) to carry off the stale water he-fore justing fresh water into it. Thus with the most recent forms of thoughi. A box, like the above, without be-

the grain put, into it will be kept ary man and essential to success in his cican also.

the service of the school or the church worthy teachers of music, singers or pernd its history. These articles are written, so far as I have examformers; to do all this, or anything like it, There are a supervised as the astronaution of the standard the standar we cannot but regard as something worse than false conomy-it is a fraud and a robjery. If these people were decently honest in their economy, we should find the retrenching-axe laid at the root of a hundred things, before either education or religion would be thought of. Bat a man may defraud his child in the one, and the victim has no voice; he may rob tained a discipline which only patience Ged in the other, and there is no voice, Lut it is waiting for the end; and so in both cases he coolly makes them vicarious FROM THE BISHOP OF CONNECTICUT. substitutes for his own self-mortification To this the reply may be. All this is very well in theory, but your theory is

utopian; it will not work in practice, at an indecorring how to say that it is least not in the rural districts, where the consider it as far by ord any similar work in its population is comparatively sparse and is who may purchase it, that they will have second an unfalling and tustworthy help in all deputt the schools small. And just here we meet a difficulty which obght not to be slurred qualitance with the work. utopian; it will not work in practice, at over. In many townships at present, the assessment for school purposes is all, or recitation, or of the pupil's work. If the nearly all, the law allows. It has reached FROM PROF. EATON, of William College. matter be arithmetic, there should be a knowledge of arithmetic, not of one or two the maximum. So much, and only so

nuce, money can be raised, and it must be made to go as far as possible. The present rate of wages is as high as it can be made within, the limits of the daw. nuch, money can be raised, and it must text-books merely, but of the whole sub-What farther can be done? We answer : (1). In many of the townships the immber of the schools is greater than there is FROM BISHOP JAMES. need. It costs quite or nearly as much to maintain a school of a dozen scholars as it is ready for use at a moment's call. it does one of forty. Directors have yield-(1). Then the teacher mus himself be ed to the clamor of one or two influential a student. In all other professions but parties living near some road crossing, and have established a school there and of about 45 degrees, to rest on trian-gular blocks mailed to the ends of the troach; hore a one-half inch hole the physician should keep himself familiar through the bottom of the trough, with new firms of disease and new remet mean one corner, (with a wooden pin maintained it at the public expense, and | FROM PROFESSORS IN ROCHESTER THEOnear one corner, (with a wooden pin dies, that the lawyer shound be posted as knowledge, on one single term, the avertration, and offen present, in compact form, re-markably complete information, and the latest re-sults of critical investigation, age one and a fourth miles apart. Two of these could easily be dispensed with, and constructed the lowls can not get in-to the water or over it to dirty it. tions; and for the same reason the teacher say d. What can be done? The houses should understand every new develop- are built, and the families in the neigh-

A box, like the above, without be-ing water tight, may be used as a well as maintain that general knowledge convenient feeding trough, by which and culture which is becoming to a liter-of convenient feeding trough. Of course here is a difficulty. But the principle of the greatest good to the great-est number, should govern. Better have calling. In fact there exists a greater ne-cessity for the teacher to be a student six schools well patronized, well taught and well governed, than a dozen with a his profession leads him and keeps him in mere handful of pupils, and incapable teachers and inefficient management. (2). Another thing. In almost all of

these schools, however small, there are one or two pupils who wish to study Higher Arithmetic, Algebra, Physical limit, and his work a drudgery. To obvi-ate this there must needs be study-new Geography, or some of the Higher Eng-lish branches, and insist upon having a Cover their legs with leather reach-, theories, new methods, new experiments, teacher by whom they may be instructed. new generalizations and new rules. And The consequence is that but little discrimthen no teacher is so well prepared to imination can be made. The practice, in part instruction, and to infuse enthusiasm very many townships, is this: at the Fall meeting of the Board, they ascertain how much money they have in the treasury, from which they deduct what is estimated and 922 C1 is made the basis upon which the wages BRYANT'S POPULAR of teachers is to be computed; then they advertise in this township we will give so much per month for teachers; if they outmuch per month for teachers; if they out-bid their neighbors their schools are soon builders by
