Treatment of an Unmanageable Horse.
A beautiful and high-spirited horse would never allow a shoe to be put on his feet. In an attempt to put such a horse recently, he resorted to all sorts of kicks, and finally was brought to his senses. This defect to his stable shoe. This defect to his stable shoe. This defect to his stable shoe.

Wholly rewritten by the ablest writers on every subject. Printed from new type, and illustrated with several thousand Engravings and Maps.
From Rev. Dr. Strong, Editor of McClure and Strong's Cyclopaedia of Biblical Literature, etc., etc., etc.

County Teachers Association
The Bradford County Teachers' Association met at the Academy in Wyalusing, Nov. 7, 1878. Rev. D. Craft conducted devotional exercises. Adjourned to meet at 2 P. M.
AFTERNOON SESSION.
The Business Committee reported the following:
Resolved, That the system of self-reporting is wrong and ought to be immediately abandoned.
Resolved, That the practice of publishing a report of perfect recitation is pernicious.
Resolved, That one hour of this after-noon session be devoted to the study of practical methods of teaching portions of the various topics taught in the common school.
Resolved, That the Metric or Decimal system should be taught in all of our schools.
Resolved, That Mental Arithmetic as a separate study in the common school is unnecessary.

French System of Slaughtering Beasts
The forming of societies for the prevention of cruelty to animals marks a tide of public feeling adverse to the infliction of needless pain on the lower animals. Some have to spend their lives in such service, and these deserve a constantly kind treatment in return for the labor they perform; even when untoward and hence it has been proved that kindness is more than violence or compulsion. A horse of gentleness a horse that no violence could subdue.
Where animals must serve as our food, humanity and a regard for the general health require them to be taken to the slaughter so as not to overheat them and inflame the blood, and to dispatch them in such a way as to cause instant death, and prevent instant long lingering torture, which must exercise an injurious effect on the flesh as food.
A method of slaughtering food animals has been devised in France, at the new abattoirs of La Villette, which must challenge the attention of every friend of dumb beasts. A mask is placed over his head, covering the eyes, in the form of a sharp spike. The killing is done by the butcher striking this spike with a heavy hammer, thus piercing the brain and causing instant death.

Boiled Corned Beef
It should be put into cold water and skimmed off no more salt water. It should boil slowly, at a moderate fire, for four hours. Nothing is poorer than underdone corned beef. Now let me tell you readers how to make the nicest corned beef. The following will be found a very superior way of preparing it. Meat for corned beef should be of the best quality. It is poor economy to pick a poor beef. To one gallon of water add a half pound of salt, half a pound of sugar, half an ounce of potash and half an ounce of saltpeter. In this ratio the pickle should be increased to any quantity desired. Let these be boiled together till all impurities rise from the sugar and are skimmed off; then pour into a tub to cool. When cold pour it over the beef, to remain in the tub for three or four weeks. The meat should be well covered with the pickle; should not be put down for at least three days after killing, during which time it should be well rubbed with salt.
