THE GOVERNOR'S MESSAGE. We last week laid before our readers the annual message of Gov. HART. BANFT. The late date at which we received the document precluded the possibility of any review of it in that

The message discusses in an able manner all the various questions connected with State government, startng with a clear and frank statement of the financial condition of the Commonwealth, he refers in detail to all the interests of the State. His recommendation of a new loan at a rate of interest, not exceeding five per cent. to replace in part, if necessary, loans soon coming due, is judicious and timely. He asks a revision of the subject of mercantile and tavern licenses, to the end that unnecessary expense may be avoided in making assessment, collection, and publication. There is great room for reform liere, and it will be a fortunate thing for the people and respectable newspapers, when a law exists which shall put in operation a just system of advertising legal or public accounts.

the present time. At noon, on Tuesday, the hour fixed the General Assembly, there was a quo rum in the House of Representatives and the Senate, and the work of organization was commenced. The caucuses of the Capitol had arranged everything, and the election partook rather of the nature of a formality. Although four candidates for the Speaker of the House were talked of, viz: E. Reed Myer, of Bradford; Harry Huhn, of Philadelphia; Henry M. Long, of Allegheny, and E. S. N. Morgan, of Lawrence, only the two first name came before the caucus held on Monday evening. Huhn and his friends were very Huhn, proved conclusively that those who gentleman from Bradford, understood their business. Dr. W. C. Beaver, John A. Publications. THE NEW YORK TIMES. FOR 1877. STOTED TO REPUBLICAN PRINCIPLES

AND TO REORM IN MUNICIPAL STATE.

The course of the Times during the Presidential ampaign has secured for its hosts of new friends, and has placed beyond controversy its position as the foremost Republican journal in the United States. During the political struggle preceding the election the follows, accuracy, and fairness of the election the fullners, accuracy, and fairness of its news reports were as obvious as its vigor and breadth of view as an organ of public opinion. The critical cituation in which the country is placed by the disputed result of the election, has been promptly recognized by the Trixes, but it has found no reason to modify the claim which it urged, alone among its cotemporaries, that the vote of the 7th of November secured a majority of Electorial votes for Hayes, and Wisceler. Readers of the Trixes as the day following the election were votes for Hayes, and Weeter, Readers of the TIMES on the day following the election were placed in possession of returns which were simply the most complete and trustwortup published in any part of the Union. The more thoroughly the facts of the election are disentangled from the mass of Democratic falsehood and pretense which has been thrown around them, the more clearly is the justice revealed of the claims made by the Trues astrice revealed of the claims made by the lands he morning after election.

Now that the election of Hayes and Wherler is bereeived by impartial observers of both parties to see a certainty, the TIMEs recognizes the fresh repossibilities, which this renewal of a great public be a certainty, the FIMEs recognizes the rest responsibilities, which this renewal of a great public trust imposes upon the Republican Party. The Times was among the foremost defenders of the principles of purification and reform within the party which triumphed in the nomination of Rutherford'B. Hayes at Cincinnati, It will be as prominent and as uncompromising in its demand for the cinhodiment of those principles in administrative and legislative action. The election has given rise to constitutional controversies, whose discussion may last for months to come, and whose settlement may fax all the good sense, forbearance, and lawabiding instincts of the people at large. It will be our constant endeaver to correct excited feeling by dispassionate argument, to urge the supreme necessity of moderation and fair dealing, and, to place the responsibility for stirring up strife where it be-

anding instincts of the psope at agree, a tent by our constant endewer to correct excited feeling by flepassionate argument, to urge the supreme nencessity of moderation and fair dealing, and to place the responsibility for stirring up strife where it belongs. But we shall do so without abasing one jot of the just demands of a party which stands securely out he right, and of a people the integrity of whose institutions depends on a scrupulous obedience to the demands of law!

In the agitation of the constitutional questions which have been forced upon public attention by the coseness of the late election, the Times will not cease to insist upon the necessity of some approach to uniformity of method in the proceedings taken by State and local boards to ascertain the vote legally cast for Presidential Electors and members of Congress. It will defent the right of Individual states to have the declaration of their wilf by the recognized authorities of such states protected by all the safegrards which have been thrown around it by the letter of the Constitution, and the usage sanctioned by its authors. But it will none the less insist on the duty of Congress to devise means, by constitutional analoguem or otherwise, whereby chizzens of the United States may be protected against virtual disfrarchisement through imperfect as in the mechangin provided by anystar for excerting an honest would of their votes. While constitutional analossity amorge our people, the Times will urge, with the utmisst decision, the national duty of potenting the freedmen and the Northern immigrants in the South, in the pessession of rights granteed them by the Constitution. It will do all mits power to premote the policy of peace and conciliation between North and South, but will not less sight of the fact that Northern confidence and annesty must find their return in the enforcement of evenchanded justice and scrupulous regard for the letter and spirit of the law on the pair of the south. Its influence as heading exponent of political opinio istence of society alike repose will be promulgated in its columns.

The Thres-rejects all advertisements of lotteries, of quacks and medical pretenders, and of all other agencies by which the instillous, polson of vice 18 disseminated throughout society. It will be in the fusion as to the fast, an ewspaper specially adapted for femily tending.

The Weekly Times, containing as It does, selected editorials on topics of national and general interest, from the commus of the dully issue, as well as a concles summary of political social, and fereign in we, beigle softer features which recommend it to all cites as of readers, is a paper admirably fitted to circulate in every pertion of the United States. No Republican newspaper approaches it in circulation, and it yill be aim of its conductors to use every means, hot only by maintain its well-carned-supremacy, but to make its popularity still more decided. nore decided.
