of maize as an article of human food among certain classes of people is surprising, and this prejudice is based on ignorance. Indian corn is one of the most important and healthful articles of human food that a benefi-cient Providence has bestowed upon man; and to its high nutritive value is due in a large degree the strength and vigor of the race of men who laid the foundations of this great Republic. It was much more largely used fifty or one hundred years ago than now, as fine wheat flour, for some not well founded reason, has usurped its place in bread-making. In the several forms, however, of hulled corn, popped corn, hominy, samp, corn-starch, maizen, etc., vast quantities are consumed by all classes of people. Meal from Indian corn contains more than four times as much , oleaginous matter as wheat flour, more starch, and mearly as much nithe system by furnishing heat-formder the most extraordinary circumstances. It holds the elementary principles which constitute the basis of organic life. In this particular it is more remarkable than any other vegetable production known to man. There is a large number of dishes of

parchase corn and meal for their anreals should understand the great d fference in autritive value between what they can raise and what they. can purchase. Journal of Chemistry.

cial sources; when fed to cows and

the nutritive value of the former is

this practical result confirms analy-

It seems that we shall never ge rid of the discussion of the subject of the value of coal ashes as a fertilizer. There have been almost volunes written pro and con, with the great bulk of the evidence in the negntive." We have had considerable experience in the use of coal ashes upon our premises, and failed to discover that they possessed any efficacy in the way of an enricher. We applied them over all the cultivated portions of the garden-which lies the depth of about two inches, and in digging the beds we noticed their, presence for several years. The effeet and the only effect, they had was to lighten the soil, and to that extent were serviceable. But sand would have performed the same service. On light-soils clay would have

a far more marked result. Asko this latter point let us quote pure clay upon almost any upland soit. There are very few proprietors of firms but what must have noticed moved, root and branch, how very We have never seen an instance where this result did not follow the mixture of clay with the soil. In fact, when there has been an opporfinity we have hauled clay into the garden, where, leaving it exposed it was commingled-with the soil to great advantage.

The best use to make of coal ashes is to put them into your walks in gardens and about the premises, in the carriage drive and so on. They will keep down instead of promoting the growth of weeds and grass, and always afford dry avenues. In five months of the year, they doutain no Journal. moisture, and are never soft; in a word, are the best substance for this purpose verknow of; hence it is quite plied. Germantown Telegraph.

example of its use: The hired man came in with the intelligence that one of the finest cows was very sick. usual drugs and potion. The owner cow, concluded that the trouble came from overheating and ordered a teasevere that the sides were almost as hard as a parrel. The old remedy, saleratus was tried for correcting the acidity. But the attempt to put it down always caused coughing, and it did fresh powered sharcoal was given. In six hours all appearences of bloat ment, even the longiand involved periods had gone, and the heifer was well .-Live Stock Journal.

READING.

Associate Editors. A. A. KEENEY, Editor Present Week.

Reading lies at the basis of all school struction: it is the key to all study. Nine-tenths of all the reading the average pupil will do after leaving school will be done for the purpose of gaining informa tion, not for the purpose of imparting it This fact should determine the method of teaching reading. Nine-tenths of the teacher's time and energy given to this trogenous material; consequently in subject should be directed to helping the cold climates it is adapted to sustain | child understand and get the thought out of what he reads, and nine tenths of the puing compounds. The oil gives pil's time and study should be directed to warmth, the nitrogenous principle the same purpose. The other one-tenth gives muscular strength. The com- of time and work may be properly spent dication of alimentary compounds in in securing the proper expression of the Indian corn renders it alone the mix- thought. The fact is that when a person ed diet capable of sustaining man un-der the most extraordinary circum-feeling of the author, the proper expression comes of itself. The thought determines the expression. The thought i

the soul of which the expression is the body. The thought determines almost the cubes of their like dimentions, we wholly the tone of voice, the emphasis, the inflection, the gesture, the pauses; the only things it does not determine and secure are distinct enunciation and p.oper tuals at the farm, to test the compronunciation. These may be called the Darative value of meal from homeartificial or rather the mechanical elements of speech, and need special drill. In teaching reading, a little time should other animals: we have learned that e given to drill upon the elementary sounds, and only a little, as the exercise maily double that of the latter, and in properly enunciating words used, will scure all that is desirable, additionally, tical results. The difference between in the way of cultivating the vocal powthe specimens from the two sources ers. This being done, a proper underis most surprising. Farmers who are so foolish as to go into market to standing of the subject-matter insures its

proper expression. Reading may be divided into silent and oral reading. Silent reading consists in interpreting the thought and sentiment if an author, and making them your own. for the purpose of gaining information, his is all that is necessary. Oral reading nat is not founded upon an understandng of what is read, is not reading at all -it is simply sound-mere "parrot work." Much of the execrable reading we hear in the schools arises from the fact that toachers begin at the wrong place. They. usgin by asking the child to express cought before he has any thought to ex-

PRACTICAL SUGGESTIONS. In teaching reading, [1. Begin with words;" 2. Combine the words into statements or sentences; 3. Very soon low and the soil rather heavy-to learn the elementary sounds of the simpie words; 4. Learn the letters by name incidentally; 5. Spell by letter; 6. Never illow a pupil to use a word that he does not know the meaning of; 7. Require the papil from the first to recite in his talking tone of voice; 8. Never allow a pupil to attempt to read until he knows what he is going to read about; 9. Before allowing, tue child to read orally, be sure that he an instance to prove the vi tue of snows the words (a) as to their pronuneation; (b) as to their meaning; 10. Afer mastering the words as words, be sure that the child has the thought, and this that when an apple tree dies or is re- | can only be secured by requiring him to give the thoughts in his own language; rank the grass grows over the spot 11. After this study of the thought of the whence the stump was taken, from lesson, allow the child to read; 12. If he THE SISTERS OF MERCY the mirture of the clay thrown up does not read well, the probability is that with the top soil. It rejuvenates it, he does not comprehend the thought, so and will add to its fertility for years. ask the questions and explain; 13. The teacher may sometimes give the pupil an example, but he should not make a practice of reading first and then asking the pulpil to imitate; 14. Do not talk to a child about pauses, emphasis, inflection, etc., out say, rather, "what does this through the winter to disintegrate, mean?" then, how do you say it 15. The teacher who teaches reading by reading first and asking the children to imitate, or who is continually saying, thet your

voice fall here," "keep your voice up there," "emphasize this word," "that should have the falling inflection," may succeed in training pupils to read certain selections well, but will fail utterly to minutes after a rain, during eight make good readers. - Indiana School HOW TO USE THE INFINITIVE MOOD.

The preposition to, attached to a verb, est use to which they can be applied the sign of the infinitive mood. There are certain cases where it may be omitted, but it is a settled rule of grammar that NEARLY all the sick animals be- whenever the sign to is used it must not come so by improper feeding in the be separated from the rest of the infinitive first place. Nine cases out of ten by an adverb. "Instead of ITo juiththe digestion is wrong. Charcoal is jully represent this scene would be imposthe most efficient and rapid correctible, say faithfully to represent this five. It will cure in a majority of scene, or to represent this scene faitheases, if properly administered. An fully." -Quackenbos, \$645. In "Vulgarisms Exposed;" page 145, is the rule ; "The to of the infinitive mood is insepara and a kind neighbor proposed the able from the verb," and the author goes on to quote the most common violations being ill and unable to examine the of this simple law, such as "To boldly resist, To seriously injure, To legally acknowedge, To simply state, To deepty cupful of pulverized charcoal given in realize, To still exhibit, To rapidly rewater. It was mixed, placed in a cruit, To gradually change, To not only junk bottle, the head held upward, ruin," &c. We regret to say that this and the water and charcoal poured vulgarism is very common, in spite of the downward. In five minutes improve. grammarians. The late President Linment was visible and in a few hours coln introduced it many times into nearly the animal was in the pasture quiet- or quite all of his messages and public ly cating grass: Another instance documents. It may be forgiven as a slip of equal success occurred with a of the tongue, but there is no excuse for young heifer which had become bad- it in a state paper which must have passbloated by eating green apples ed under revision before puplication, and after a hard wind. The bloat was so where its presence shows most culpable carelessness, or an absolute want of scholarly calture, on the part of the writer. A Worcester paper designs a sharp hit Secretary Egarts in its assertion that he little good. Half a teaspoonful of could have had no hand in the President's Thanksgiving Proclamation. In our judg-

attributed to Mr. Evants would provoke far less criticsim in educated circles than the expression "to deroutly beseech," which is to be found in its closing reconmendation. they refer; and our public documents are 2. Do not beat your horses, nor filled with illustration of these gross vio-

most important discipline of my boyhood. The piercing through the involved and nverted sentences of Paradise Lost; the inking of the verb to its often distant commative, of the relative to its distant ntecedent, of the agent to the object of the transitive verb, of the preposition to the noun or pronoun which it governed; he study of variations in mood and tense,

the transformations often necessary to bring out the true grammatical structure of a sentence, -- all this was to my young mind a discipline of the highest value, and, indeed, a source of unflagging delight. How I rejoiced when I found a great author tripping and was lairly able o pin him to a corner from which there was no escape. As I speak, some of the sentences which exercised me when a boy rise to my recollectio, "He that hath ears o hear let him hear." That was one of them, where the "He" is left, as it were, iloating in mid-air without a verb to support it. I speak thus of English because t was of real value to me.

PROBLEM.-A person has a tin pail 10 inches diameter at the top, 6 inches diameter at bottom, and 9 inches deep, which he wishes to use for measuring milk. Required, the number of inches from the bottom, and on the side of the pail that marks be placed to mark the capacity of a pint and of a quart.

Solution .- Let the pail be represented by the frustum of a cone and comple the cone. From the similarity of triangles we have 2:3::9:131—the height of the added cone. Contents of the added cone 3.1410x0x3x134=127.2238 cu in. 28.875 cu in. in obe pint. Then:127.2348+28.875=156.1098 cu. in. in added cone, an pint frustum. Since similar solids are to each other as

156.1098:127.1348::(q) ::(13\})\* 156.1098: 127.1348:: (Q) : (133)

= 14. 45+in. height of added cone,
with pint frustum. Then 14.45 in.—18.50
iu:=95 in., altitude of the frustrum. We find the radius of top of pail to be 2-9 of the altitude longer than o radius at the boftom of pail. Hence 2-9 of 95:=21 and square root of 212+952 =97 in., the slant height of the frustrum formed by the pint of milk. ne pint of milk. Again, 57.75 cu in. in a quart

127.2348+57.75=184.9848 cu. in. in added.cone and quart of milk, and

184.9848: 127.2348: (x)<sup>3</sup>: (13)<sup>3</sup>
x=15.29 in. height of cone and quart; and 15.29—18.50=1.70 in., altitude of the frustrum formed by the quart of milk. Then 2-9 of 1.79=4 nearly, and guare root of 4.2 + 1792 =1.83 inches lant height of frustuum. Hence .87 in. and 188 in. respectively

the distances from the bottom and or e sides of the pail, that mark the capa ity of a pint and quart. EARL BAILETTE also solves the above ous we have not suitable type to publish is solution. He also sends the following solution t the River Problem in REPORTER of No

anber 1  $\frac{1}{4}:6::60:(1440).$ The solution will be easily understoo by making a diagram and noticing the

similarity of triangles.

The THE POPULAR SCIENCE MONTHLY, Conducted by E. L. and W. J. YOUWANS taining thebest thoughts of the most adva-minds in this and other countries; illus-trated when mechatry to further councy their ideas. THE POPULAR SCIENCE MONTHLY SUP-PLEMENT, Conducted by E. L. and W. J. YOUMANS,

THE TRIBUNE has long enjoyed the distinction of the largest directions among the people. During the year 1973 it, will spend more labor and menor than ever before to deserve that presentence. It secured, and means to sends it, by becoming the medium of the best thought and the vote of the last conclones of the time, by keeping shreat of the highest progress, favoring the frest discension, hearing all sides, appealing always to the hest in-telligence and parest morality, and refusing to cater to the tasts of the vile of the prepaleces of the lignerant. The continued popular spread, and the constantly widening political induction it enjoys, are the best proofs that it is still fathful to these early secrets of its strength.

The finitume converty strove for the election of President Hayes, and it gives its heartlest upport to the high purposes of his Administration, housting the wisdom of methods sometimes taken by his subordinates, and criticising with entireredom his occasional mistakes, it still thinks it he duty of the hour to hald together and strongthat the party that elected and alone sustains him. It believes the day of danger to the Tax-Payer has come. The Solid South (at tast in full centrol of every Rebel and Border State) sees its chance to get at the National Treasury, and get tack what it took by the war. Only 47 Northern votes are needed. If Tammany Hall could furnish New York, then Indians, or Connecticut and New Jersey, would suffice. The danger is upon us; and regainst it the old party of Frendom, still the party of the Churches and the School Houses, is the only hulwark. It alone can keep the Solid South from grasping the National Government in 1880, It alone can save us, even now, from the threat-need Jenne can save us, even now, from the threat-need Jenne can save us, even now, from the threat-need Jenne can save us, even now, from the threat-need Jenne can save, therefore, Tast Tranum renew the old appeal to the National Government in 1880, It alone can save us, even now, from the threat-ned staining the very best articles published in the foreign scientific journals and reviews. THE SEMI-WEEKLY TRIBUNE Combines many of the merits of both the Daily and Weekly issues, and is, in some respects, the hest, as well as the chespest paper sent out from THE TRIBURE Office. It contains all the literary, agricultural, and domestic miscellany, and all the special articles prepared for THE WEEKLY. It has resident nearly all the news of THE DAILY, and most of its editorial articles not strictly local in their application. It has been entarged, and change do to the new sixteen-page form described below—a change that has long been asked by many of its intelligent patrons. THE WEEKLY TRIRUNE.

New Advertisements.

FOR 1878.

This has been for a third of a century the favorite paper for our substantial country population, A competent critic has said of it: "This Werely Tringers has come more for the settlement and prosperity of the Great West, and has made more good farmers and good citizen, than any other single influence that ever existed in this country." Ouring the ensuing year it means not only to preserve all its old merits, but to take a long stride shead. By the introduction of \$50,000 worth of ew machinery, and by an enlargement of its size (making it the largerst single sheet lessed by any newspaper in this country), it is enabled to give subscribers what they have so long asked—their favorite paper in a shape casier to read, and convenient for binding. Each issue consists of sixtuen pages, of the form and general appearance of Harper's Weekly, but with pages considerably larger, and with unusually large and clear type. All file ind and standard features are cavefully preserved, while the new form and additional size enable ut to offer the following among many This has been for a third of a century the fav
