20,000 white settlers there, nearly all than Arizona, Idaho or Wyoming, a large per cent. of the population is from placer, was \$2,000,000 in 1876 and more than doubled last year. There are forty-five gold quartz mills in operation and six in course of besides one silver smelting; and collectivly they are expected to yield over \$10,000,000 this year and more hereafter from a region extending twenty miles broad. There are now more than 3000 gold quartz lodes here; of which forty yield and one hundred have large bodies of ore mined waiting mills, while the residue are being developed. There are also 300 recorded silver lodes and many are worked. There are many larger placer mines. Copper, coal, lead and iron deposits have been found, with salt and petroleum springs. There are twenty towns and many small settlements, with churches, banks, stores, hotels, fac tories and schools. Agriculture has been commenced on a large scale. A railroad is planned from Yankton, about 450 miles; and a branch from the Union Pacific, west of Nebraska,

is begun. Such is the begining of the future State of Lincoln; a State that, if the belief of residents there is only in part realized, will more speedly than in almost any other instance become a State in fact, and pour new energy into all the contiguous country. The accomplishment of a short time has St. Paul and from Council Bluffs is hills themselves.

State is due, first, to the energy with which the campaign had been conducted alike by the Republican press of the State and by the Republican State Committee: second, to the popularity of our candidates; third, to the clearly-established fact that the Southern white South is aiming at supermacy in the National Government through the Democratic Party, thereby not only reversing the results of the war, but opening the Federal Treasury to Southern war indemnifourth to the rottenness of the Democratic platform, which adopted the rebel interpretation of State rights, a financial plank upon which inflationists and anti-resumptionists might stand, and a temperence plank, which was "neither fish, flesh, fowl, nor good red-herring."

WHAT OUR CORRESPONDENTS WRITE. LETTER FROM HARRISBURG

The committee appointed to investigate garding the administration of justice in this form the government, is to collection of taxes, due the State from the Union Railway and Transportation Company continued the examination of witnesses on Saturday of last week, but the only thing so far made clear is that there has been a great lack of system, if not gross carelessness, displayed in the man-agement of business in the Auditor General's office, and that a quarrel among the Democrats as to how the patronage of the incoming Democratic Auditor General and State Treasurer shall be dispensed has had very much to do with getting up the investigation. No one appears to have the most remote idea that any porion of the \$19,000 fees paid to Mess Olmsted and Simouton will ever find its way back to the State Treasury, or that anyone will be punished. The committee adjourned on Saturday last, to meet at the action was taken for the reason that Sentor Davies had to go to Philadelphia to attend the Supremo Court during this week, and the committee did not wish to go on with the investigation in his absence. During the debate Speaker Myer took the floor, and delivered a most logical and forcibly speech in favor of the p the bill, and an amendment which he offered. He spoke about three quarters of an hour, and made a most favorable im-pression, furnishing many new and uninswerable arguments. The amendment offered by Mr. Myer was very stringent in its character, but during the recess for dinner, upon consultation with friends of the bill, it was thought advisable to withdraw it, as it was feared the pressing of bill with amendments offered by Mr. Jackson, of Mercer, passed second reac
