MRs. OLMSTEAD has been appointed agent for this county for a most useful and meritorious article, which should flud its way into every house not provided with stationary bath tub. It is a portable rubber Bath Tub, which can be used in any room, and when not in use stowed away in any place. As cleanliness is akin to godliness this invention should come into general use. Mrs. O. will be glad to exhibit the patent and take orders for it.

DR. HARRIS, the accomplished Court rier, devotes such time as he has at his command, when not engaged in "running the Court," to furnishing the ladies of this place with articles useful and ornamental. His last enterprise in this direction is a patent potato chipper, or machine for slicing potatoes very artistically. Potatoes thus prepared have long been esteemed a great delicacy in Saratoga, and other fashionable places, and the Doctor is entitled to the thanks of the communitv for giving us all an opportunity of enjoying the rare dish at our own houses.

LECTURES ON ASTRONOMY. - Rev. J. H. Nason is to deliver a series of lectures on Astronomy, in Mercur Hall, this week, worshippers at some of the Churches were beginning on Thursday evening. The course will consist of three lectures. The following letter from Rev. E. J. Mohris, who has listened to the lectures, is so flattering to the lecturer that we append it: The Rev. J. H. Nason, of East Smithfield, has just delivered his three lectures on astronomy in this place. Those who heard them feel that Mr. Nason has un dertaken a noble work for which he i minently well fitted. The lectures are bepared with great care, and they command the attention of a miscellaneous and dience, while they do not "stoop to conshoctist, W. M. J. DELPEUCH, has returned squer."
