The injudicious feeding of meal is one of the reasons why farming does not pay. The All grain fed to farm stock should be raised upon the farm, as every dollar put out for meal is a positive loss, unless dollar for dollar comes back as the direct result of feding such meal. The heifers that are kept fat with meal will not breed, while those kept in good growing order on grass, hay and roots, breed readily.	<ul> <li>(1's age now=10×B's arge at first.</li> <li>If 3 years be taken from A's ege it will = 3 of B's age, or (51×3). 41 times B's age at first. C. M. MYER. June 1, 1876-17 IN THE COAL BUS IN ESS.	115 Wyoming Avenue, SCRANTON, PA., SCRANTON, PA., SCRANTON, PA., SCRANTON, PA., SCRANTON, PA., SCRANTON, PA., SCRANTON, PA., SCRANTON, PA., SCRANTON, PA., SCRANT, Video A., Scranton, PA., SCRANTON, PA., SCRANT, VIDEN, SCRANO, PA., SCRANT, SCRANO,	<ul> <li>Maine.</li> <li>Mayab 19, 19, 19, 19, 10, 10, 10, 10, 10, 10, 10, 10, 10, 10</li></ul>
	tilesix inches. I have plowed the same piece this fall; the water run- bing from the tile as clear as spring water, and the swale is all dry. This being any first tile laying, I feel en- couraged. FEEDING INDIAN MEAL TO STOCK. —The Massachusetts Ploughman saves list. Never feed it to a calf after it is three months old, but feed more for growth than for fat. _Ind. Heifers intended for the dai- ity should not have meal until after their second calf, and not then until the calf is al least ten days old; and in small quantities at first. Field. The injudicious feeding of meal is one of the reasons' why farming does not pay. The All grain fed to farm stock should be raised upon the farm, as every dollar put out for meal is a positive loss, unless dollar for dollar comes back as the direct result of fading such meal. — 5th. Heifers that are kept fat with meal will not breed, while those kept in good growing order on grass, hay and roots, breed readily. Feeding meal to a bull, unless in very small quantities, is very injuri- ous to say the least, as it makes him ngly and renders him an unsure get ter.	<ul> <li>(1's age now=10×B's arge at first.</li> <li>If 3 years be taken from A's ege it will = \$ of B's age, or (5½×\$). 44 times B's age at first.
