From West to East his journey led The man through thick and thin. Sore spent with tollsome wintry ways, He pined for drink and food; Certes for such a fainting soul The best was none too good. .

"Ho : damsel ?" quoth the thirsty lips To one who seemed the maid, Go brew me hot, from boiling pot, A mug of lemonade. " And let the merry peel float there,

For that's the eftest way To make the liquid comforting, I've heard old people say." The awe struck maid looked up afraid

As one who hears a sound .

That rends the whole astonished air From caves of guilt profound. Then low replied, with eyeballs wide, To him who would carouse; The lemon is forbidden here;

We keeps a temp'rance house !! DRIFTWOOD. A HARDENED WRETCH.

This is a bad year for big feet and many are the devices in French heels and blind soles for making sixes broad look like threes narrow. Numerous, too, are the coquetries by means of which shapely feet are displayed with propriety. It is seutimental custom for young men to

write their names, and something soft, on the soles of the girls' shoes. You come across couples in the angles of hallways, in the corners of verandas, and on the beach, filling out these novel autograph albums. The girl grasps some thing-sometimes the young man's shoulder-to steady herself, and coyly holds her foot bottom upward, while he squats and tickles her sole with the point of the pencil. This is not only pleasing to the pair, but makes great sport for the spectators. The writing wears off in an evening's dancing, and the shoe is then ready for the next fellow. The custom is encouraged by girls with little feet. One who was not so fortunate stood in a Howland House, New York, corridor, gracefully posed against the wall, with the spacious bottom of her shoe spread out before an enamored swain who had his pencil thoughtuflly suspended. Her hardened brother came along. "Put on the Declaration of Independence," he said; "there's room for it, with all the signatures." The girl took her foot away immediately, because she wanted to stamp

JOHNNY'S ESSAY ON DOGS. Last summer our dog Towser-was lyin in the sun trine to sleep, but the flies was that bad that he culdn't, cos he had to catch 'em, and bime by a bee lit on his head, and was workin' about like the dog was hisn. Towser he held his head still, and when the bee was close to his nose, Towser winked at him like he-sed you see what this buffer is doin', he thinks . I'm a lily of the valley which isn't open-. ed yet, but you just wait till I blossom and you will see some fun, and sure enuf Towser opened his mouth very slow so as not to fritten the bee and the bee went it to Towser's mouth. Then Towser he shut his eyes, and his mouth too, and had begun to make a peaceful smile wen the like stung him, and you never see a lilyof-the-valley ack so in your life.

FOR MECHANICAL PURPOSES. During the first summer after the "Maine law" took effect, having came on, and the usual accession to the force of farm hands came with it. But the work went on slowly. There was no spir it in it-none, at least, of that kind of spirit which the men were accustomed to The sale of rum was limited to town agents, and they were permitted to sell only for medicinal and mechanical purpos s. After a day of dissatisfied watching of the work, Uncle Dan'l" said f Hitch up the horse, William, and take a couple of jugs down to the town agency DR; and get three gallons of rum. If Deacon Stillwell asks you what it's for, tell him for 'mechanical purposes.'" The nephew did as he was bid, and when he came to the agency boldly asked the agent, a stern-faced Baptist deacon for the rum. The deacon looked at him over, his spectacles, and asked him who and what it was for. "It's for Uncle Dan't and mechanical purposes," said the young man. The deacon quietly took the jugs, slowly filled them and brought them out to the wagon. As he was putting the second one in he said to the waiting messenger: "Who's your uncle got to do his haying this year?" "The Ellises," was the response. "Well," said the deacon, 2s he shoved the jugs under the seat, "you tell him he'll need more rum."

Cures Colds, Pneumonia, Bronchitis, Asthma, Croup, Whooping Cough, and I diseases of the Breathing Organs, it soothes and heals the Membrane of the Lungs, inflamed and poisoned by the disease, and prevents the night-sweats and tightness across the chest which accompany it. CONSUMPTION is not an incurable malady. It is only and HALL'S BALSAM is that remedy, bon't DESPAIR OF RELIEF, for this benign specific will cure your even though professional aid fails. the rum. _ The deacon looked at him over "you tell him he'll need more rum." THE SCOTCHMAN AND THE MINERALOGIST. "You man gave me his bag to carry by a short cut across the hills to his inn, while he took the other road. Eh! it was dreadful heavy, and, when I go out of his sight I determined to see what was in it, for I wondered at the unco weight of the thing; and man, it's no use for you to guess what was in that bag, for you would ne'er find out. It was stones." "And did you carry, it?" "Carry it! Man, do you think I was as man as him-

near the house, and I gave him good measure for his money." A BUSY FAMILY. A case of assault and battery, in which farmers' sons were plaintiff and defendant respectively, was on trial in Justice Alley yesterday, and the plaintiff's lawyer was very anxious to make out that the defendant's family must have seen the fight which took place just outside the kitchen door. The defendant's mother being on the stand, the lawyer began: "Well, where were you when the first blow was struck?" "Down cellar skimming milk and tying cloths over my preserve jars," she replied. "Where was your husband?" "He was in the barn mending the harness and greasing the wagon." "Where was your daughter Sarah?" "Sarah was in the north bedroom changing the pillow-cases on the spare bed." "And where was Jane?" "Jane? She had-run over to a neighbor's to borrow some coffee and a nutmeg." "Let's see. Haven't you a sister living-with you?" 1 "Yes, sir. She was sewing carpet rags up stairs." "Ah! she was? You have a younger son named Charles, haven't you?" "Yes, sir; and he was salting sheep across the road." "Just so. You are a very busy family I see. I suppose even the dog was very busy just at this very moment?" "Yes, sir, he was. Old Bose was down at the gate looking toward Detroit for one-horse lawyers." That closed her testimony and settled him more than a foot. -Detroit Free Press. A CONSUMPTIVE-LOOKING man, lame

self? Nae! nae! I emptied them all out,

RANSOM COTTAGE RANGE.

With the Expansion Broiling Chamber,

SMYTH'S PATENT DUPLEX GRATE

With or without Low Closet, Reservoir, or Ornamental Elevated Shelf. The Greatest Combination of Valuable Improvements Ever Presented in one Range.

After the flattering experience of the past year, having had a very large and extended sale, we find that the THE RANSON COTTAGE is universally conceded to be the most desirable Range of its class in the market. Its general features are the same as in the celebrated Ranson Range, which has for years been considered the finest Range made. It contains the Fatent Expansion Broiling framewhere, which is universally acknowledged to be the only successful and practical broiling attach-Chamber, which is universally acknowledged to be the only successful and provided Ransom Range, which has for years been considered the finest Range made. It contains the Patent Expansion Brofiling Chamber, which is universally acknowledged to be the only successful and practical brolling attachment in use. It is also furnished with Smyth's Patent Duplex Grate. This celebrated Grate is extremely simple in its construction. It has now item in active use for more than five years, and in view of the universally successful experience of its operation and dumbility during that time, as well as the highly satisfactory results obtained by as in our own thorough trial of its qualities, we have no healtation in pronouncing it the only complete and successful arrangement for removing elinkers and refuse from the fire-box instantaneously, thoroughly and cleanly, while the degree of combustion obtained has never, in our opinion, been equaled with any other style of grate.

THE RANSOM COTTAGE is a thoroughly first-class Range in fall its portions and appointments, while the price is extremely loid. It is so constructed that it can be changed from a Low Closet to a Single Oval Range, by merely lifting the upper part of the Range from the Low Closet to a Single Oval Range, by merely lifting the upper part of the Range from the Low Closet to a Single Oval Range, by merely lifting the upper part of the Range from the Low Closet and placing it upon a set of ortamented legs. All sizes can also be furnished with the Ornamental Elevated Shelf. The large Baled Ash Pan is taken out at the end of the Range-instead of the front—a much more convenient and cleanly arrangement—and the capacious Warming Closet extends underneath the whole Range. The Hot Water Reservoir is heated entirely from the bottom, and is of a larger capacity than will be found on any other Range of this class. All the minor details in the construction of this Range have received the closest attention. It has highly burnished ends, nickle-plated knobs of a new and be

Light is essential to the care of leather, and when the harness closet is dark the door should be left open at least half the time during the day.

as little as possible. Canning Fruits.

Every housekeeper who knows in herself how best to can fruits, should read the following extract from an exchange, and see if the suggestions and facts recorded will not add somewhat to her ability in future to prevent any fruit from spoiling. There are no doubt many who from year to year neve have any fruit to spoil; but there are also many who have ill-luck to be on the other side. It is short, but to the point: There are in fruits and cereals, three kinds of sugar-cane sugar, glucose and frucose—all three nearly allied, but to its live weight, but that they live still each one has its peculiarities of its own, and yet one is easily change ed to another. In the growth and maturity of plants these are continually changing. Cane sugar is easily converted into glucose. When it is used for preserving fruits, if the sugar is boiled with the fruit, a large portion of the sugar is converted into glucose, which is not so sweet as omato, now in season, originated in the cane sugar, and the more acid this country because it is so freely nids in converting the cane sugar used here, and that it has become into glucose. Cane sugar will not produce alcohol, but glucose will, The origin of the vegetable, or fruit, and alcohol is very frequently creatas some claim that it is, is not posi- ed in preserves, in which case the tively ascertained, though there is idea is prevalent that there was not reason to believe that it was found sugar enough applied, when the fact in South America, and that it was is it was not properly used. If the
