NEW ALBANY. We have gratified a desire long entertained and visited the above rural borough; perhaps a sketch of our observations may interest some of your readers. The weather being fine, the ride up was very pleasant, although the trains do not make fast time.

From Towanda to Monroe fine farms and tasteful homes adorn the route along Towarda Creek. This is quite an old town, pleasantly situated, and presents to the traveler some evidences of progressive

The road leaves the Barclay line here and follows the south branch of the Creek to its source nearly to Dushore. From Monroe the grade rapidly increases, and we soon leave the level Creek bottoms and enter the narrow valley which

borders the stream. The hills rise to the height of several hundred feet, in places se abrupt that tillage is impossible; at other points by a succession of steps admitting of cultivation. The scenery is both pleasing and grand at points; as you stand upon the rear platform and waich the ever-changing views presented; as you gradually increase the range of vision by ascending higher and higher the rocky slope in the light of a descending autumn son which gives a glory to the changing bues of the forest leaves and ferns upon the billsides near and far away that can only be realized by those

who have witnessed similar scenes. Along the stream the remains of mills long since out of, use, but formerly scenes of hard, poorly rewarded toil; as the early settlers worked night and day to manufacture the logs hauled during the winter before the spring freshets were over.

We pass in sight of some very good farms, made so by years of hard labor, and directly the train halts at Wilcox-a place known to raftmen who used to return by this route from their trips to the lower Susquehanna with lumber. As we gazed upon the old tavern, we thought of the numerous stories we had heard in childhood of the hardships encountered, of seren, \$1.00, per box, for eather, 20.00 per many freely appropriate freely appropri and hours spent in jollifying by those engaged in that almost extinct traffic. No
doubt could the complete history of this and hours spent in jollifying by those en-

and be unfolded, it would interest and read like a chapter of romance. Two or three miles farther, and we are at the place for which we started, and meet at the unpretentious station our friend. Mr. JEWETT FOWLER is the gentlemanly and obliging agent, and we found that a considerable shipping business is done-bark, lumber and farm produce being carried out and merchandise returned. We found evidence of improvement in the newly constructed residences and a large store oncupied by Mr. Corconan, as well as four new residences of good size in course of construction, and much new sidewalk. The principal street is being straightened, and otherwise improved, and a good school room has been provided in which we found during our stay Mr. George Marshall in charge of a large school. The evidence of the engage school is not as the evidence of the engage school. The evidence of the engage school is not as the evidence of the engage school. The evidence of the engage school is not as the evidence of the engage school. The evidence of the engage school is not as the evidence of the engage school is not as the evidence of the engage school is not as the evidence of the engage school is not as the evidence of the firms, timfamily for the Evidence of the Evi ment in the newly constructed residences the county, in the improved methods of teaching adopted through his exertions. Mr. MARSHALL has classes of advanced publis that would do credit to many more pretentions places. Their chief object in gotting a borough seems to have been to afford better facilities for school than they could get without. S. D. STERIGERE the & Co. lead in trade, having a large assortment, and dealing in all kinds of produce. Messrs. Plummer & Sterigere inst year established a brick kiln, but have not made any this year, their old stock not being exhausted. Mr. SAEs his a steam saw mill, and there is also ther mills above and below, including prist mills, but we have lost the names of the proprietors. Two hotels are kept, and two physicians reside here, also blacksmiths and wagonmakers. A harmes shop, shoe shop, and mechanics shops are kept, and all the houses occuried. In company with Mr. George W. PLUMMER, we took a ride to Dushore, a distance of seven miles, through a hilly -country, but containing many good farms. Dushore is a place of considerable busi ness and some good buildings, but we did not stop, so we cannot speak particularly of it. Coming from Dushors towards Al-

BERGER's trout pond, which is said to contain several thousand dollars worth of tish. It is enclosed, but we did have time to investigate the curiosities presented in the immense spring and sprightly fishes. To CYRUS PHUMMER we are indebted for a ride to Overton and back by different routes. The country about Overton reminds one of Smithfield, and the few buildings there are of a good class. They have a good school building, but we did not call. Some very pretty views can be obtained in riding through the country above mentioned, and without so doing no one does not get a correct idea of Albany and surrounding townships, because the railroad follows the creek, and you only see a few of the good farms from it. Schools and churches adorn the section described, and many cultivated people re-

hany we followed the Loyal Sock, or a

branch of it, a mile or two, and come to

north and the other south, and after long

tortuous windings unite again at North-

Mrs. HANNAH VANLOON, living a couple of miles east of New Albany, has now in press a volume of poems composed by

side there.

its sides and ravines.

One point of interest we will mention, and that is Hatch or Huckleberry Mountain. It is reached by a wagon road turning to the right as you go from Monroe to Albany, and from the latter place bounds the view to the northwest. It is a large tract of comparatively worthless land, though much timber is found upon

We will give a sketch of a political meeting held on Thursday and close. The Republicans had obtained a spruce pole from Lycoming County-having to haul it twenty miles-and after dressing and painting in Union colors, invited speakers from Towanda to be present at its rais- ever. ing. It was a fine pole, one hundred and It restores gray or faded hair to its youthful twenty feet above ground, and being de color. corated with a thirty-six foot streamer and the scale by its use becomes white and clean and nice than. No town in the county By its fonfe properties it restores the capillary could say they had better. Seven or eight hundred people came to hear the speech.

And making the hair grow thick and strong. es, and heard good ones from Senator Da- or destrable. VIES and Colonel OVERTON. The Liberty Corners Cornet Band and Excelsion Band of Monroeton discoursed excellent music for the occasion, and all were well BUCKINGHAM'S DYE.

From Albany the passenger coaches run to Monroe by the force of gravity. Pleased with our visit, and at the improvements, we shall be more anxious to change the color of the heard from gray or any virit the place in future than in the past: cretion. It is easily applied, being in one prepara W. A. P.

RETURN equity and justice for evil done to you, and pay goodness by good As large a demand is made on our faith by nature as can be made by miracles.

It is well known that hot weather brings sickness and that the

greatest care is necessary to prevent disorders even on the part of

those most healthy. What there is in the heat that should cause

disease cannot certainly be known, but cholers, dysentery, debility,

lassitude, vertigo and many other sudden and dangerous maladies

come every season and cause great suffering and thousands of

deaths. Few people go through the summer without unpleasant

symptoms. The mouth becomes dry and parched, the tongue fur-

red with white, the pulse irregular, the head feverish, the body

cramped and the limbs swollen and tired. Ladies especially, with

their natural delicacy and tendency to female troubles, find the hot

weather almost unbearable; while little Children are dying every

day from exhaustion and because Parents neglect precaution and

care. A prominent and well known physician of New York asserts

as his positive belief that more than three-fourths of all so-called

Summer complaints arise from disordered secretions, and that these

secretionary organs, which, by being out of order cause so much

trouble, are the kidneys and liver. The brain controls the life, but

There is one, and only one known vegetable that will absolutely

regulate and control the Kidneys and Liver at all times and thus

prevent the many dangers of the Summer. That vegetable (a West

India leaf,) is used as the basis of Warner's Safe Kidney and Liver

Cure. It is pure, pleasant to the taste and absolutely certain in its

results. It keeps those who intelligently use it in perfect health,

and cures those whose secretions are derauged. For all urinary

complaints of either sex it is infallible. For all billious troubles it

is certain. For the hot season it is invaluable and every person of

care and intelligence should not fail to keep Warner's Safe Kidney

and Liver Cure near at hand, and use it upon the approach of the

slightest symptoms. It may save your life or that of some other

friend; it will certainly prevent much suffering. It is for sale by

druggists in all parts of the world, we careful and take no other.

the lower part of the body rules the health.
