A Young lady has a Sunday-school class of rather bright boys averaging between seven and nine years. Recently she requested each pupil to come on the follow ing Sunday with some passage of Scripture bearing upon love. The lads heeded the request, and in turn recited their verses bearing upon that popular topic such as "Love your enemies," "Little children, love one another," etc. The teacher said to the boy whose turn came last, "Well, Robbie, what is your verse?" Rising, he responded, "Song of Solomon second chapter, fifth verse-'Stay me with flagons, comfort me with apples for I am sick of love." =

A MANUFACTORY for turning out bone less codfish has been started in Boston It is an industry that should be encour aged, and it should also be persuaded to include shad in its products. If it can cap ture all the shad in all our rivers, remove the Lones, and then replace the fish in the waters, it will have accomplished a great er work in the cause of religion than if it had built a cathedral costing ten million dollars. A boncless shad would not en courage profane thoughts at the breakfast table and make more backsliders in a month than could be reconverted in a year .- Norristown Herald.

WITHIN a very short period Colonel Thomas A. Scott, who has always enjoyed a-reputation for munificent deeds, has bestowed the sum of \$150,000 upon four of Philadelphia's most favored institutions. The Orthopedic Hospital receive-\$30,000 of this princely gift, while \$100.-000 of the amount is divided between the Jefferson Medical College and the University of Pennsylvania in equal sums. The gift of the University of Pennsylvania has enabled the Trustees to endow the chair of Mathematics, now occupied by Professor Kendall. The like sum to the Jefferson Medical College is also to endow professorship. The remaining \$20,000 is given to the Episcopal Hospital.

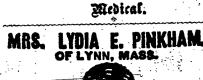

A YOUNG Bible student was asked "How many boys are there in your class?" He replied: "If you multiply the number of Jacob's sons by the numher of times which the Israelites compassed Jericho, and add to the product the number of measures of barley which Boaz gave Rut, divide this by the number of Haman's sons, subtract the number of each kind of clean beasts that went into the ark, multiply by the number of men that went to seek Elijah after he was taken to leaven ; subtract from this Joseph's age at the time he stood before Pharaoh, add the number of stones in David's bag ber of furlougs that Bethany was distant from Jerusalem, divide by the number o anchors cast out when Paul was shipwrecked, subtract the number of persons saved in the ark and the remainder will be the answer."

A soon story is told of General Hatnam, the Revolutionary hero, in Forney's "Ancedotes of Public Men." 'He accepted a challenge and fixed the time, and as his antagonist approached he was greeted with a shot from Putnam's gun at thirty rods. As Putnam was reloading his piece his adversary approached and said, "What are you about to do? Is this the conduct of an American soldier and a man of honor?" 'What am I about to do?' was the reply of the general; 'a pretty question to put to a man you intend to murder! I am about to kill you: and if you do not fight in less time than it takes old Heath to hang a Tory you are a gone dog.' Of course the other turned and ran away. The second affair was with a British officer who challenged him. Putnam accepted, fixed the time and place, and when the Englishman found him he was seated near a barrel, apparently containing powder, smoking his pipe. The general requested him to take a seat on the other side of the cask, and then set fire to a match communicating with the contents of the barrel. The officer looked at the burning fuse and retired. As he moved off the general said : "You are just as brave as I took you to be; this is nothing but a barrel of onions with a few grains of powder on the top, to try you by: but you don't like the

The New York Telegram of March 29th says: "A startling discovery was made in Hoboken to-day in the post mortem examination on the death of Mrs. Adolph Bonhois, of 211 Washington street. It was found that she had been literally eaten alive by trickina, from the effects of which she died on Sunday evening. Her husband is now sick with the disease, and not expected to live. They were both taken sick shortly after eating some raw ham, which was purchased of a neighboring butcher. Dr. Kudlick, who was the attending physician, said: 'It is a real case of trichinois, and the result of the post mortem can be seen under the microscope. I was called to see Mrs. Bonhois tifteen days ago. I found her suffering from cramps and in great pain. She refused to eat, and could retain nothing on her stomach. I first thought the symptoms first showed cholera, but in a few days her limbs commenced to-swell and disclosed evidences of an animal poison. I questioned her closely, and found that she had been eating raw ham and sausage, and at once decided that it was trichina. I did all I could for her. She gradually declined and died in great suffering Sunday night. Her husband has the same symptoms, and is now very sick. I am in hopes he will live through it, as he is a very strong man. The post mortem satisties us that the disease is trichinois in all its aggravated forms, and that the woman was eaten alive. I have had sixteen cases like this in my twenty-six years' practice in Hoboken, and this is the first fatal case. It is the result of eating diseased pork." A DISPATCH from Madison, Wisconsin,

dated March 29th, says the Governor of Wisconsin to-day signed the bill-recently passed by the Legislature prohibiting the practice of "treating." The bill provides that any person who shall hereafter ask that any person who shall hereafter ask another to drink at his expense, or any person consenting to drink at another's expense, skall be liable to arrest and punment. When the bill was introduced into the Legislature it was referred to as a sense-less and impracticable idea, and nobody thought it would become a law. It has only attracted attention since it has
