DRIFTWOOD. THE EASTER HEN. O children, have you prer som The fittle Easter hea, Who comes to lay her postty aggs.
Then runs away aggla? She only comes on Easter Day,

And when the day is o'er, Till next year brings it round again." You ne'er will sée ber more. Her eggs are not like common eggs, But all of colors bright,

Bine, purple, red, with spots and stripes, And scarcely one that's white. She lays them in no special place, On this side and that; And last year, only think, she laid

One right in Johnny's bat ! Mount Baker, in Washington Territo ry, is in eruption after having remained inactive for nearly twenty years. The summit is surrounded by a dense volume of smoke, while hot cinders, ashes, and lava are being thrown frum its crater The streams of fire make a magnificent spectacle at night, and illuminate the heavens for miles.

AT the recent opening of the Nevada Legislature an Eastern minister was invited to perform the religious service. He accepted the call and closed the ceremony with the Lord's Prayer. When he had finished, State Senator, Doolan turn ed to Senator Hammond, and remarked audibly: "He stole that prayer, and I'll bet on it. I heard it almost word for word in Eureka at a funeral over ten years ago."

THE venerable argument against the use of tobacco, that if invariably makes the lower animals sick? would fall to the ground if a certain St. Louis rat were a brought forward as an illustration. That singular creature is the pet of the tobacco-shop in which he has taken up his abode. Seated upon a pile of leaf tobacco, he nibbles away as if a bit of toasteu cheese were the viand before him. He is sleek and plump, and possessed of extraordinary intelligence. His moral character, too, is excellent, aside from this one besetting sin.

THE late Professor Henry is quoted as once saying that there was not a city in the world that could produce so many able, cultivated and learned men as Washington; and in support of his statement he said that he had occasion to have a scientific document translated into thirteen different languages, and he had not the slightest difficulty in finding individuals connected with the administration of the Government who were able to translate quickly and easily the document into all those languages.

A REMARKABLE case of abstinence from food is reported at Battle Creek. Michigan. Last October Mrs. Henry Ingram had some teeth pulled, and this brought on nausea at the stomach and inability to retain food. The woman is still alive, having eaten or drank nothing since October. She is nourished by being bathed in beef tea, milk, etc., which acts by absorption, the quantity absorbed by these baths being nearly a quart a day. She feels a sort of hunger, which is soon allayed by a bath, after which she feels as if she had eaten. A bath of water will quench her thirst. Her stomach is said to be totally paralyzed.

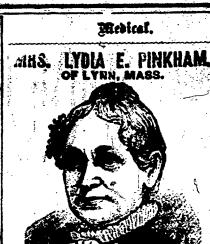

THE thief who would capture the prize for audacity now languishes in durance vile in Richmond, Virginia. He was convicted of stealing a mule, and had just toceived a sentence of four years in the penitentiary; but, regardless of the lessons imparted by the grave Judge in his charge, and his prospective incarcoration, he gathered in a convenient hat belonging to one of the jurors who had convicted him and secreted it under his coat. The act was witnessed alike by court, jury and spectators, and the gravity due to the halls of justice was considerably disturbed by the shouts of laughter which followed the ludicrous scene.

WE frequently hear of hermits who voluntarily isolated themselves from their fellow-men, says the (Colorado) Flume. but rarely see them, because for the most part they exist only in imagination. Men working in the mines in high altitudes come as near to this complete isolation from all but a handful of their fellows as any one could wish to. There are various notable cases of this kind that have occurred in the mines of Mounts Lincoln and Bross. For instance, Fred Pitman, a miner on the Dolly Varden, who was in Alma last Saturday, had then left the mountain for the first time in one hundred and forty days, and relates that at another time he was not off Mount Lincoln for two hundred and ninety days. Even this stretch of time was eclipsed by Uncle John Borders, of Fairplay, who remained on the north spur of Mount Lincoln for three hundred and ninety-five days. He went up heavily in debt, and vowed he would not come down until he was free from it. At the end of thirteen months he was several thousand dollars ahead of the game.

A WOMAN who lives in Ashville, Alabama, writes to the Ægis of that place of the miraculous rescue of her little threeyear-old boy from drowning. The child fell down a well, the depth of which was thirty feet. The mother saw him go down. She says: "On reaching the well I was just in time to see him rise to the top of the water. I was alone, save three other little children, whom I sent for help. I had, amid all the anguish of my soul, presence of mind enough to let the bucket down and tell him to take hold of it, which he did. After some minutes he let loose from weakness, sank again, except his little head. I lowered the bucket lower, telling him to take hold of the rope. He ran his hand through a ring tied on for the purpose of sinking the bucket, and caught the pail, and there he held on for one and a-half hours, begging me all the time in his baby talk to come down and help him out. I would eay, 'Hold on, Bobbie.' 'I will,' he would reply. At length a lady came to my assistance, and we took a rope and made a noose on the end of it, and letting it down, told him what to do. He put his foot through the noose and drew it around his knee. I asked him if he could hold on. He said he could hold on to the bucket. 'Draw me out.' He holding the bucket, the rope around his leg. I telling him not to let go, we drew him up until I could reach his little shivering hand. Thus I saved my little baby from drowning. Safe to my breast, I clasped his little shivering body, and praised God for his mercies."

A party of cowboys who were creating a disturbance at O'Neill City, Holt county, Nebraska, last week, were partially disarmed by Sheriff Bernard Kearns and went away. They soon returned, however, and one of the party, named Harry Deans, shot the Sheriff through the heart. A deputy aberiff also was wounded.

ALL the Williamsprot saw mills have been put in first-class condition for work,

LYDIA E. PINKHAM'S VEGETABLE COMPOUND.

The Positive Cure For all Female Complaints, This preparation, as its name signifies, consists of Vegetable Properties that are immiles to the most de-icate invalid. Upon one trial the merits of this Com pound will be recognized, as relief is immediate, and when its use is continued, in ninety-nine cases in a hun-dred, a permanent curels effected, as thoughnds will tee

ify. On account of its proven merits, it is to-day re the country.

It will cure entirely the worst form of falling It will cure entirely too worst regal or same of the uterus Leucorrbos, trecular and painful Renstruction, fill ovarian Troubles, Indisimation and Ulceration, Floodings, all Displacements and the consequent spinal weakness, and is especially adapted to the Change of Life. New business, \$35,170,805; the largest amount issued by any company in 1880. III policies INCONTESTABLE after thre years. \$4,806,000 paid to Policy-bolders in 1889. NOT A CLAIM

Tontine Savings Fund Policies may b terminated at the close of certain defined periods, on terms more advantageous than upon any other plan. These policies prove more profitable to the policy-holder than any other form of insurance. Said a man, whose westiegone countenance and broken-down constitution plainty showed traces of disease—a sufferer with Nervous Dyspopsia, in whose atomach the most delicate musei lay liae lead. Refreshing sleep and quiet nerves were strangers, and he despaired of ever ocing well.

For full particulars of TONTINE, and all other orms of policy issued by this Society, apply to JOHN D. STEYKEE, Agent, At First National Bank, Towanda, Pa. .. C. Coe, Manager, 120, Broadway, N. Y. Mr24

Burchill Brothers' Reader, if you are suffering with Dyspepsia or Liver Disease in any form, do not wait until the disease has taken a fast hold upon you, but use the Regulator when the symptoms first show themselves. It has relieved untild suffering. SIM-MONS LIVER REGULATOR is not an alcoholo attendant, but a FURELY VEGETABLE REMEDY that will cure when everything else fails. It is a faultiess family medicine. Does not disarrange the system. Is no violent drastic purge, but usturn's own remedy. The friend of everyone, and will not disappoint you. A single trial will convince you that it is the cheapest, purest and best Family Medicine in the world. MARBLE WORKS . Manufacturers of

The Action of Plaster. Plaster, although well known to straw, though the berry may not altermers as a fertilizer, is so mysteri- ways be satisfactory. I believe genous in its action that many of the wisest agriculture philosophers have the berry is best on sandy soil, being admitted it to be only an absorbent plumper and of better quality. The of ammonia, while others contend that it combines with it. The question is ket, is about of equal value with the often asked: "What effect has plas-grain. Rye can be harvested early ter on the manure heap?" Mr. Gree-in the season, affording a chance to ley went so far as to affirm that plaster altracted ammonia, not only in the manure heap but directly from the atmosphere; but there are those still a chance for rye to be sown in who do not assent to his view. Plast the fall. Manure must be applied at ter is sulphate of lime, being a compound of sulphuric acid and lime, either at the summer or fall seeding or both if needed. is not easily broken up. In the laboratory ammonia does not drive the lime away from the sulphuric acid which clearly shows that it does not react by giving up its lime so easily when mixed with manure. The supposition is that sulphuric acid parts rom the lime and seizes the ammonia, thus forming sulphate of ammonia, while the lime, being freed from luxury.

the acid, is converted by the carbonic acid. which is constantly being generated, into carbonate of lime. Plaster shows wonderfully on clover, giving the same result that ammonia (guano) produces on wheat and corn; (guano) produces on wheat and corn; ver them, boil slowly, and skim nice-but when we stop to consider the ly. When tender, throw in a tableeffects of the plaster on clover we spoonful of salt and piece of butter cannot admit that the benefits were as large as a coffee cup. Take out obtained by the attraction of ammo nia, for it is now clearly demonstrated that ammonia is not a special fertilizer for clover, but lime is one of its the chickens were boiled in. Stir it principal necessities. It is the lime well, and let it boil about five minthat imparts the benefit; and in the utes, then remove from the fire. case of clover we plainly see that the theory of its being the means of supplying ammonia is not confirmed. rious with it is the fact that, unlike ordinary slaked lime, but a small
