A popular dancing master there who had taught, the young Tennysons was one day crossing to the mainland in the same boat with their mother. ONE TOUCH OF NATURE, A burglar entered a house in which mother was sitting up with a sick child "Sir," she said to him in a whisper, as soon as she could compose herself to speak, "there is nothing of value in this house except that child's life, at least to me, but you may find otherwise. On top of these, thirty feet from the ground, imbedded in the solid timber and looking, from the rings around it, as if it had been there for ages, was found the thigh-bone of an adult human being, presumably a man's. Let it be borne in mind that this bone was in a solid-log, though too short for a saw-log; that the timber all around it was green; no knotholes or dead wood. How did it get there? When discovered one of the men struck into it with the bit of an axe. The axe broke and the piece is still firmly imbedded in the bone.
