COUNCIL PROCEEDINGS.

A regular meeting of the Council held August 1st, 1881, the following members were present, W. G. ALGER, Burgess, Frost, Gordon, Holcomb, McCabe, Rahm and Spalding.

The minutes of the last meeting, read and approved.

Petitions were presented for the further improvement of State street, For the removal of fifth from Main street between Pine and Bridge streets and a petition from Martin Bennis for a small compensation for the time lost by an accident which occurred to him while laboring for the Borough. On this petition Councilman Holcomb submitted the following resolution:

Resolved, That Martin Bennis be allowed \$100 for the time lost by an accident which occurred to him while laboring for the Borough. This resolution was adopted.

The petition for the removal of fifth from Main street was then considered. Councilman Gordon said that the managers of the Water Works were responsible for the nuisance complained of, that at all points where water was taken across the gutters into buildings, the dirt was thrown loosely back and a ridge left, thus creating a nuisance, and preventing the water from running off.

A water main running off the street was manifest in every part of the borough; pipes were bursting in all directions, and from the condition the streets were left in, after the breaks were repaired, it seemed to him a waste of money to make any further effort to improve the streets of the borough.

In motion, the Secretary was directed to notify the Superintendent of the Water Works to remedy the evil complained of in the petition; and to abate the nuisance complained of in all parts of the borough. Bills amounting to \$708.43 were presented, approved and ordered paid.

Police Justice Codding reported nine arrests during the month of July, all for drunkenness. Adjournd.

J. KINGSBURY, Secretary.

FREE SCHOLARSHIP.

The Pennsylvania State College, located in Centre County, has established fifty scholarships, one for each Senatorial district in this State. Candidates for admission must pass a competitive examination, in English grammar and science, geography, both physical and descriptive, arithmetic, algebra, to quadratics, and plane geometry, four books. Candidates, for admission to the classical course, must pass an examination in the foregoing branches, and must also pass an examination in Cassius's Greek grammar, Cicero's orations, Xenophon's anabasis. Candidates for admission must be at least fifteen years of age. Scholars admitted under this arrangement are exempt, in addition to free tuition, from the payment of all other college charges, for instruction, room rent, fuel and use of furniture.
