ABOUT THE CHURCHES. THE OLDEST MEETING HOUSE IN AMERICA.—At Hingham, Massachusetta, on Monday of last week, there was a notable gathering of men in the "Old Hingham Meeting House," to celebrate the two hundredth anniversary of the building of the church. Governor Long, Professor Charles Eliot Norton, of Harvard College, Mr. R. H. Stoddard, the poet and essayist, the Hon. George B. Loring and many other well known men, both clergymen and laymen, of Boston, were present and delivered addresses. The exercises were held in the church, which is the oldest now standing in America. The building has what is called a "hip" roof, with a balastrade around the top and with a hexagonal bell tower surmounted by a spire-shaped steeple rising from the centre of the roof. It is in the shape of a parallelogram, seventy by fifty-five feet, and has a seating capacity of 700. Built in 1691, the church was first enlarged in 1829, again in 1755, and lastly in 1869. The old frame is intact. The main timbers are of massive oak, and the building looks solid enough to stand for 200 years to come. The floors formerly rested on the ground, and the present sexton remembers when the toad-stools grew through the cracks in the boards. The church was not warmed until 1822. On the right of the old-fashioned pulpit is a tablet of brass bearing the following inscription:

LET THE WORK OF OUR FATHERS STAND. MINISTERS. Edward Augustus Horton..... TEACHER.

Robert Peck This church was gathered in 1835. The frame of this meeting-house was raised on the 26th, 27th and 28th days of July, 1691, and the house was completed and opened for public worship on the 8th day of January, 1651-2. It cost the town £439 and the old house. Professor Norton was the orator and

Mr. Stoddard the poet of the day. Of the sir. Stoddard the poet of the day. Of the chergymen who have been connected with MALARIA! they least imagine it is the church one was a graduate of Magdalen College, Cambridge, four were from Harvard, and one came from Dartmouth. The Rev. Calvin Lincoln, who is now pastor of the church, is a descendant of the Hev. Peter Hobart, the first pastor. The time, great suffering, wretchedness and death will Rev. E. A. Horton was associate pastor of the church for three years. In the course of his addres: Governor Long referred to the remarkable fact that during the 250 years existence of the parish six ministers span the whole period.

THE SPURGEON FAMILY .- A London

gives the following pleasant description from attack! of an interesting incident in the experience of the Spurgeon family : "Mr. Spurgeon has this week kept his forty-seventh binthday anniversary by a great meeting and stone-laying for his new orphanage for girls. It is quite wonderful how the money is sent to him, to carry on his orphanage especially. His brother, the Rev. James A. Spurgeon, on June 8th kept his forty-fourth birthday at Croydon in a regeon has this week kept his forty-seventh forty-fourth birthday at Croydon in a remarkably interesting manner. Some twelve years ago he commenced a new Baptist cause in that popular suburb of PREPARED ONLY BY J. H. ZEILIN & CO. London in an iron chapel. The cause advanced, and they had to remove to a large MEAT MARKET. SWARTS hall for Sunday services. Still the church extended, and a large new chapel became a necessity, which has been opened some time, and the members, 330 in number, resolved to clear off the debt by the pastor's birthday in 1881. They succeeded, and held a joyous meeting on the occasion. John Spurgeon, the father, and his two sons, Charles and James, were all 🚁 there, and spoke ; and Charles, the grandson, would have been there, only a public preaching duty occupied him elsewhere John Spurgeon described himself as rush-light in the presence of his sons, but he called the occasion a hallelujah meet ing. Charles jokingly told his brother that, although three years younger, he really looked older than he did, adding that beauty soon fades, and he remember ed his old, Aunt Ann Spurgeon saying: 'Charles, that proverb will never affect you, as you have no beauty to fade.' It was an enthusiastic and happy meeting."

THERE is a conflict between the ritual- HIGH GRADE BONE MANURES. istic party and the supporters of the rector of Holy Trinity Church, in Toronto. The rector, the Rev. John Pearson, has declared that certain changes in the form of worship should be made. Among the practices which he thought should be done away with are "the elevation of the elements after their consecration," "the use of the lights on the Lord's Table when not required for the purpose of giving light," and "the use of vestments other than those enjoined by the canons." The ceremonies, he thinks, should be brought within the form prescribed by the Book of Common Prayer. The ritualistic party has protested against the carrying out of the proposed changes. The Toronto Globe thinks it is evident Crockery and 99-Cent Store that a turning point in the advance of ritualistic practices in the Church of England in that diocese has at length been reached. "Holy Trinity," it says, "came to be regarded as leading the van of Ca- Ice Cream Freezers! nadian ritualism, and formed the centre s of opinion in favor of continued advances in this direction. That a movement should now have been developed looking to the discontinuance of some of these innovations and a return to greater simplicity of ceremonial is significant of an important change in ecclesiastical senti-

THE English Church Congress, which is to be held at Newcastle-on-Tyne, be ginning October 4th, will be memorable on account of the number and importance of the questions which will come before it. A paper is to be read the first evening on "The duty of the Church in relation to the prevalence of Spiritualism," and Canon Wilberforce is expected to speak upon this topic. Papers are to be read by the Bishop of Carlisle, the Dean of Manchester and others upon the important subject of the connection between the Church and the State, and Canon Farrar and Mr. Thomas Huges are expected to speak. The relations of the Church to the various social movements of the age and to the opium traffic will also be discussed. The Archdeacon of Oxford, Professor Plumptre and Rev. Dr. Sanday will consider the claims of the revised version of the New Testament to general acceptance. These are all live questions, and the meeting at which they LONG'S MILLS. are to be discussed bids fair to be a remarkable one.

THE work of the American Baptist Publication Society in preparing an edition of the Revised New Testament with the readings of the American Committee incorporated in the text, is commended by the Baptist Weekly. "We think it is a mistake, however," it adds, "to issue it with the imprint of any man's name as any milling establishment in the country. by the Baptist Weekly. "We think it is a editor. With the highest respect for excellent and able President of Crozer Theological Seminary, we can see no propriety in placing his name on the title page of the New Testament as editor."

TCHING PILES-SYMPTOMS AND CURE Traines Piles—Symptoms and time.

The symptoms are moisture, like perspiration, intense liching, increased by seratching, very distressing, particularly at night, as if pin-worms tressing, particularly at night, as if pin-worms were crawling in and about the rectime; the private parts are sometimes affected; if allowed to continue very sortions results may fellow, for continue very sortions results may fellow, the private particular and fellow, and fellow, for Tetter, Itch, Ealt Rhouse, feath Head, Erysipelas, Barbers lich, Blothes, all felly, Crusty, Cutaneous Eruptions. Clothing. SPRING AND SUMMER!

The Jointer can be shifted so as to take more or less land, and it can always be kept on a line with the Flow.

The wheel will run under the beam or one side of it as desired, and always keep in line.

The beam is adjustable for Spring or Fall Plowing, and also for two or three horses.

The handles can be adjusted to accomodate a man or boy on the same Plow.

It is the Lightest Draft Plow ever made.

Wooden beams are going out of use because they shrink, swell, and warp, and never run two seasons alike. Iron beams are too heavy.

Malicable beams become demoralized and bend, which is worse than to break.

A Steel beam is the necessity of the day. It is three times as strong, and very much lighter than any other style.

We de not paim off on them a composition of various metals and call it chilled metal.

We want agents for this new Plow in every town in this state.

We can give but a very small discount to them, but we will pay the Rairroad Freight.

We propose to place this Plow in the hands of the Farmers as near the cast of manufacture as possible.

It is the best Agricultural Implement ever sold. It is the chapest.

Persons, therefore, who are not willing to act as agents on the principle that "a nimble sixpence is better than a slow shilling," need not papily for an agency.

No Plows on commission. All sales absolute.

We make Right and Left Hand Plows of all sizes. Also Side Hill Plows.

For This is the only Steel Chilled Plow in the World.

Steel costs several times more than Iron. But this Plow, full rigged, by giving small discounts, can be sold for Seventeen Dollars, compare this price with that of any Iron Plow ever made.

Where there are no agents, we will, on receipt of Seventeen Dollars, send a Plow to any Railread Station in the State, and pay the freight. Address

tertaining the meeting. The meeting adjourned at 10:15 to meet again in November. I would say something about our entertainment but my pen is incompetent to do it justice. Will say

that it is unsurpassable. DWIGHT KELLUM, Secy. Advantages of Graded Animals.

Col. F. D. Curtis in Rural New Yorker. A mongrel sire of any kind should never be used. If a farmer is not able to purchase a thoroughbred alone he should get others to unite with him and make a joint purchase, dividing purchase price and cost of the wants of the community. If interest, then a breed of cattle should be selected which will furnish the largest yield of milk and this selecttricts the Ayrshires will be found to be the best adapted to the purpose, on account of their smaller size and their ability to take care of them-selves, and to furnish the largest yield of milk on shorter feed. Where the pastures are luxuriant and the feed is abundant the Holsteins will give satisfaction. These are the most valuable cheese producing cat-tle. We know of crosses of the Ayrshires upon the natives which have demonstrated their value. These grades all made superior cows, and one of them so wonderfully combined the flow and quality of milk that she would make eighteen pounds of butter a week. Where cows are kept for butter a selection of either the Jersey or Guernsey cross should be made. Seventy years ago an Alder-ney bull produced a heifer calf which was reared and all her female progeny saved. At this day the descendants are kept in the family of the owner of the original heifer, and are still noted as extra good cows, and the marks of the Alderney breed can be traced, as well as the superior merits. Nearly half a century has lapsed since Henry W. Delarow imported from England two cows and a bull, "Durham" cattle. These cows were good milkers, and recent-

y I saw two cows, descending from this importation, which showed the old Durham type in great perfection,

although several generations remov-AND LOYAL SOCK COAL. ed by crosses upon natives, and they were remarkably good cows. Another farmer began with a half-breed Jersey Lowest prices for cash. Office and yard foot of Pine-street, Towards.
