In addition to the resolutions adopted it was urged that the early record of the Republican party was one of advocacy and championship of human lights. That our constitution granuees to the people their indefeasible lights, among which are enumerated that of life and liberty in the pursuit of happiness, and the right "to alter, reform or abolish their government in such manher as they may think proper." That to deny them the opportunity to exercise the right is practically equivalent to deanying the right it elf. It is saying we

Synopsis of a Lecture Delivered by Mrs. Dr. Kenton, Before the Woman's Society of New England.

From the Home Journa', New York.

In all ages of the world, poets, scientists, and men of pron inence have looked with enthusiasm often akin to reverence upon woman; but it is only within the last few years that she has begun to assume her right place, not only in society, but with the world in general. Why so desirable an end should have been so long delayed it is difficult to under stand; but that it has at last come is certainly cause for gratitude. In her social sphere, in her mental development and especially in her physical improvement, woman has shown wonderful ad ancement and such as astonishes the world.

Improvement, both as regards wear and strength.

The vincel will run under the beam or one side of it as desired, and always be kept on a line with the Plow.

The beam is adjustable for Spring or Fall Plowing, and also for two or three horses.

The handles can be adjusted to accommend a man or boy on the same Plow.

It is the Lightest Bratt Plow ever made.

Wooden beams are going out of use because they shrink, swell, and warp, and never run two seasons alike. Iron beams are too heavy.

Malleable beams become demoralized and bend, which is worse than to break.

A Steel beam is the necessity of the day. It is three times as strong, and very much lighter than any other style.

We do not palm off on them a composition of various metals and call it chilled metal.

We want agents for this new Plow in every town in this state.

We can give but a very small discount to them, but we will pay the Raliroad Freight.

We propose to place this Plow in the hands of the Farmers as near the cost of manufacture as possible.

It is the best Agricultural Implement ever sold. It is the cheapest.

Persons, therefore, who are not willing to act as agents on the principle that "a nimble sixpence is better than a slow builling," need not apply for an agency.

No Plows on commission. All sales absolute.

We make litely and Left Hand Plows of all sizes. Also Side Hill Plows.

For This is the only Steel Chilled Plow in the World.

Steel costs several times more than Iron. But this Plow, full rigged, by giving small discounts, can be sold for Seventeen Dollars, when they are no agents, we will, on receipt of Seventeen Dollars, send a Plow to any Mallead it then the State, and pay the freight. Address
