That the people of Tunkhannock are still sanguine of finding oil, notwithstanding the failure of the Lovelock attempt, is evidenced by the following, which we clip from the *Democrat* of last week: "We understand a project is on foot looking towards the location of an oil well, or rather a well wherein it is hoped oil may be found, on the property just north of Hugerfer's planing mill, in this place. The necessary power for drilling is to be furnished by Mr. Hugerfer, from his engine."

It has been discovered that perfumes exert a healthy influence on the atmosphere, converting its oxygen into ozone. Cherry, laurel, clover, lavender, mint, juniper, fennel and bergamot develop the largest quantity of ozone. Flowers that emit perfume do not develop it, but the flowers of mimosa, magnolia, honeysuckle and lily of the valley develop it in close vases. Odorous flowers, cultivated in marshy places, would be valuable in purifying the air.

The dog was shortly after shot and killed.

"LEFT HANDED men" was Rev. Mr. Conde's subject at the Presbyterian Church, Tunkhannock, last Sunday evening. Bright and interesting. It is quite evident that, at last, "Greek has met Greek." The *Journal* has the floor.

Two drunks a day, remarks an exchange, will supply a family with flour. This is all very well indeed, but what is twenty cents worth of flour good for?—*Elmira Advertiser*. The *Advertiser* and its exchange, which extended over a day never supplied flour to any family in which the drunks were consumed; but two drunks have often taken flour from four Mr. *Advertiser*, is good for four loaves of bread. If you were ever hungry you would know that what a loaf of bread is good for.

A NEW theory as to the cause and spread of pink-eye is now being advanced. It is believed that owing to the drought of last summer, which extended over nearly every section of the country, a larger amount of dust, grit and refuse matter than usual settled upon the hay crop, and that this hay, fed to a perfectly healthy horse, produces irritation and consequent disease. It is further believed that if hay is wet thoroughly before being fed to horses there will be less probability of the animals taking the disease.

JAMES GARRABRAT, a farmer of Chemung, who lived on the Dry Brook road, was instantly killed by Erie's express train No. 8, on Wednesday, while trying to cross the track near Herkimer. He was wearing a very hard hat, and it is supposed he did not hear the train. As the Lehigh express was following, the train did not stop, but the Lehigh brought the body to this station. Mr. Garrabratt had lived in Chemung county since 1840, and would have been 70 years old next August. He leaves a wife and one son.—*Waverley Free Press* 24th inst.

A Bradford City paper gives the following account of an accident that recently befell a former resident of this place: "About two o'clock yesterday afternoon, David Waters, who lives at 69 Corydon street, near Bushnell, and was formerly of Bradford County, met with a serious accident while working on a rig on Geo. Mulsch's lease, up the West Branch. While the men were lifting the sand reel into position last night, striking Waters on the left leg, producing a compound comminuted fracture midway between knee and ankle. The injured man was taken to his home and attended by Dr. Ailing." At last accounts it was feared the limb would have to be amputated.

On the first of April Mr. Charles Fetell will enter the employ of W. G. Tracy as book keeper. Charles has filled the same position with N. P. Hicks, most satisfactorily, for the past year. Dr. S. H. Sherif, of Monroe Smith, has been quite ill recently and has been stopping for several weeks at Towanda for medical treatment and to rest, away from the perplexities of work. He is improving, though still weak. He returned home the last of the week and received a set back which is probably only temporary and his numerous friends will expect to see him about as usual.—*Troy Gazette*.

W. H. Brown, of Rome, an experienced engineer and teacher, who has been in Colorado for the past six months, paid us a pleasant visit yesterday on his way to Rome to visit his family. Mr. B. holds a lucrative position in the coal department of the Union Pacific R. Co., and is well pleased with the West. He will return to Denver with his family in a few weeks. Such men can ill be spared at the East, but help to make the West prosperous.—*Review*, Tuesday.

Miss Minnie Ballard, of Troy, Bradford County, has turned her attention entirely to literature, and expresses her only subject worthy of attention of an intelligent man in this respect, is a young lady of decided talents and has written some very pretty things for the Press, which have appeared in the Philadelphia and New York papers, and in the magazines.—*Bradford Watchman*.

Mr. and Mrs. A. M. Cornell, who have had charge of the County House since it was opened for the reception of the paupers, have concluded to return to their farm in Columbia. It was the desire of the Commissioners to retain them, feeling that they were the right people in the right place and that their administration had been very satisfactory. To the efficiency and carefulness, the kindness and courtesy, especially to the kindness of heart of Mrs. Cornell, who has been a mother to many of the weak, wretched and unfortunate there, much is due in the success of the poor house.—*Troy Gazette*.

A few minutes spent in the Sayre Shops recently, showed how systematic and business like the work is conducted there, and how very small the chances for mistake, fraud, or misunderstanding in regard to any item of expense.

In the morning at ten or fifteen minutes before seven, every man reports at the office who is ready for work; and he is marked by number as on hand. If any man fails to report before seven he is obliged to wait an hour and commence at eight. At five minutes past seven, all reports are again marked, and any delinquents being compelled to lose an hour. In the middle of the forenoon, and also in the afternoon, an inspector goes around to see that the men are all on hand and at work, and marks them by number. In this way it is impossible for any one to be away over two or three hours without detection.

The men are all numbered and the work which they do, all shows exactly upon what it was done and how much time was consumed upon each job.

Each engine used upon the road has a separate account, showing how much it costs for coal, oil and daily running expenses; how much for repairs, etc.; and how far it runs. In this way the company gets a general idea of the respective value of different engines; their strength and capacity for continued service. The books show what man worked upon each piece of work; and how long so that in case of defective work the person doing it can be readily discovered. The material used is also closely classified, showing clearly what is used and the expense, and if anything falls the blame can be distinctly traced to the proper cause. Nothing is omitted in this system, and each piece of the expense of an engine or any of the machinery; or upon the conduct of engineer and workmen regarding the careful, economical discharge of their duties.

The system of book-keeping seems perfect, and after a balance sheet is taken there is scarcely a possibility of mistake. Everything is systematic, and classified with such particularity that a novice can readily understand the practical workings of the plant, and see the benefits secured by the men, without their knowledge or their own slight work without discovery; and the dealers who furnish them with material cannot supply poor without being found out. Each engine has a debit and credit account; and no engineer can be reckless or extravagant without the officers' knowledge. The men who originated and perfected this system, and do not care credit for their skill, and we do not see how it can be improved upon.

We are indebted to the officers of the Company for favors shown, and to Mr. R. H. Winlock for an explanation of the system of accounts in use.

MURDER AND SUICIDE. A letter from Sandwich, Illinois, brings the following particulars of a terrible tragedy that took place near that place on the 12th inst. Zerah Zerab, a son of Orin Hall, formerly a resident of Burlington, this county, has for some time past lived near Sandwich with a man by the name of Gordon Lord, a farmer. On Saturday, the 12th inst., when the family were all away from the premises, except himself and the lad Zerab, he went to the barn where the lad was engaged in doing chobs, and without cause or provocation deliberately shot two balls from a revolver through the boy's head, and then cut his own throat. Not severing an artery he returned to the house, procured a razor and axe, returned again to the barn where he proceeded to shocking, by cutting and mangle the dying boy, and after severing his throat, finally ended his existence by hanging himself with a rope tied to a rafter. It is supposed the unfortunate man became suddenly insane. The boy who met with such a tragic death was about thirteen years of age, and was a brother of W. C. Hall, who had but just returned to his home in Sandwich from a pleasant visit to friends in this county.
