The railroad system has been developed in Illinois within the last five years, and one of the fruits, we see, has been double the population. A correspondent showed, the other day, that another was to quintuple the value of her land. Add to these the improved society, the multiplied educational and moral influences, such as the newspapers, cheap books, &c., which follow population, and take advantage of all cheap methods of communication, and then one may begin to appreciate the advantages of the modern railway system as an engine of civilization. - N. WEALTH OF ATLANTIC CITIES. - The wealth concentrated at the great commercial points of the United States is truly astonishing. For instance, one-eighth part of the entire property of this country is owned by the citizens of New York and Boston. Boston alone in its corporate limits owns one-twentieth of the property of this entire Union, being an amount equal to the wealth of any three of the New England States, except Massachusetts. In this city is found the richest community, per capita, of any in the United States. The next city in point of wealth. according to its population is Providence, R.
