"A SHOW."-Probably the finest Calf produced in this county for years, has just been purchased by Capt. ROBERT McCURDY, of this place, from his brother-in-law, Thomas A. MARSHALL, Esq., of Hamiltonban township. It is supposed to be full Durham, and Mr. Marshall informed us that it weighed on the day it was eight months old, four hundred and one pounds. When quite young, it was weakly, but thanks to the care and attention of Mrs. Marshall, it soon began to "pick up," and now, we are told by several judges, "can't be beat," in the county, or out of it.-Such stock is a credit to any neighborhood.

LICENSES .- All the remaining applications for Tavern License were granted by the Court on Tuesday last, except that of Mr. JACOB ECKENBODE, who desired license to open a house on the York turnpike, about 2½ miles from Gettysburg. It was refused, there being a remonstrance presented to the Court affirming a tavern at that point was unnecessary.

BRIDGE LETTING.—The contract for rebuilding that portion of the Bridge at York Furnace, in York county, which was blown down by the violence of the storm, a short time since, has been let by the Directors, to Mr. John Black, of Lancaster, Pa., the original contractor and builder of the structure; and it is expected the bridge will be passable again by the middle of August next.

GOING UP.—Ten shares of stock in the Bank of Gettysburg, were sold, at public sale, in this place, on Monday last, at \$43 for \$35 paid in.

P. O.—We are requested to state that the Post Office will hereafter be opened at 6 o'clock, A. M., and closed at 8 o'clock, P. M.; and opened for delivery after the arrival of the Eastern mail.

We observe that the house in the occupancy of Mr. WAYBRIGHT ZIEGLER, on York street, is being handsomely repaired, externally and internally.

WASHINGTON, May 24.—A telegraphic despatch was received here to-day, which states that a collision had taken place between the United States authorities and the Free State men, by which the town of Lawrence was destroyed, and a number of persons killed. It has caused the most intense excitement. I saw the President this evening, and he expresses some doubt as to its authenticity.—One despatch is dated Louisville, whereas it should come from St. Louis to be authentic.

Wanted, by a person who has one hundred thousand dollars and no heir, to adopt from birth, a child. It must be of American parents, and from one hour to ten days old, sex immaterial. Any person having a child they wish to dispose of, can thus secure it a good home and fortune; or any lady about to become a mother and willing to part with her child, can have a respectable physician to attend her and no questions asked or answered. Among the recent arrivals at one of coices, bound for Salt Lake.

The following is a copy of an article recently published in the Pennsylvania Inquirer, of Philadelphia. The premises laid down seem strongly substantiated. Since the publication of this article the Board of Directors of the "Ridgway Farm and Coal Company" have decided to raise the price of their Farms or Shares from Two Hundred Dollars to Three Hundred Dollars after the 1st of June. The Resources of Pennsylvania --- A Glance at few more of the same sort." I belonged to Elk County.

At present, this county appears to be the scene of active improvement. Great interest has been manifested in this direction within erned by their individual proclivities in their the past year, especially since the Sunbury and Erie Railroad between this county and the lakes has been placed under contract .-From present appearances, if the reasons upon which the public conclusions are founded are true, we have no cause to doubt them, it is soon destined to be one of the wealthiest and most important in the State. An immense amount f capital is now being invested in this viciniy from our own city, and that of New York. Coal companies are being started to commence operations immediately upon the completion of the western end of the railroad to Erie, which is now under contract, and a large force at work. The following are some of the reaons advanced upon the subject:

The western end of the Sunbury and Erie Railroad connecting Elk immediately with the great market of the Lakes, is now under contract, and a large force at work grading the road with all rapidity. Sufficient money has been raised to complete this end. The Tyrone and Clearfield will also connect with the Sunbury and Erie at St. Mary's; besides these, the Allegheny Valley will pass through in the course of a few years, and connect with the New York and Erie Railroad at Olean. Ridgway will also be the terminus of the Venango, connecting with the West. It is necessary to be fully aware of the terminus, of these roads, as well as their route, to understand the value of the location.

Before entering upon the location, we will consider the mineral and agricultural wealth f the county, which gives the land its value. The principal part of that county is underlaid by three veins of bituminous coal. The first, on an average, 3½ feet thick; the second, 4½; and the third, from 5 to 8 feet.— Above the coal lays a strata of the best limestone, and between each vein is a vein of the richest iron ore. Until within the past year or so, the land not being sufficiently explored, these important facts were unknown. The soil is a fine agricultural soil, and said to be neither hilly nor stony, with the exception of The weather the latter part of last the portion known as the barrens, upon which week was remarkably cold. On Thursday no value is placed, and which are generally in the hands of reckless real estate agents, who have done much to injure Western Pennsylvania by descrying all other lands and imposing their's upon their victims. There is a fine agricultural settlement, and the crops produced are large and generally sure.

Possessing these abvantages, the develop ment depends, as before observed, upon the railroads, but more especially upon the completion of the Western end of the Sunbury and Erie, which it is believed, from sufficient reasons, will be done within two years. It will then possess the entire control of the Lake market. We will give a short extract, in considering this subject, from the Pottsville

"The great bituminous formation of the Allegheny, in running eastward, gradually ascends, until the measures finally run out in Potter county, where no coal exists. Thus Elk is about the most easternmost county, if | icated on the 19th ult. not the last one, in which beds of workable coal are found; and in view of this fact, the coal trade will necessarily constitute one of the most profitable features of the Sunbury and Erie, as well as that of the northern and of the Allegheny Valley Road. The distance from St. Mary's to Erie is about one hundred miles, and the coal could be afforded in the city of Erie at a cost varying little from two dollars per ton. The veins are extremely regular, and the coal can be uniformly mined in drifts, at an aggregate of some forty ceuts per ton, and carried one hundred miles by railroad, over descending grades, and without the usual allowance of five per cent. for depreciation, for one dollar per ton; thus leaving to the operator a profit of sixty cents per ton, exclusive of landlord's royalty, which may be estimated at twenty-five cents per ton. Now the Elk coal can be delivered on the wharves at Erie one dollar per ton cheaper than any similar coal that now goes there, or to any other point on the Lake shore. Thus, it will be perceived, a stupendous coal business is certain to accrue to the Sunbury and Erie Road the moment its Lake ends shall have been completed; and one of the inevitable effects of such trade will be to give extraordinary former place.

BE fects of such trade will be to give extraordinary

value to the lands." These conclusions are no doubt founded upon solid grounds. The prospects are much greater than when coal was first introduced at Pottsville. Then the market was small of account of its being so little used. Here there is a market of nearly two millions, and it only wants the completion of that end of the road to spring at once into existence. Elk, also, has the advantage of being superior agricultural land to support a mining population.—
The coal being at hand, will, also, induce the manufacture of iron, as bituminous coal is superior to wood, and as observed, it is the nearest land to the Lakes, possessing the advantages of both.

We clip the following paragraph from a peech made by JAMES RAYMOND, Esq., of Westminster, formerly a whig, in the recent Democratic Convention of Maryland, and commend it to the reader's attention:

Mr. President :- If, in a few remarks which I propose to offer, I allude for a moment to my own political position, I beg the Convention to believe that the entire importance which I attack to it, consists in the fact that there are "a the Whig school of politics until it was apparent to everybody, that the honored institution future associations. The Know Nothing deluge wits then in its fullest tide of successful experiment, and threatened to engulph not only the Whig party but the whole world. But be the consequences as they might, I found it impossible for me to become assimilated to that nocturnal fraternity, by going to a Lodge and being drawn through the hole of initiation. I was in daily intercourse with a few other Whigs and many Democrats, who thought and felt as I did, that a most unpre cedented, unscrupulous effort was being made to introduce midnight oathbound secreey, as a standing element in the organization of political parties in this country. We believed also, that success in this attempt, would be attended with the most serious consequences. That-it-would end in the conversion of our free government into the most odious of all despotisms, a secret despotism. Such a belief was well calculated to make Whigs and Democrats forget those threadbare, by-gone distinctions, and to organize in such a shape as would best enable us to co-operate in putting down so great an evil. A meeting was called for that purpose. The Court House was filled to overflowing. But like the Grecian horse,

three-fourths of its contents were the enemies of Troy. The secret politicions had the poteness to break up our meeting. But the very outrage was the commencement of re-action in Carroll county, which has never ceased, and I trust in God, will not cease, until Know Nothingism is driven from her borders. That very outrage enabled the honest yeomanry of the land to see with their own eyes, and to hear with their own ears, what Know Nothingism was, and of what it was capable. Upon the conservative, the Constitution loving, law and order portion of the coummunity, it was a welding heat. To the Democrats, who will surrender all for the sake of Union against that unholy faction; the Whigs who were cooperating with them, replied :- "So far as the name is concerned, you will surrender nothing. Our next meeting shall be under the hickory tree, and see if the Know Nothings will come and demolish that." It was under the hickory tree and should have been there at first. For, Mr. President, what is the use of a third party, to oppose the combined forces of Black Republicans and Know Nothings against the Democracy at the present time? I leave it to the old line Whigs to answer the question, and to act accordingly.-They are intelligent and far seeing .- If, in their inmost soul, they prefer Democracy to Black Republicanism, they will be with us.
