A Medical Revolution!

THE WORLD UNANIMOUS! olloway's Ointment. - The Great Countries Ten Innitant! - The virus of disease often makes its way to the internal organs thro' the pores of the skin. This penetrating Omiment, melting under the hand as it is rubbed in, is absorbed through the same channels, and, reaching the seat of inflaramation, promptly and invariably subdues it, whether located in the kidneys, the liver, the lungs, or any other important organ. It penetrates the surface to the interior, through the countless tubes that communicate with the skin as summer rain passes into the fevered earth, diffusing its cool and regenerating influence.

Skin Diseases and Gianchilar Swellings. Every species of exterior irritation is quickly reduced by the anti-inflamm atory action of this Ointment. Angry Eruptions, such as Salt CUTLERY. Farm Lands for Sale!

IN TRACTS OF 40 ACRES AND UPWARDS, ON

The Illinois Central Railroad Company IS NOW PREPARED TO SELL Over Two Millions of Acres OF FARMING LANDS.

LONG CREDITS AND AT LOW RATES OF INTEREST. FENHESE lands were granted by the Govern-I ment, to aid in the construction of this Railroad, and include some of the richest and most fertile Prairies in the State, interspersed here and there with magnificent groves of oak and other timber. The Road extends from Chicago, on the North-East, to Carro at the South, and from thence to Galena and Dunleith. in the North-west extreme of the State, and as all the lands lie within fifteen miles on each side of this Road, ready and cheap means are afforded by it for transporting the products of the lands to any of these points and from thence to Eastern and Southern markets. Moreover, the rapid growth of flourishing towns and villages along the line, and the great increase in population by immigration, etc., afford a sub-

produce. The soil is a dark, rich mould, from one to five feet in depth, is gently rolling and peculiarly fitted for grazing cattle and sheep, or the cultivation of Wheat, Indian corn, etc.

stantial and growing home-demand for farm-

Economy in cultivating and great productiveness are the well known characteristics of Illinois lands. Trees are not required to be cut down, stumps grubbed, or stone picked off. as is generally the case in cultivating new land Tuesday of October next, (the 14th,) in the in the older States. The first crop of Indian corn, planted on the newly broken sod, usually repays the cost of plowing and fencing.

Wheat sown on the newly-turned sod is sure to yield very LAEGE PROFITS. A man with a plow and two yoke of oxen will break one and a half to two acres per day. Contracts can be made for breaking, ready for corn or wheat, at from \$2 to 2,50 per acre. By judicious management, the land may be plowed and fenced the first, and under a HIGH STATE OF CULTIVA-

Tion-the second year. Corn, grain, cattle, etc., will be forwarded at reasonable rates to Chicago, for the Eastern market, and to Cairo for the Southern. The larger yield on the cheap lands of Illinois over the high-priced lands in the Eastern and Middle States, is known to be much more than sufficient to pay the difference of transportation

to the Eastern market. Bituminous coal is mined at several points along the Road, and is a cheap and desirable fuel. It can be delivered at several points along the Road at \$1,50 to \$4,00 per ton; Wood can be lad at the same rates per cord:

Those who think of settling in Iowa or Minnesota, should hear in mind, that lands there, of any value, along the water courses and for many miles inland, have been disposed of :that for those located in the interior, there are no conveniences for transporting the produce to market, Railroads not having been introduced there. That to send the produce of these lands, one or two hundred miles by wagon to market, would cost much more than the expense of cultivating them; and hence, Government lands thus situated, at \$1.25 per acre, are not so good investments as the land of this

company at the prices fixed. The same remarks hold good in relation to the lands in Kansas and Nebraska, for although vacant lands may be found nearer the water courses, the distance to market is far greater and every hundred miles the produce of those lands are carried either in wagons, or interrupted water communications, increases the expenses of transportation, which must be borne by the settlers, in the reduced price of In the Fourteenth district, composed of the their products; and to that extent precisely are the incomes from their farms, and of course on their investments, annually and every year

reduced. The great fertility of the lands now offered for sale by this company, and their consequent vield over those of the Eastern and Middle States, is much more than sufficient to pay the difference in the cost of transportation, especially in view of the facilities furnished by this Road, and others with which it connects, the operations of which are not interrupted by the

low water of summer, or the frost of winter. Price and Terms of Payment.

The price will vary from \$5 to \$25, according to location, quality, etc. Contracts for Deeds may be made during the year 1856, stipulating the purchase money to be paid in five annual installments. The first to become due in two years from the date of contract, and the others annually thereafter. The last payment will become due at the end of the sixth year

from the date of the centract. Interest will be charged at only THESE per cent. per annum. As a security to the performance of the contract, the tirst two years' interest must be paid in advance, and it must be understood that at least one tenth of the land purchased shall yearly be brought under cultivation. Twenty per cent: from the credit price will be deducted for cash. The Company's construction bonds will be received as

READY FRAMED FARM BUILDINGS, which can be set up in a few days, can be obtained from responsible persons. They will be 12 feet by 20 feet, divided into one living and three bed-rooms, and will cost complete set up on ground chosen anywhere along the Road, \$150 in cash, exclusive of transportation .-Larger buildings may be contracted for at pro-

portionate rates. Special arrangements with dealers can be made to supply those purchasing the Company's lands with fencing materials, agricultural tools, and an outfit of provisions in any quantity, at

the LOWEST WHOLESALE PRICES.

It is believed that the price, long credit and low rate of interest, charged for these lands, will enable a man with a few hundred dollars in cash and ordinary industry, to make himself independent before all the purchase money becomes due. In the mean time, the rapid settlement of the country will probably company applicants, to give information and

aid in selecting lands. Circulars, containing numerous instances of successful farming, signed by respectable and well-known farmers living in the neighborhood of the Railroad lands, throughout the Statealso the cost of fencing, price of cattle, expense of harvesting, threshing etc., by contract-or any other information-will be cheerfully given, on application, either personally or by letter, in English, French, or German, ad-
