I have always bolisved that, under the Constitution, the Senate was a permanent organization, made so by the Constitution, and necessarily so for the pe Government. When I took the cash of office, I assumed its responsibilities. Among those responsibilities was the contingent one of filling the Executive chair, in the case of a wassayer, there

Permit me to review the position of affairs at the commencement of the present session. The national Gevernment was still engaged in the fearful struggle with citizens and fitates that had drifted into rebellion, upon the false idea that the Government had no power to protect and preserve itself from dissolution. It was calling upon and demanding the steady, firm and energetic support of the Government of every loyal State, and of 'overy patriotic citizen. This great Commonwealth had just pussed through a heated political context, resulting in the choice of a chief Executive officer, abundantly pleaged to an untring support of the Government and the war. With a mejority in both tranches of the Legislature, holding the same political views, the fortunes of war had placed the gallant and patriotic Strator from Indian. (Major Whyrs) in the hands of the enemy, a prisoner of war, depriving the people of the State of the power to carry out their expressed will in the Sonate. The constitution required the retorns of the cleations to be opened and published by the Speaker of the Senate; the Governor was to be inaugurated, and all the machinery of legislation to be put in motion.

Under these circumstances, and with the

diargard the practice, which I considered
purely personal to myself. Some Senators,
however, prefer to no regard this practice of
leaving the chair as a resignation of the office.
If this be the true construction of the practice,
then my only reply to those who oppose my
position is, that, (as I said before,) under the
circumstances we were placed, I believed it
my duty not to resign and leave the office vacant during the context, thus subjecting the
