- Hittsburgh Gazette,

CITY AND SUBURBAN.

From Yesterday's Evening Gazette OUR NEW YORK LETTER.

Correspondence of the Pittaburgh Gazette.

NEW YORK, March 18, 1854.

The President's call for two hundred thous-There is no disguising the fact that the procple. Men openly denounced its publication a species of bad faith towards the country. We had worked hist," they said, "and raised millions of money to escape the stigma of the draft, and our efforts were successful. This call sentralises our patriotism, and nessitates that which we labored up strenuously to avoid." However, the second, sober thought has taken possession of the citizens, and earnest efforts are making to fill the

thought has taken possession of the citizens, and earnest efforts are making to fill the liquid has taken possession of the citizens, and earnest efforts are making to fill the liquid has been as the manufactured, and it will be seen to be seen the liquid has been to posses.

The blockade-runner "Cumberland," recently captured off Wimington, N. C., by our gunboats, lies here at the whorf foot of Chambers street. Ble is the first prize brought into this fort for some time—the prises being generally sent to Beston now, en account of the great expense of adjugation here. The Cumberland is a Clyde built steamer, long, low, black and rakinh. She was built entirely for speed, and her buckets made to drop down in coming out of the mater, to prevent any back action. She is surrounded by a crowd of lookers on, who are unanimously of opinion that however fast he

The German steamer Hausa arrived day hefore yesterday, with the Russian colors flying from her missen must, fearing to sail under the 'sobwarts, roth und gold,' owing to houtlittee between Germany and Denmark. The ship news reporters were quite hewildered, and did not know how to begald her, supposing she was new Russian versul. It is not believed that any permanent transfer of the vessel has been perfected, but merely an accommodation to avoid capture by Danieh cruisers. The Germans, who congregated at the wharf on her arrival, were rather long-faced at this lowering of their mational colors, but will probably field a crumb of bunfort in the less of the Corinthian, (Danieh) amounced to-day.

A report reached as yesterday that the Italian frigate Bed 'Italia had doundered at sea un the 7th inst. From the fact that she was boilt in our own waters, on an American plas, and was the first sea-going iron-clad gonstructed in this country, there was much actional feeling around on the amouncement. It is not known, to what extent this fealing would have gone, had not a sensibly fellow interfered with the quite seriously by stating that the Red 'I lialia did not sail from this port till the 9th—two days later! It has since been accretiated.

stating that the Re d' Ijalia did not sail from
this port till the 9th—two days later! It has
since been ascertained that the ship leat
was the Re Galantomo, and recordly, that
she wasn't lost at all
An serial telegraph cable, containing three
wires, was tried by the Independent line of
telegraph a few days ago. The experiment
was by no means a new one, nor was the resuit, for the whole thing was a supendous
failure. The cable was erected at a considerable expense and trouble, and to the wonder
of a gaping crowd, but it was found that the
"induction" through a circuit of only three
miles was so great as to render the cable entirely ureless. Many gentlamen, not slectricians, thought this settled the question of
the successful working of the Atlantic Cable;
but of course the cases are not parallel, for in
the latter, the number of wires are considered
so one, and "induction" is the rery thing desired.

Political news is unimportant. Governer

of agaping orowd, but it was found that the finduction" through a circuit of only three miles was so great as to render the cable entirely useless. Many gentlemen, not sheat trickians, thought this settled the question of the successful working of the Atlantic Cable; but of course the cases are not parallel, for in the latter, the number of wires are considered so one, and "induction" is the very thing desired.

Political news is unimportant. Governer Beymour's friends are having him over the coals for stutifying himself in signing the Police Commissioner bill, which includes in the Commission. Mr. Acton, the very one the Governor was most bitter against. The Governor's attempt to satisfy all parties has remited like most other efforts to sit down on two steels at once. Now, that it is obvious that Little Mac will be the Democratio nomines for Fresident, there is a strong faciling.

The Express has discovered a very large sized many's nest in the shape of a bognd in-

strong many a new in this shape to a sognit in-tercopted Robel letter wherein the writer says the "Democrate of the North, are the most prominent enemies we have," because they believe in simply restoring the Union (!) and letting slavery alone. Hence the Exprese thinks if the Robels had votes they would all thinks if the Rebeis had votes they would all cast them for Lincolo, and urges the united Democracy to preserve their unbroken col-umns, and all that sort of thing. Extremely "formidable enemier" are Vallandigham, Fernando Wood and Judge Woodward, are they not? Wavenier. Fatal Shooting Afiray at Bucyrus,

A bloody affray took place on Monday last, between a party of copperheads and soldiers. in the town of Bucyrus, Ohio, during which three soldiers were shot. It appears that there were some veteran soldiers of the 49th and 64th Ohio regiments in town, one of whom had got into a dispute with a copperhead named Adam High, a clerk in a drug store, during which the soldier alleges that High applied to him several very insulting

in James A

. · · · · ·

Page 1

High applied to film everal very insulting and approbrious names. The soldier threatened to make High take back his words, and told him he would see him again. On Monday morning, about nine of the veterans called to see High, when they were met by a party of copperheads (High's firsted) armed with platois. They had no aconer entered the door, in fact had not all goth, when High and others commenced firing pistols. Sergent John Culver received two wounds, both in the left thigh, which are serious, Bergaant Canon, a first wound in the right shoulder; and private James Rader, a serious wound in the neck, the ballipassing downwards, injuring the spine and paralising the left leg. He is fat expected to kervive.

The Beapyres Jowned, while blaming the coldiers for visiting High at all, states they were all sober, and that the bloodshed might have been prevented if High's friends had given notice to the officers, instead of arming themselves for a deadly resistance. After the shooting, the soldiers became wild with excitances, and would have taken summary vengeance had not their officers interfered.

John Dillinger, while endoworing to get his brother in law, who is a member of the regiment, away frem the occame of condict, was hicked and beaten mort numeroffully by these opporthesids. Another citizen, John Beicher, while quietly passing along the street in company with another soldier, was set on by four et are copperheded, another cityen, John Beicher, while quietly passing along the street in company with another soldier, was set on by four et are copperheded, another cityen, John Beicher, while quietly passing along the street in company with another soldier, was set on by four et are copperheded, and the dead, beaten and shot st.

The Gattin Gun.

The Gattin Gun.

This invention was recently tested at Fortress Monre. It is said to have proved a most affective weapon, throwing two hundred shots per minute. If it is to be taken into bettle to work for any length of time, it will require at least one hundred and fifty calesons. A great complaint is that our artillerymen, even now, fire too rapidly, often finding themestless out of ammunition when it is most needed, and of course retreating precipitately. Certainly in a heavy charge of the exemy upon our lines or fortifications, the Gattin gan, if her fire was reserved until the robulg should be in deadly proximity, could, by two hundred discharges of conduct and grape shot the minute, mow down the houstle forces.

Marrow Escape of Gen. Sigel. Marrow Escape of Gen. Sigel.

As days ago General Sigel, commanding the Department of West Virginia, made a figure of west Virginia, made a figure trip to Martinsburg, for the purpose of making personal observations in regard to the condition of things thereabouts. In commander, leaves Pittaburgh every TUESDAY, at a considerable distance in the country, and passes of this portion of his staff he rode out: a soundered of the pitch lines. While thus contide of the pitch lines. While thus contide of the lines a force of two hundred rabbis passed along between the General and his pickets. Of course the rebels were not agreed of the General and his pickets. Of course the rebels were not agreed of the pitch lines a force of two hundred rabbis passed along between the General and his pickets. Of course the rebels were not agreed of the course of the General and his pickets. Of course the rebels were not agreed to the General and his pickets. that Little Mac will be the Democratic nominess for President. there is a strong feeling
amongst the Democrats to run Horatio for
Vice-President. To be sure, that would milfirst against their old rule about sectionalism,
but, if faithfulness is to be rewarded, the infringement on the rule would weigh as nothfing against the services of the "Empire
State's noblest son."

The Everse has discovered a very large.
