### ADDITION MONING CONTROL OF THE PROPERTIES AFT.

THE RISE OF FICE.

THE RISE OF FICE. recent legis ation. But no legislation ca reach a greater evil. Most of the gold paid out by the Government is for interest on its bonds. We do not know what proportion of these bonds is held by private individ cals, but certainly is must be very large These holders, upon receiving their interest in gold, do not as a rule throw it again ato the market. They hoard it. To all inburied out of sight. The drain for ex-change and the disposition to hourd will therefore, as seems to us, if not counteracted by prempt legislation, continue to eat

sents. If the crop of potatoes or wheat is telligibly. large, down goes the price; if the crop of paper money is abundant, down goes its les as compared with the standard-cold. There can be no doubt that we have to-da; In this country more paper money than the Government or the people need. If the people had courageously resolved two years ago to tax themselves heavily for the support of the war, the four hundred and cdd millions of greenbacks would have furnished a sufficient amount of the circulating medium to conduct the war and secure the

to depreciate our paper money and put up prices.

There is a remedy for the tendency to still further indiate prices. First, prevent the drain of the precious metals to Europe by imposing a tariff that will absolutely be prohibitory on many articles that are mere luxuries; Second, in some munum-wed on not now undertake to say how —prevent the further increase of paper money; Third, at once levy a heavy tax up on the people, to provide for the pecuniary wants of the Government and to show to the holders of Government securities that the holders of Government securities that the below that the procession of the fovernment and to show to the holders of Government securities that the holders of Government securities that we are not to go on blindly increasing the public debt until, like the Southern Confederacy, the bottom shall be out of financial tub; and, Faurth, 50-time financial tub; and, Faurth, 50-time financial tub; and southern confederacy, the bottom shall be out of financial tub; and, Faurth, 50-time financial tub; and, Faurth, 50-time financial tub; and southern confederace; therefore let us beware how we repudiate a tuberace. orn financial tub; and, Fourth, so turn an early and overwhelming victory by our armies over those of the rebels—stratory, which will at once and forever insure the establishment of the authority of the Government over every foot of Union territory. Let these things be done—let our imports be diminished, the further increase of paper money be prevented, the people taxed, the rebels driven faom Rich mond, and prices, like Capt Scott's coon, will at once come down. Men will not then heard Teles and her will rell it. And in the cause of them be so generally conflicted in as he is?

mond, and prices; like Capt. Scott's Gooh; will at once come down. Men will not then heard their, gold, but will self it. And when pilees do fall, as fall they eventually will, somebody will be badly hurt. Now is that it is given the fact of the wiss to prepare to stand from under.

Descritons from the Army.

General Wilson stated a few days ago in the S naise that the number of deserters now reaches about forty thousand. This is the lowest estimate we have seen, the number of deserters now reaches about forty thousand. This is the lowest estimate we have seen, the number of having been variously estimated during the past year at from fifty to a hundred thous and. We presume General Wilson, who is chairman of the Senate Milleary, Committee, knows what are really the facts. Of the forty thousand now absent without leave, it is said that not far from fifteen thousand, or about one third of the whole number, are sarress the Gauada border.
