STATE SHE

on the teeth. She requested Mr. Westbay to administer chloroform to her, in order to Joshus Ward of Newtorg, will take place this afternoon, on the Monogabels river, above Dam No. 1. The interest in this match is confined mainly to the sporting fraternity, who, on occasions of this kind, exercise their shill in the art of dawing money from the pockets of others, and depositing it in their own. The public geterally seem to care very little shout the race, as the result is not expected to disturb, in the loast, either the gold or the floor markt. As to the betting, we really donet know anything about it, excepting that some aregoing to "flack their ple" on Hamill, while others will "risk their bott om dollar" on Ward. In all human probability, either Hamill or Ward will win—and those who bet against the winning man will loss their more;! We have reflected care inliv over this ratter and believe this to be the "exact stimation." There is still, how are determined to the (and yet do not with to loss) should reset to the expedient—that is, betting an equalmount on each man. This is always the risk my, particularly where the chances are overly balanced.

It is add that Ward is in "eplendid condition," and that is mail is as "if as a hiddle." Both man has he trainer, whose business it is to see that the highest state of physical power is attained, of which the constitution is an active of the case, admitted Mr. Westby the ward to be a beautiful to a battle, and is as punctured to the system has been intring for some time, and the mucles of the charce and the mucles. The champion related the ward of the charce. The champion related the ward of the ward o

ercies, etc.

It is by this man's that the system is 'relieved of the exass of fatty matter, which
prits fighters are rowers are so anxious to
getrid of. The pre carefaily weighed each
day, and each ones taken off is scrupulously
noted. When sincently reduced, and just
before the center comes in, the trainers add
on a few poundars fields, by giving roat to
the system, and is just at this particular
point of time the the subject is capable of
such great physid exertion and endurance.
When they cense exercise so severaly, they
gain rapidly in wight, and feel so keenly for
thair acoustomed cercise that they go at it as
though it were mes play. One of these men,
(we need not say thich,) expects to add see
pounds to his weigt during the next trentyfour hours. We lention this to show how
rapidly fish can badded, when the system
is in proper condition for such experiments.

It is eadd that Healil, while training, ures
no spirituous or mi liquors, but that Ward
drinks moderately of good als. Both are
limited to the mostubentantial and nourishing diet, carefully volding pies, pastries and
the whole tried work seeds. It may be interesting to some spile to mark whether the

The boats will surt at two clocker from a SAD ACCIDENT.—An socident of a very distressing nature occurred yesterday afternoon at R. J. Connoll & Oo's. Saw Mill, on the bank of the Monongabels river, near Dam No. 1. An o'd German woman was on the bank gathering chips, when a large log, which was being hanted up to the mill, became detached from the chain, and rolled down the bank, knocking down the poor old woman, and crushing one of her legs so exercity that it was found necessary to amputate it.

The Browserows Rior.—Chief of Police Long and officer Kemp, who have been searching for Martin Brawdy, Jr., who shot James Fagan, in Brownstown, on Saturday, returned last evening. They traced him to the house of an uncle, seven miles from the city, where they found the horse which he had taken from his father's stable, but the fugitive had left a short time before the arrival of the officers.
