The p'ank in the Chicago platform which seeses the most significance, and the one, too, which in relied upon to elect McCLELLAN and give peace to the country, is the following, being the second of the series:

log, being the second of the series:

Recoland, That this Convention doss explicitly declars, as the sense of the American peop's, that, after four years of failure to restore the Union by the experiment of war, during which, ander the pracease of military necessity or war power higher than the Constitution, the Constitution itself has been disregarded in every part, and gublingliberty and private right after trod-dem down, and the material proxperity of the constry essentially impaired, justice, humanity, liberty, and the public welfare, demand that immediate efforts be made for a certain of hostilities, with the vite to an ultimate Convention of all the States, or other peaceable means to the end that at the earflest practicable moment peace may be instored on the basic of the Federal Union of that clause of this resolution asserts.

The first clause of this resolution asserts that which every private soldier knows to be false. The war has not been a "failure." On .. the contrary, notwithstanding the deadin the persons of such generals as M'CLELLAN, Bunt, Fire Jone Ponces and the like-notwithstanding the serious failures and disasters which their want of generalship or want of seal in the cause has entailed upon a too confiding people—the war has been a brilliant success. When the South, not quite four years ago, proceeded to make war upon the Union it had every advantage that could be desired, met the least of which was a Demogratic Administration which offered no resistance to the tressonable design. Under that Adminiseration. State after State went out of the Union, arrenal after arrenal was seized and military organizations in the secoded States were armed and drilled, United States forts, custom houses, many yards, etc., were taken sgaggion of by those organizations, army and navy officers of experience resigned, and thern members of Congress left their sents with treason warm upon their lips The Treasury of the nation was empty, and so low had the public credit become under the Administration of Mr. Buchanas that a temporary loan of a few millions could only be obtained at the ruinous rate of twelve per eent. So disjointed and disofganized had affairs become, and to such retreme and defint lengths had the Rebellion been allowed to go, that the new President was compalled to slip into Washington by stealth that he might avoid the personal violence which had been threatened him, and, for the same reason, to deliver his inaugural address with all the United States soldiers in Washington under arms. With the impetus the Rebellion had thus, acquired under Bucharan's Administration nd with Mr. Likooth pes:essing on the 4th of Mujoh, 1861, neither money nor anarmy, and syrrounded by spies and traitors in the guise of felepuls, it is not to be wondered at that for a time it should carry everything before it. And it did. Other Southern Blate and took up arms, until, in the fall of 1861, the hamners of the Confederacy floated over exery slave State except Maryland and D. laware How isit non? Has the result of three years (not

-s peace that would make our children and our children's children curso as and curse our bones! This is what the Democracy asks our soldiers and the people and the Government to do. But it counts without its heat. It mistakes when it assumes that the majority of the American people are as base cravens as the men who met at Chicago. That majority knows too well the nature of the struggle in which we are engaged, and it knows that any backing down now on our part—any display of the white feather-would result in disaster as well as disgrace, in the loss of Liberty as est well as disgrace, in the aces of mostly as well as the Union. They know that the proposition for peace in the Chicago resolution would be seemfully rejected by the Rebel Government if it were formally laid before it. Time and again have the newspaper organs of the Southern Confederacy declared in the most emphatic terms that they would make so peace with the United States unless Southern independence were first soknowledged. JEFFERSON DAVIS himself lately said (see Scoreinry Brasanin's circular) sthat the separation of the States was an accomplished fact; that he had no anthority to receive proposals for a goliations except by virtue of his office as President of an independent Confederacy. end on this basis alone must proposals be made to him." And as the people see and the femily And as the people see and the femily for the femily for the peace the pemceralis party and Jarvaneous Davis would give us would be the peace of Dismosa the peace of States forever "discovered, discordant, belligarent." For this they are not ready—for this they will set would be be the peace of Dismosa the peace of States and it is but simple justice to state that it is serious for Gren McGellan that, during the best of Malvan Hill, he complete a similar position on one of the gunboats on the James Tyer. The Rew York It down the at last come out in a stirring article in favor of Mr. Lincous's inform the editors of the Prizeburgh Post that taking a positive stand in his behalf, hoping, no doult, with other Unionists who did not prefer him as their first choice, that somehing might turn up that would bring abou his withdrawal and the nomination in his stead of some other (to them) more acceptable candidate. But Mr. Lincoln is not to be withdrawn, and we cannot but think that the Tribune now sees how impolitic would the such a ceurse. Be this as it may, however, Mr. GREELEY certainly manifests, in the article to which we allude, as much warmth in support of the Union candidate as could be desired by those who see in his election the only sure guarantee of an undivided country. We quote the concluding paragraph of Mr.

We quote the continuing paragraph of this Gerriser's remarks:

"Choose ye! For our part, we have chosen. Better a perpetual dinner of herbs, than thestalled ox is such company—though, for that matter, but little of the stalled ox would fail to the share of those who believed in sighting for the Union. Henceforth we fly the banner or Abraham Lincoln for the next Presidency, choosing that far rather than diunion and a quarter of a century of wars, or the Union and political servitude which cur opponents would give us. Let the country shake eff its speathy; is it realify whe country shake eff its speathy; is it realify whe he country shake eff its speathy; is it realify whe he country shake eff its speath; is it it realify whe he country shake eff its speath; is it it realify whe nor the world can afford; lot it be understoed how near we are 10 the und of the rebellion rad that no choice is left us now but the ins rament put into our hands, and that with that we can and must faish it. We great, from our convolitions, much that can be said in criticism of the present Administration; for the rake of argument we will grant anything that any bor est loyal wan can say. And then this is our rejoinder—Mir. Lincoln has done seven-sight of the work after his fashion, there must be virue and vigot enough 'et in him to do the other fraction. The work in his hands; if it passed out of them, it will be, as there anonce better, but far worse, to receive it, to our uter rain. We must re-elect him, and, God helping us, we will."

What are the Chances of Success ! Never did a party enter upon a National sampaign with greater reasons for anticipating success, than the Union party in the nding canvass. It has all that firmness of purpose and calm perseverance which share terise these who know their cause is just The issues pending do not relate to mere ex ediency, as is often the case. They are es tablished on the immutable principles of Free Government, Justice, Humanity and

Free Government, Justice, Humanity and Trutb.

But the party has not only hope because it is right. It presents a united front to the enemy. Here and there a leader, whose ambition for exaltation has not been gratified, has endeavored to break the ranks, but without success. The rank and ale are dim in their devotion to the Union, and are determised that the individual in whose person the majesty of the Union and the sacredness of the ballot-box were defied, shall be the instrument to vindicate them both.

There are not enough botters from the Union party to form a respectable electrical ticket. The Frencat movement, and the Wade-Davis manifesto, are already forgotten. The masses of the thinking men of the country, who furnish the Union vote, are solid in their fixed adherence to the Union causs.

The skabbliness and treason of the Democratio platform, and the deceit practiced in placing McClellan on it, has still further convinced them of the utter degradation of the Democratio party. The Chicago demonstration has consolidated our ranks, disheartened the truly loyal among the Democratio party.

tion has consolidated our ranks, disheariened the truly loyal among the Democratic party, who are already turning to the Union party as the only hope of the country. Our ranks thus consolidated and reinforced, are moving forward with firm step to the music of the Union, with the full conviction that victory is theirs if they but charge steadily, compacily and forcibly.

We have every reason to hope for success, also, because the army is fighting for us. Victory has perched upon our banners, and our alites in the field are steadily gaining on the rebels. Tais tells for our cause, and sgainst the rebel alites of the North. And our victorious hosts are likewise to fight the rebels with their ballots as well as their bullets. We have therefore every reason to feel encouraged.

bullets. We have therefore every reason to feel encouraged.

The force of prestige is also on our side. In 1850 the opposition majority against Mr. Litacoln in the Bistes that will vote this fall, was 160,000. In 1802, the Administration party had a clear majority of about 50,000—an in serace of 121,000. In 1863 this majority was increased to about .550,000, or a gain.ef.510, 000 since 1850. Is there any reason to apprehend a falling off or chawge in this vote? The events of the past year have strengthened not weakened, our cause. The end of the rebellion draws near apace. We alreedy secure way out of the words. One more push home on rebels in the field by our strengthened and against the polls at

The concluding clause of the resolution, which calls for a "ceasation of hostilities," with the view of inaugurating "peaceable means," for the restoration of peace "on the basis of the Péderal Union of the States," is one of the most cowardly utterances that every man and that the Nation shall suck their arms and that the Nation shall suck their arms and that the Nation shall suck their arms and that the Nation shall suck for peace that well make our children and our shiften in the last stages of dissolutio

GET THE BEST.

Sewing Machine is an indispensable institution good machine is quite as durable and more beautif that it will go through as much work in a day as could b performed in a week by hand, ten thousand workshops and ten times ten thousand firesides will testify. Be amid the variety of machines which are offered to the publ's; it is sometimes difficult for the purchaser to de ide which is the best. A trial of over two years ex bles us to my with the greatest confidence that there s better machine for general family use than that man nfactured by the Grover & Baker Sewing Machine Com any. It makes a beautiful elastic seam that does not rip or wear with washing, runs almost noiselessly; is pla'n, simple, easy to work, and not liable to get out of pair; fastens the ends of its own thread and use breads and allks directly from the species on which they s bought. In this opinion we are sustained by the judges in all parts of the country, who have awarded Grover & Baker Machines the first premiums at all the State Fairs to da.s. - Frank Lealin's Hinstrated Bear
