John E. Large, Eng., objected to this thing of every candidate being permitted to withdraw his name. Mr. Ingram was just the man for the potition, and had as much money to rpend in the calmars as any gentleman in the country, and he should not be permitted to decline. Ool. Given suggested to brother large that, inamech as he being gested he lieghany city, and hade poor house of his own, he had no right to meddle in this matter—the country designates alone being interested. This was agoed point well put, and raised a hearty large at brother large's expense. Mr. Ingram, who was out in the rotunds, had by this time got wind of what was going en, and he bolled into the convention, hat is hand, and very abroptive gest the President to withdraw his name. Captain. It is wait known that he is a terrible

with sigger on the brots, and not being much of
a "public speaker," it would be very natural for
the Captain to be: somewhat muddled when addressing the great conclave of Copperheads, and

which he would be very sorry to see in print.
It was very prudent, therefore, in the Captain to
be chary in denying what he did say.

Besides, having a big job on hands, the Captein would mive as "Me iffort, and would very
naturally resort to the same language and means

He joined the copperheads and stumped Allegheny county with wonderful success last fall. Elated with his success he went to Otheage and made—a speech! As the speech reported by the Tribune is so much like the Capitain—in fact, I thought it one of hig happlest elforts—I must regard it as the veritable speech he delivered, until seme other "gubile speaker" owns forward and claims the "gubile, speaker" comes forward and claims the baniling, or at least until the Captain gives us that speech he did deliver. The Coal Diggers' Convention. The coal miners advertise that they will hold a convention to-day, at eleven o'clock, on the West Common, Alleghany, when they expect to be able to show that they are not responsible for be able to show that they are not responsible for the late unfrights advance in the price of coal. They allege that the pit owners and retailers have put up the prices, and that the responsibility reits with them. We have already stated that both parties are to blame, and we think the facts; if correctly accretated, will substantiate this assertion.

When the war communed, the diggers were will satisfied with two cents per burnis! They increased, from time to time, until they got fire and they hundle. How we wind like to know by what process of reasoning they can convince the pallic what the late strike for seven and eight cents per bushel, they not could see the pallic what the late strike for seven and eight cents per bushel, the producers and retailers were satisfied with such profits as accuract to stem by salling to the consumers at free and eight

quite a different purpose from prohibiting the payment of bounties to volunteers to aid in the suppression of rebellion. He contended, moreover, that ender the very terms of the Constitution itself the Biate had full power to previde all needful means for the suppression of insurrection or rebellion, and that the General Bounty acc and the supplement thereto were clearly constitutional. In reference to the minor points alluded to, Mr. Woods answered that the tax was proposed to be leviad according to law—the assessment not to exceed two per bent, per annum. As to recraiting from other districts, that was a matter that did not in the least in jure or affect the complainants; and oven if it idd, the State Courts had nothing to do with the complaint. Mr. Woods read a letter from Indians, in which it was reated that Judge Bufflegton had just rendered a dection in a similar case, affeming the constitutionality of the general bounty law.

Mr. Loomis followed Mr. Woods, and delivered an able argument in support of the positions assumed by his colleague. He spoke at some length upon the powers of the State and United States Constitutions, bearing upon the questions valids. And contended that the preserse of the two cents per buthel, the producers and retailers were satisfied with such profits as accreed to them by sating to the consumer as free and six earns per bushel. Why, then, should commers new be compelled to pay seventeen and sighteen satis per buthel, even admitting that it costs geres cents for mining?

If these questions are estisfactorily determined, the convention may result in some good; that the diggest contend that they are jurified in denanding increased rates, simply because the Ireferes and retailers had become ezorablish in their demands; they piece themselves in a most story and religious light before the public. The public will wait their yindication with some contiderable interest. Mr. Hamilton concluded the argument, elaborating the points raised by him in his opening. At the conclusion of his speech, the Court tock possession of the papers, and adjurned until fisturday, at which time a decision may be readered.

Another (utt.ng Affair-Probable Homi-Last night about ha'f-past nine o'clock, a outting affair occurred en the Second street road, near Lock News, on the Monongabela river, which may result fatally. The following are the particulars, as near as we could ascertain: A man named William Karrigan quarrelled with James M.coney, his brother in law, a few days since, about some family matters, and last evening Karrigan being under the influence of liquor, in a dispute with him. After some convorsation, Karrigan drews large butcher knife from his pocket and struck Mooney a severe blow upon the cheek. Mioney endeavored to take the lan fe from him, when Karrigan stabbed him in the left side and inflicted a severe wound. Immediately attrible affray the police were notified of the fairt, when they called upon the wounded man, whom they found laying upon the floor of his dwelling, apparently in a dying condition. After some difficulty they succeeded in arresting Karrigan and conveyed him to the watch house. Therefore, Police Long called upon floor. Fortune, Eq., Searchary of the Directors of the Poor, and rique ted him to send a physician to examine Mooney's wounds. Mr. Fortune complied with the request, but up to a late hour last night we were unable to assortian the result of the examination. We visited Karrigan at the toombe last hight, but he was too muchlimitoricated to give any account of the affair, furthan to deny that the had done the cutting. In reference to the main point, Mr Hamitton argued that, by the Constitution of the United States, Congress alone had the power of erganising and supporting armise; and, having all the power needful to provide the necessary means, and having entered upon the employment of these means, Gengress virtually excludes State Legislatures and State suthorities from taking any action in the premises. Congress had already legislated on the subject of paying bounties to volunteers, and hence any action of the Pennsylvania Legislature, touching the subject of bounties, was illegal. Mr. Hamitton further contended, that, under the seventh section of the amended Constitution, the Legislature was prohibited from paring such acts as the one in upport of the bill.

Mr. Woods answered very briefly. Indeed, he seamed to regard the question as to the constitutionality of the law as hardly worth an argument. He read the seventh section of the amended Constitution, referred to by Mr. Hamilten, but utterly failed to-see its bearing in this case. The provision therein contained was for quite a different purpose from prehibiting the payment of bounties to volunteers'to add in the suppression of rebellion. He contended, more-over, that under the very terms of the forestire. reactinty invite our friends and the public in peneral to examite our new stock, believing it to be one of the firms stocks of merchant tailor goods give the stiffaction, in both pric-nated to give full satisfaction, in both pric-lisewhere and judge for yourselves. The precedings of the conference are kept on-tirely secret. While writing I have this moment heard that the conference had broken up its sit-tings on this Island, and has adjourned to the left inst. to meet in the city of Hailfax. I am also assured that after a careful consideration of the whole question the conference same unani-mously to the cubclusion that the sidvantages from consolidation to all the colonies would be very great, provided the terms of alliance sould be made satisfactory. The meratime delegates, it is said, are to resume the consideration of the details of the schemest Hailfax, and unlers some formidable obstacle arties, a duly authorised conference of the several Brovincial governments will shortly be held at Quebec to discuss the points of variance, and II possible mattre a for-mal position for submission to the respective pur-liaments.
