THURSDAY, Oct 13, 1864.

The loan market has undergone special change if any thing there is greater ease in procuring loans. The Government buys less greenbacks to-day for gold to enable gamblers to settle for some weeks past, partly in consequence of small speculations in the 7-30 currency compound, partly in preparation for the new 5-20 loan shortly to be offered.

Stocks for stocks has been quite active during the day. Delaware sold at 70, 5 being freely bid on the street without bringing out the offer. Reading sold at 94¾ and closed at 94½ bid. Oil Basin offered at 11. North Star is the low priced share.

Copper stocks steady in Boston. Copper itself seems advancing rapidly. The better class of stocks will without doubt be considerably above present quotations. Quietly quoted as follows:—Ohio at 84. Pewabic at 75¾. National at 70. Franklin 87. Several of the above we consider very cheap at quotations.

The following are the negotiations at the sales of stocks at the Stock Exchange Auction room, last evening:

Sold by Cherry, Kerr & Co.

Penn	60
Manufacturers' Bank	100
Phillips	125
Ohio Valley	37½
Pierce, Fly & Co	100
Merchants	100
Shells	95

The New York Evening Post of to-day says:

There is no topic of discussion in Wall street to-day but the new government loan, for which the offers are now called for expected to be in ex.

On Friday the bids for those new twenty-five bonds will be opened at Washington, and but for the recent panic the amount would have been fixed at fifty millions to which the loan is limited. Already offers to the amount of a number of millions have been made up in the city, and gone day the deposits for a single day of five millions of dollars were received at its Sub-Treasury here. The competition is expected to be the largest ever known in this country, and very large sums will be offered at the minimum rate of par. The premium which will enhance the value of the certificates, which are selling at 99¾ is virtually equivalent to a reduction of the interest to seven per cent.

The mercantile failures and threatened ones during the war in W ashington, and that the record for the present month will probably lead to the withdrawal of a portion of the large foreign capital now in London, earlier than they would otherwise have been brought into the country by the state of war on this side of the water. The failure of the Manchester cotton firm is telling many upon the vicissitudes of the London money market, and the effect of having to look small in comparison with the state of having to look small in comparison with the state of having money exposed to the vicissitudes of the London money market, and the effect
