Yesterday's vote assures in the House the re Quisite maj ries of two-thirds for the Constituquisite maj-riky of two-thirds for the Cansitutional Amendment whereby Siavery is to be forever abolished and prohibited throughout the Nation. The gain of three or four members of Congress in this State will doubles be parailaled by like gains in Lilinois, and we hope for one in New Jersey, one at least in Wisconsin, with ens from the now State of Novada. We have one to gain (ortain) in New Hampshire. These are sufficient to carry the Amendment and make ours a free country for ever more. "God blers Abraham Lincolw' re-elected President by a Very Ingrealectoral and still more decisive popu-Anagan Ligous i re-elected Precident by a very large electoral and still more decisive popular majority. He can no longer be taunted as a minority Precident, and no practical question can arise as to the counting of the votes of dubicus States. He is the choice of the American people by a preponderance which must disconsert and baffis the complicators for North Westpern and other rebel-parasite Confederacies. His Administration is event

The rope-trick of the Davenport brothers is an old thing, according to the King of Oude, who says that in India it used to be performed in this fashioff: the performer was titled neek and feet and put into a sack, the mouth of which was carefully secured; he was then thrown into deep water, from which he emerged swimming, free from both ropes and sack. A London paper urges subjecting the Davenport brothers to this test. This is not an unexpected triumph. The Rspublic was not in the hands of men who were disposed to tass it into the embrace of traitors and ambitious adventurers. The people have shown, by a verdict unexampled in the history it nations for its unanimity and grandour, that they would not consider the war they had made stmany starlines to conduct a war of failures and crimes. This question was propounded to tee perple by the Democrats at Ohleago, and hey have answered it. They say to their breth-

Former papers say that rothing can be more magnificent than the vintage this year in all parts of France. In the wine districts there is a supershundance of grapes: The proprietors of vineyards are actually pursied to know what to do, their usual supply of casks having long-been filled, and the coopers, although at work day and night, being utterly unable to supply the domand.

It has been ascertained from papers found on the blockfide runner Annie, captured on Mon-day last, of Wimington, that she had on board \$50,000 in gold, and a large amount in Confed-erate, bonds, which she threw overboard white being chased. The money and brads belonged to the rebel government, and will prove a hea

It is alleged that the suicide of Mr. Thomas Huntley, a clerk in the Messra. Spottiswood's printing office, who cut his threat with a carving knife, was owing to the doubts rated in his mind by reading Dr. Colemo's works. He had been a suber and tumprate man, but his new studies had ied him to disbelieve in a future state.

thisers with the enemy, selemnly sworm to destroy free principles and free government by any and every means, have stopped at no instrumentality or risk to achieve their ends. Much holding high commissions in the armies of the Indiced Rissies have wasted the resources of the republic and disheartened the friends of liberty to gratify their own personal ambition, or to preserve alayery and the Democratic party; hat over all, above all, despits all, the Union cause has achieved an immortal victory. Tie fevil of copperheadism appears to have driven its followers mad in the adjaining counwith the gross frauds attempted to be perpe traied up n the people, by swindling General Keents cut of his sear in Congress, an effort has been made to chest Judge King, and Massre. Ross and Armstrong out of their south. More biscon, recklets frauds than these perpetrated upon Judge King or upon Ross or Armstrong were never conceived.

Deliberately in the face of the law, without the shadow of an excuse, or the smellest pretext for the crime, the copperhead portion (being a majority) of the District return judges, who assembled respectively, at McConnellaburg and rembled respectively, at McConnelisburg and Bedford on Friday last, threwest enough of the regularly polled, and returned vote, to defeat Judge King and Messra. Boss and Armstrong and gave certificates of election to Judge Kim-mell, and to Myers and Findley as elected to the mell, and to Myers and Findley as elected to the Legislature.

We have no tinguage opprobrious enough to sufficiently characterist the sounderly sugged in this conspiracy against the purity and sanctity of the ballet box. We call it compiles because it was deliberately planned before the meeting of the return jadges, who were the mere tools to carry it into effect, and because it was boarted of by the copperheads of this borough, at least two days bofore the meeting of the said district return indiges.

That it will be as barren of results, as the attempt to defraud der. Koonts, we have no doubt. Moran teach the next Congress, and we are equally estured that Judge Hing, and Mestra-Ross and Aimstrong will take their sests in disting, although the petiti-larceny rescality of sheet counted.—Somered Herald.

ACHAND ARD GLORIOUS VICTORY.

AS might have been foreign from the signs of the times, the election yeaterday has resulted in a great Union triumph, one as hobly gained as ever was an electoral victory, and fraught with far more important consequences than any on record. From overy toyal State in the republic come the ampticious tings that the people have been titue to the intelligence for which the world has given them cradis, true to the memories of part glories, true to the Union with which all cur greatness and prosperity are identified, true to the nationality and indivisibility of the republic, and true to the free principles which underlie all cur republican institutions. The struggle has been a far more desparations than could have been anticipated. Rechinst, desperate, unscrupations and saidah demangages conspired against the integrity of the auton, and basely sought to humilitate its fig in the interest of an armed rebellion. Trial of Martin Brawdy for the Murder of James Pagan.

At nise o'clock the court resumed the trial of the case of Martin Brawdy, Jr., for the murder of James Fagan. The examination of witnesses for the presention was continued. The following is a synopsis of the tentinony:

John himchan tentified that he was at the pirito, and just get down when the shooting took place. Heard the words, saw the flashes of the pistol, but did not know either Fagan or Brawdy. The man that was shot walked about ten feet, and said he was shot; did not know which became of the man that the though the was certain that the man who did the shooting was the same man who said he could "whip any Dew Drop," etc. He could not identify the pritoner, however, as he did not see his face at the time of the shooting was ime of the shooting. Hannah Pinnkett testified that she lived on Hannah Pinnkett esetified she is he lived on McCling street, and saw a crowd coming down the bill, from the picaic; saw Mr. and Mrs. Brawdy pass her door; in a half a minute or so, after the old folks had passed, Martin Brawdy came running past, and the witness heard him sak three times for the pisal; did not see any one then near him but his father and mother. After defendant passed up, the witness saw the sables and beard the shots.

Lacy Susshine was sitting with Mrs. Plunkett at the time of the showing; and heard Mattin Brawdy hallo twice for a pistol; he was running at the time; in about five minutes after she heard the pistol shots.

Than the lowest deep, there is yet, in the ephino of the miners, a lower deep of surfaceous 'gutters," and they manifest now little respect for the teaching of geologists, who, until corrected by lake experience, were in error in asserting that, a. a rule, gold would never be found in large quantities far from the surface.

Shoddy Leather.—We have seen within a few days some specimens of a fabric with the presence of a fabric with we presume is no novelty to our friends in the shootrade, but which were entirely new to us. This fabric is a manufacture from refuse scraps of leather, which are reduced to a poin by grinding and macersaion, and reconverted into solid "siddes" of leather, by pressure. The article thus produced is used mainly, we enderstand, for inner soice, but to an unprofessional eye it seems as smitable for all the purposes of leather as the original article—Solem Guscults.

Attraction in New Castle. Attraction in Mew Castle.

The Lawrence Journal thus speaks of the establishment of our friend Allon, in New Castle:
R. H. Allen, at "Oak Hall," has many attraction in these times. The late papers from all sections of the country—periodicate, stationery of every variety and quality, and his styles of display, almost rivals nature in her most basulf, ful forms. In his arrangement of the choice brands of tohacon for sale we might suppose he had used the magiciant's wand to produce as affect on his counter, to see thom crowd around his counter. His albums, carlectures and fancy articles remind us of a mother's fairy takes of years age of the transparent beauties of etherfal climes, where the world is lost in dreams of other spheres. Go to Allen's if you want some-thing to amuse or instruct.
