Additional Details of the March THE ENGAGEMENT AT EBENEZER CHORCE.

Results of the Expedition. OUR LOSSES IN THE CAMPAIGN, Large Amount of Cotton in Alabama, DEMAND UPON CANADA FOR THE ASSAURING.

NEW YORK, May 5 .- The Herald's correspond ent with Wilson's expedition furnishes additional details of the march through Alabama, and of the battle at Ebenezer Church. This engagement took place at a point called Ebenes Church, about twenty five miles from Selm The rebels were entrenched in the woods and had six pieces of artillery in position. They vere about five thousand strong, commi Forest, Chalmers, Armstrong and Adams. After considerable firing on both sides, two companies of the 178th Indiana, led by Capt. Tayler, charged them with the sabre, driving their gunners from the guns and capturing one battery, with three guns, and scattering the enemy in all directions. While they were thus demoralizing the realis,

We also captured four pieces of artillery and many small arms.

Captain Taylor was killed, after having wounded Gen. Forrest in the arm with his sabre.

Our troops arrived in front of the fortilications of Selme about four in the afternoon of April 20th. They were immediately formed in line of bettle, the 2d division re-occupying the right of the centro of the work, and the 4th division the extreme left.

The fortifications consisted of double earthwooks in a semi-direle from bank to bank of the Alobama - frer. There - were, also thirty-two bettlens and two formidable forts. In front of the first line of works was a row of palisades six feet high, which, together with the marrhy nature of the ground over which the charge was made, rendered the work wery difficult of access.

The works were defended by 7,000 men, with thirty pleces of artillery. As previously stated The works were defended by 7,000 men, with thirty pieces of artillery. As previously stated, the Second Division was formed in line, dismounted, and a skirmish line formed. A brisk fire was kept up between our skirmishers and the rebels until about five o'clock, when at a signal from the Chicago Board of Trade Battery, our forces charged on the breatworks, yelling like demons. The ro'els poured a murderous fire of muskerty and artillery into the ranks, but, nothing daunted, our troops bore steadily forward, and in fire minutes had scaled the works and were diving the enemy towards the river in a

cross the river, although a few aucceeded in crossing ask decaping.

We captured 3,400 prisoners and thirty-two pieces of artillery in line, besides over seventy pieces in the arrenals.

Our loss was 354 killed, wounded and missing, and that of the enemy equally heavy.

Montgomery was surrendered without a fight.

Mongomery was surgendered without a fight.

At Columbus the enemy made a stubborn resistance, but our troops scaled their works and captured 3,000 prisoners and over seventy places of artillery. Here all the government property, arenals, factories and railroad stock were destroyed.

Fourteen miles out of Macon the rebel Gen. Robertson sent a message from Gen. Howell Cobb saying there had been a suspension of heatiflities granted by sherman.

General Minty repiled that he knew nothing of it and told Gen. Robertson that he must retire to Macon while he sent the messags to Gen. Wilson, who was in the rear. Gen. Minty ordered his advance to move forward, and in five ninutes after the delivery of this 'answer to the revel Gen. Robertson the advance was made and as Rubertson and his command did not get out of the way, they were all captured.

Miscon was taken possession of, and here Gen. Wilson, way, they were all captured.

Miscon received official information of the amphifice. The result of the campaign may be suffered up as follows: The capture and occupation of four of the most important cities in the Confederacy, 6000 prisoners, over 200 guns, and a large supply of small arms, devent of the country, and destruction of least fore a finite of the country, and destruction of least fore a finite of the country, and destruction of least fore a finite of the country, and destruction of a finite of the country and destruction of the campaign to the property, disconsidered the finite of the country and destruction of a finite of the campaign to the property, disconsidered the finite of the campaign to the property. ctage yield in 'California.' Quite a number of quariz mills went up last season, all of which are taid to be doing well.

Now that there is no question about the extent or the richness of the mines, we expect a rush of quariz mills to that section this season. Some of there mills are made in Pertland, Oregon; some in San Francisco, and some come from the East. Those coming from the East are said to be owned principally there. There are said to be owned in New York.

It is now thought that there are rich quariz icdes on Burnt river. I saw a short time ago a piece of rich silver-bearing quariz from Eagle creek, a branch of Powder river.

A larger yield is expected from most of the milipic camps this season than ever before, because of the capital that has been brought to them. This year will make Idaho as famons as Nerada. They appear to have found rich quariz at out Fait Lake, not much to the salisfaction of Brigham Young & Co.

There are many permanent settlers in Eastern Orrgon and in Idaho. Farming there is an excellent business. For small grain some sections of that country are well adapted, and there is and always will be a ready market. They have the priers here with the cost of freight super-added, which is now, at lowest rates, ten cents a pound to Owyghee. In time I think there will be enough grain raised east of the Casades to supply the demand.

The oil creditinent of California and Nevada is extending phere; but no oil has ben found yet, unless it should be near the month of the

I spyke in one of my letters of the immense quantities of iron ore up the Willamette. A company has been former in Portland and New York, with a capital of \$300,000 (coin.) to work this ore. They will build their furnace at Oswego, six unless above Portland; where there is a good water-power and plenty of wood. The ore is not in veins, but there are entire hills of it—enough to supply the world, if all accounts are true. I never saw so much as I saw there, unless it was in Kansas. This ore is so bure that blacksmiths have made the iron they used from it. Before this company was formed, the parties had the ore tested. It yielded 60 per cent. This, I believe, will be the first smelling formace on this coast.

Of the coal I spoke of last fail I have not heard-since. That there is coal on the Uswilts river there is no doubt; but in what quantities Teams, how. None has been brought to marker jet. I think coal will be discovered somewhere in Western Oregon. There is coal within two miles of this place. I saw some of it. In addition to the issues by war, target nounders fled from the South, to each persecution or conscription. Many of these will now return. We thus see that if the rebel leaders had been able to carry on the war week. tion or conscription. Many of these will accer-reture. We thus see that if the rebel leaders' had been able to carry on the war much longer, the work of exterimination would have been complete. As it is it will require many jours of time, and a free tide of immigration to bring the Sbuthern States up to an average condition of prosperity. But under the influence of free-com, society will be reorganized, and a new spirit; will be influed—the spirit of Northern enterprise. These will eventually cause the Southern States to grow and prosper as they never did before and the next generation will be very different from the slave entocerasy which has failen with the rebellion.—Con. Gas.

TWENTY-ONE STATES, including Louisians Tennessee and Arkansas, have now, through their Legislatures, ratified the Constitutional Amendment abolishing slavery. There is no lows, Oregon and California will follow their response in due season. The assent of but one more member of the Unitar will then be requir-ed to make the Amendment the law of the land, provided Louisians, Termesse and Arthe unenviable position of dogs in the manger, cadcavoring to delay what they cannot hope to prevent. The Amendment will be passed in spite of them, and by the votes of States a thousand times more deeply interested in the perpetuity of the secured institution, and more visally effected by its abolition, than these free and semi-free mendlas of the slave pawer have ever been, or ever can be.—N. Y. Tribune.

The 7-20 loan is being distributed this week with marvelous energy. The daily sales, thus far, have averaged 45,302,500, (as against a daily average of 48,283,233 last week, and of 43,054,140 the proceding week.) as follows: Monday, 85,175,000, Thesday, 45,231,100. The current sales of the loan are at the extraordinary rate of 861,221,000 a week. At this race, all the unsold balance (\$180,000,000,000,000) of the pending series of \$200,000,000,000 will be marketed before the san of the ensuing month of June, or nearly so by the date (June 15) when the notes formally commence to bear interest. The orders for the \$50 and \$100 notes of the loan, this week, have averaged 3,138. The flay coin interest on the 520 bonds is being eagerly and at the proceeds, very generally, relavested in national stecks, mainly in the favorite Seyen. Thirties, which constitute emphatically the popular loan of the government.

The annual sermon before the Foreign Missionary Board of the Old School. Presbytarian Church, was preached in New York on Monday night, by Bov. Dr. M. J. Hicknet. The treasury is free from fabt. There remains, however, a heavy liability for extra exchange on bills sent out but not yet matured. The entire income was larger than in any preceding year, the receiotation of mative laborers has received an increase of twenty-nine. Over thirty churches are reported in different countries, with upward of a thousand communicants, and many thousand scholant is the schools. Tus 7-20 loan is being distributed this week

CITY AND SUBURBAN. An Important Special Verdiet. The case of Allectiony County vs. The Pitts-burgh and Steuberville Railroad Company, was heard resterday in the Court of Common Pleas, before Judge Steireit. The school is brought be the Steubenville Company for the purpose c showing cause why the County of Alleghen showing cause why the County of Allegheny should not ply certain subscriptions contracted shy the County Countissioners on behalf of the County. The jury found the following special verdict in the case: That upon the facts the jury verdict in the case: That upon the facts the jury are ignorant, in joint of law, on which side they onght to fluid the issue; that if, upon the whole matter the Court shall be of the opinion that the plaintiff is entitled to recover the whole amount paid for the coupons which mastered and were lined before the institution of this suit, then we find for the plaintiff \$343,488 74. If the Court shall hold that plaintiff is entitled to recover so, by the amount paid for coupons belonging to bonds equal in shoount to the par value of the stock owned just he did by justiniff, and that the plaintiff is most entitled to recover for coupons paid, which matured after the sales of plaintiff is stock, ithen we find for the plaintiff \$163,074 80 but if the Contra shall be of opinion that the law is with the defendant, and that the plaintiff is.

Professor serly, of New York, proposes to em-ploy the current generated by an ordinary fric-tional electric machine, and obtains the light by nterrupting the current. He proposes to se the continuous action of the machine in all weather, by surrounding it with a glass case, and weather, by surrounding it with a glass case, and keeping the air within the case by means of the pride of calcium or other hydroscopic substance. Professor Seely Is now engaged in experiments to ascertain what material will produce the most intense light, and if the apparatus works according to anticipation, a factory in which machiner, is employed may be lighted without any additional expense, except the small power required to turn the electrical machines. As in mills driven by water, there is always a surplus of power during the winter months, the oily time when lights are required, there would be no expense for this light except the first cost of the apparatus, which would be quite moderate.

On next Moday evening Mr. On next Menday evening Mr. Max. Strakosche presents for the first time to the Pittsburgh pub-lic the two great artists he has recently brought from Europe—Mdlle Katon and Mr. Webl Mdlle Katon is probably the best lady visitace list in the world. She has a pleasing face, fine figure and most expressive features. She plays figure and most expressive features. She plays the violincello with grace and delicary, and with rare warmth of feeling. Mr. Webli has a place among the very first performers on the plane. His execution is wooderful. With either hand it is faultiess, and the rapidity of his movements and the lighthese of his tonch, are truly marreltum. There have been many eminest pianists in this country, but none have had such sudden fame as Mr. Webli.

The seats for these concerts have been selling off very fast, but we understand there are still some silgible once left. Ticket office at Mellor's, Wood surect.

Wanters, filled with vehement abuse of us for having linied that he peanloy had nometting to do with the plot for assassinating the President. George put on the sur of an injured innocent. Hatthought it monstrous that he should be deemed capable of such a crime; and in order that the public might be the more impressed by his protestations, he offered to come to the United States and stand his trial upon this charge, it the gormmunt would agree not to presecute him on any other. He had better come. He is wanted—very hadly wanted by the President of the United States. It seems that erdiesee how in possession of the military authorities, renders it pretty certain that Sanders was concerned, as we suggested, in the conspiracy which led to Mr. Lincoln's murder.—N. Y. NATIONAL BARKS.—The work of organizing National Barks has progressed very rapidly, and the limit fixed by Congress prointses now very soon to be reached. If it is intended to authorize barks in the rebellious States, which are now coming under national control, the addition of new banks in the Northeris Bates must cease. It appears that there is now in operation over eleven hundred banks, with an authorized capital of \$365,000,000. The most remaining therefore, is but \$85,000,000. Onlo has a fair share of the capital, standing fourth in the list. New York is first. Pennsylvania second, Massachusetts this; and Onlo next.
