To the objection that negro suffrage implies negro social equality, the Frankfor Commencetil tympship is proposed:

Regros have woted in the south, and yet were in no sense savanced to an equality with the whites. In every southern State, except South Carolina, the right of antitage was originally exercised by all "freemen." The original Constitutions of Delaware, Maryland, North Carolina, the right of antitage was originally exercised by all "freemen." The original Constitutions of Delaware, Maryland, North Carolina, Virginia and Georgia, make ne mention of color, or distinction between white and black, in their provisions as to who may vote. Till within comparatively tew years, aggoes voted in Frennessee. In Maryland they, otoed until 1833, and in North Carolina as late as 1835. Now, did this advances them at all in the scale of equality Were the schools is those States thrown opes to them? Did they visit in gentlemen': parlors? Was amalgamastion any mare common in those days than it is now? We hope not. "Was there, in any scase, the "equality" of which the opposition is now so offensively talking, and with which they are so pertinacionaly insulting the common sense and decency of the people! Not a bit of it.

In Pennsylvania colored people voted till 1838. Yet in that State a negro has not the same privileges that he has here in Kentnety. In Connecticut the negro voted till 1817, and yet he had not attained an equality sufficient to preserve for himself the privilege. In New York the negro, if he has the requisite property qualification, may vote now, but he has carcely advanced one step in the scale of equality. Not even near enough to have the property restriction removed in bit case, when it was removed in 1826, as far as it applied to the white voter.

Evidences of Insanity.

As usual in almost all desperate criminal trials, the defence sets up the plea that Payne, the assassin of the Seward family, is insand. One of the facts urged in support of this ples is the circunstance that on one occasion the prisoner knocked down and stamped upon a negro woman who had refused to do something which he had dered her to do. Taking this as an evidence of insanity, a very considerable portion or the chivalry must be stark mai; for the heating of alares, women as well as men, has always been a frequent pastime, and even the laws of most, if not all, the alare States recognize the whipping post where no distinction is shown b tween the serse. Payne was insane just as tens of thousands of other admirers and supporters of shavry were insane, taking woman-brating as the test, and he was insane just as Jeff. Davis, "Jecob Thompson, Dr. Blackburn, Booth, Beall, Komedy, and the whole crew of secretion butchers were insane, as illustrated by his batchery at the house of the Secretary of State. For ourselves, we can discover no difference between knocking women down and stamping upon them, and the supporting of a wicked system that ineritably leads to such results; nor can we see that the act of Payne, on the night of the 14th of April, differs a whit, in principle, from the deeds of Lee, Floyd, Breckindige, Beell or Remmes. If Payne is insane there are not med-bause enough in the country to hold the twenticth part of the chivalric lunatics of the South.—PMes. Hall. slaves, women as well as men. has always been

With ample fands in his heads, he deliberately falled to pay the laterest on the public debt, and the credit of the United States was only saved from receiving a dissurtous and diagraceful shock, by some morchants of this city coming forward and voluntarily advancing the required assount. We believe there is not to be found in the political history of any occurity an example of greater baseness and perfect than this of Cobb's; and what makes it all the worse is, that he had the audaoity, after perpetrating it, to come to Mew Fork, and brag of its epenty, in the faces of the people whom he had swindled and cettraged, amonneing that "the whole thing"—meaning the national government—"was gone up."—New Fork
