In the French Chambers, on the 2d inst., M. Thiers delivered a great speech on the budget, and strongly condemned the Mexican policy of the Emperor. He said: After the two great wars of the Orimeas and Meij they had come to little wars—little in regard to the number of more agreed in them, but great or account of the distance, which rendered the supense very considerable, and of the serious complications which might size from them. The Maxican war had already cost more than the Italian, and it it wor do; the consequence ampth to even more grave. Ah, he continued, if you would evacuate Mexico, I should for my part be very gied. I know very well that it would-partion me the expression—hart the self-fore of the government. Ferhaps I shall be told not its self-fore, but its good-faith in keeping engagements. Be careful how you say that. Because if you speak of plighted faith you will lead me to believe that yea have committed yourselves to engagements which last year you protested you had not entered into when I entered you to keep clear of them. Therefore, it is that I do not say good faith but self-fore. After saying that he ought as dopping the language used by M. de Caulincourt to Napoles II, at Dreaden, its IEM. M. The war exhausted the South, materially and morally. Its population was declinated, its material resources wasted, its commerce annihilated, its finances ruleed, and its old system of alaye labor abolished.

It is now in need of an enterprising, enorgetic population, and this the teeming North can furnish with profit to both. It needs capital to infuse vitality into business, to rebuild its railroads and bridges, and to transport such staples as it has on hand; and to transport such staples as it has on hand; and to transport such staples as it has on hand; and to transport such staples as it has on hand; and to transport such staples as it has on the financial coatres in the North. It recuires the re-establishment of commercial activity; and the Norther section of the Union has always furnished this to every purt of it. It needs the spillection of new energy to the development of all its vast and varied resources; and from the emergetic North it must come. Its system of labor, now greatly deranged, requires re-formalizing and we believe this can be effected most speedily, and to the greatest advantage, by the combination in the work, of Northern skill with Southern knowledge. By co-operation in all these labors, the whole comity, North and South, would be equally hemeful. Death from Intemperance discharged from Nevin's Battery, was found dead yesterday afternoon at Sayer's tavern, on Works, on the Allegheny river above Tarentown. No trace of the thief or the stolen property had been discovered until yesterday, when Officer Lowe succeeded in finding the copper in a skiff in the river at Allegheny, but the thief managed to escape. A boy who was in the skiff was arrested, and the boat was also secured, as it is believed to have been stolen.
